

# Catalogue 2018/2019

:hager

**Your reliable  
partner for  
intelligent  
solutions.**

# **There's plenty to do. Let's get started.**

**The time for  
renovated electrical  
installations and  
intelligent solutions  
is now.**

**Dear friends and partners,**

We all value experience. Routine helps us to be fast and reliable, which can save us time, money and hard work. Yet there are also moments when we need to leave the familiar behind and take advantage of golden opportunities just waiting to be discovered and seized.

This is one of those moments.

Renewable energy sources and innovative building technologies are creating opportunities to make more intelligent and energy-efficient homes.

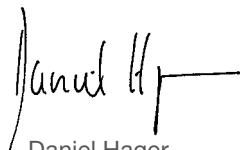

The latest studies indicate that many properties will first have to be adapted to accommodate the solar power systems, energy storage units and intelligent building controls that characterise smart homes. As of 2014, 15.3 million UK homes could benefit from improvements to aid in energy-efficient living and working. Large-scale renovation and modernisation are needed if renewable energy is to help achieve an 80 percent cut in the UK's carbon emissions by 2050.

This work requires specialists. There's plenty to do. Let's get started.

We at Hager Group will support you with the very best products, solutions and services. And we are constantly evolving and improving: we have more than 800 team members working on better products and innovative technologies to make your work easier and our customers' lives more comfortable. At the same time, we are increasing our focus on services so that we can provide you and our customers with expert support.

When it comes to change, we practice what we preach. And we rely on expert partners like you to help us set the trends for the future. This future is starting right now, and I'm looking forward to shaping it with you.

Yours sincerely,

Daniel Hager  
Hager Group CEO

## One family

The world is changing, and we are changing with it. As a family company, we have grown steadily over the last sixty years to become a reliable partner to expert technicians and electrical wholesalers around the world. All while remaining true to ourselves and to our values. And so we continue today, with a number of well-known brands – each with their own distinctive strengths – working together under the Hager Group umbrella.

**Hager Forum** in Obernai, France, is a place where we can work with customers and partners to shape the future. That makes it a perfect symbol of the innovative power of Hager Group.

**hagergroup**

## Your trust

As a partner and customer, you can choose from the entire range of products and services offered by every member of our brand family. Our new corporate image highlights our shared strengths even more clearly. From now on, each of our brands will be easily recognisable as a 'Member of Hager Group'. The new corporate image also involves some colour and design changes. Our core promise remains the same: we will always work with you to succeed together.

## Our strengths

We have huge opportunities ahead. The upcoming modernisation of existing buildings, intelligent building technology, digital services, new energy sources and technologies – all of this opens up new, exciting potential for you and for us. At the same time, business requirements are becoming more and more complex. That's why it's so important for you to have Hager Group specialists supporting you with all of their expertise. Together, we are stronger. Together, we will overcome the complex challenges of our time with simple, impressive solutions – just as we have been doing for the last six decades.

# E3

Global warming, a shortage of natural resources, social cohesion and the transition to renewable energy: there are many challenges facing businesses and society today. Hager Group is pursuing a variety of initiatives to promote sustainable development with its “E3” approach.

# Environ

## **E for Environment**

We work continuously to reduce our carbon footprint. Our priorities include optimising the transport of our products and cutting the amount of energy we use in production to further reduce our Carbon footprint.

# Ethics

## **E for Ethics**

We need skilled, motivated and healthy employees in order to offer our customers the best services and products. That's why we provide all our team members with a safe, healthy working environment, support their professional growth and offer them opportunities for further development. We also promote diversity and adherence to an Ethics Code throughout the company.

# ment

# Energy

## **E for Energy**

Hager Group helps its customers to save energy intelligently. We also analyse and optimise our products' environmental performance throughout development and production. By providing a detailed environmental profile for most of our products, we can be fully transparent with our customers and ourselves.

# Technology as a friend

## Hager Design turns technical products into familiar friends.

Before we start designing a new product, we think about the people it is going to serve. Will it assist or entertain, observe or protect, save time or save energy? Ideally, whatever it does, users will feel it is a reliable 'friend'. We need to know how to connect with people on an emotional level, to ensure that in return they feel connected to our products.

### **Technology for people**

Responsible design builds on an ethical foundation. At Hager, this foundation is all about respecting people and caring about their well-being. And it's not just about today – we want to inspire our customers for years to come. That's why we include them in every stage of the design process – from installer to planner, to end user.

### **An honest brand**

Hager products are world-renowned for their quality, which is visibly and tangibly unveiled in their design. The unmistakable, explicit and clear brand image tells customers straight away that these products are part of 'the family'. This is our signature, the Hager DNA, which embodies two central principles.

**Friendly, serene, balanced:** an honest, authentic design that blends naturally into everyday life, without gadgets or cheap effects.

Erwin van Handenhoven  
Hager Group Design Director

**Ingeniously simple:** our products are important, but never over-the-top. If it's not necessary, we leave it out. The essence remains. Straightforward in both form and function: simple to install, simple to use. Simply Hager!

### **Looking ahead to the future**

Hager systems are not stagnant – they are expanding, gaining more and more visibility in our customer's homes. This has implications for our present design language. We call it 'New Start'. The aim of New Start is to meet our customers where they are, and carry them with us into the future: with innovative ideas, new designs and expressive materials. The new Hager catalogue is full of 'New Starters' – along with lots of 'old friends'. Come and explore!

# An engineered solution

From pre-assembled standard distribution units to bespoke composite TP&N boards, and plug in distribution boards we can provide the solution. We will even deliver to site to an agreed deadline and to specification. All the power of an experienced design engineering team and an ISO 9001:2008 manufacturing plant is just a telephone call away.

## Here to help

Many electrical distribution solutions require something that cannot be purchased off the shelf.

Whether it is an unusual configuration or simply speed on site, our engineered solutions supplies the answer. You give us the specification and we will deliver what you need with the peace of mind of factory assured quality to ISO 9001:2008.

## Metering

Our lighting and power meter board is a compact solution to meet the demands of energy metering. However for special applications we also offer our full-engineered solutions design and build service, providing additional features such as data logging and web connectivity for remote meter reading.

## **Pre-assembled standard distribution board**

Factory assembly of standard distribution boards with standard incoming and outgoing devices. Providing the installer with all of the products factory assembled and ready for cabling.

## **Engineered Consumer Units**

Factory assembly of non-standard consumer units, special configurations in standard enclosures or metal DIN rail enclosures. Providing an exact product that meets the requirements of your particular installation needs.

Pluggable and metered consumer units are also an option. With pluggable consumer units circuit breakers are wired to sockets fitted into the enclosure enabling final circuit cabling to be simply plugged in.

## **Bespoke composite system**

Factory prepared distribution boards ready for assembly on site with apertures pre-cut to allow cable access between the various enclosures, combining Panelboards and TP&N boards into bespoke composite panels.

Standard metal distribution boards designed to accommodate customer specified OEM equipment.

# Commercial Distribution

Powering a building to its potential, it's what we do. We have the perfect solutions to help an office, factory or industrial site save energy and keep their occupants safe. From Panelboards to our range of enhanced TP&N boards with metering capabilities, our commercial offering will create the perfect electrical ecosystem for a building.

### SP&N Distribution Boards

#### Characteristics:

- SP&N distribution boards are available from 4-28 outgoing ways. The range comes with a choice of either 100A 2 pole switch disconnector, 63A 30mA 2 pole RCCB or 100A 30mA 2 pole RCCB, or a range of split load versions.
- Conforms to BS EN 61439-3.  $I_{nA} = 63A/100A$ ,  $I_{nc} = 63A$ ,  $I_{cc} = 10kA$
- Cable Sizes: 100A: 50mm<sup>2</sup>, 63A: 16mm<sup>2</sup>
- Ample wiring space, with provision to accept RCBO's.
- Full complement of earth and neutral terminal bars to accept up to 16mm<sup>2</sup> cable.
- Suitable for cable entry on all sides and back.
- For dimensions see page 1.47.

The relevant part of the BS EN 61439 series applies to the integration of mechanical and electrical components (switching devices, control devices, busbars, functional units, etc.), into an enclosure. Hager systems such as consumer unit, distribution board and panel board ranges are certified to the appropriate part of the BS EN 61439 series. When selecting other device / enclosure arrangements, please contact Hager technical support for guidance - 01952 675689.

### DIN Rail Enclosures

#### Characteristics:

- One, two or three row 8-66 module enclosures, fitted with DIN rails to accept any combination of Hager devices. Ample wiring space, with provision to accept RCBO's.
- Conforms to BS EN 62208.  $I_{nA} = 63A/100A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 10kA$
- Full complement of earth and neutral terminal bars to accept up to 16mm<sup>2</sup> cable.
- Suitable for cable entry on all sides and back.
- For dimensions see page 1.47.

### Invicta 3 SP&N Distribution Boards

#### Characteristics:

- Boards are available with 14 & 29 outgoing ways. The range comes with a 100A 2 pole switch disconnecter to accept 50mm<sup>2</sup> cable. Ample wiring space, with provision to accept RCBO's.
- Conforms to BS EN 61439-3.  $I_{nA} = 63A/100A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 10kA$
- Full complement of earth and neutral terminal bars to accept up to 16mm<sup>2</sup> cable.
- Suitable for cable entry on all sides and back.
- Enclosures are available with plain or glazed doors.
- For dimensions see page 1.47.

<sup>1</sup> A **JK101SE** may be required to provide additional incoming cable space, see page 1.48.

<sup>2</sup> Full metal cover & door to comply with BS 7671 Amendment 3, where required for domestic dwelling applications.

### Invicta 3 125A TP&N Distribution Boards (125A Incoming, 63A Outgoing)

#### Characteristics:

- Surface mounted steel enclosures, IP3XD rated available with plain, glazed & Amendment 3 door options.
- Conforms to BS EN 61439-3,  $I_{nA} = 125A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$
- Supplied without incoming & outgoing devices. A Hager incomer kit must be used.
- Incoming cable sizes: 125A & 100A 50mm<sup>2</sup>, 63A 16mm<sup>2</sup>
- For dimensions see page 1.48.

### 125A Dual Metered Boards

#### Characteristics:

- Boards are supplied with a dual channel meter that offers a pulsed & modbus output.
- Conforms to BS EN 61439-3,  $I_{nA} = 125A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$ .
- Provided with meter and 125A TP switch disconnector pre-fitted. Each individual pan is fully rated at 125A.
- For dimensions see page 1.51.

### IP65 Distribution Boards (Steel version not suitable for outdoor use)

#### Characteristics:

- Suitable for three phase applications where a high IP rating is required.
- Conforms to BS EN 61439-3,  $I_{nA} = 125A$ ,  $I_{nC} = 63A$ ,  $I_{CC} = 25kA$ .
- Available with either a steel (mild steel, powder coated) or Glass Reinforced Plastic (GRP) enclosure.
- Supplied without incoming and outgoing devices. A Hager incomer kit must be used.
- Available up to 125A direct connection with outgoing distribution, rated for MCBs from 0.5A to 63A.

### Meter Incomer Kits for 125A Boards

#### Characteristics:

- Each meter pack contains: 125A incoming switch with M8 lug cable connection, meter, CT blocks plus all necessary connections and 125A direct connection kits for each associated TP&N board.
- Conforms to BS EN 61439-3, I<sub>n</sub>A = 125A, I<sub>nc</sub> = 63A, I<sub>cc</sub> = 25kA.
- For meter incomer kit dimensions see page 1.55.
- **Note:** Distribution boards supplied separately to be assembled on site.

Description	Connection	Cat ref.

### Meter Packs for 125A Boards

#### Characteristics:

- This kit fits into the TP&N distribution board. (When fitting a meter pack to a **JK104B(G)** & **JK106B(G)**, a **JK101SE** is required to provide additional incoming cable space).
- Each meter pack contains: meter, 3 pole CT block, 3 x fuses & carriers on DIN rail, wiring loom, incoming shroud, instructions (including torque settings for electrical connections).
- For sub billing metering applications please contact our Technical Service Centre on 01952 675 689.

<sup>1</sup> Full metal cover & door to comply with BS 7671 Amendment 3.

### Invicta 3 250A TP&N Distribution Boards (250A Incoming, 63A Outgoing)

**Characteristics:**

- Surface mounted steel enclosures, IP3XD rated, available with plain, glazed & Amendment 3 door options.
- Conforms to BS EN 61439-3.  $I_{nA} = 250A$ ,  $I_{nC} = 63A$ ,  $I_{cC} = 25kA$ .
- Supplied without incoming and outgoing devices. A Hager incoming kit must be used.
- For dimensions see page 1.48.

### 200A Tri Metered Boards (Power, Lighting & Mechanical Services)

**Characteristics:**

- Provides separate energy information for each group of outgoing devices.
- Boards are supplied with meters that offer a pulsed & modbus output.
- Provided with a 200A switch disconnecter incomer pre-fitted with ample cable space.
- Conforms to BS EN 61439-3.  $I_{nA} = 200A$ ,  $I_{nC} = 63A$ ,  $I_{cC} = 25kA$ .
- For dimensions see page 1.51.

### Hybrid 250A TP&N Distribution Boards (250A Incoming, up to 125A outgoing)

**Characteristics:**

- A hybrid distribution board combining 2x TP ways of 27mm MCB devices to supply end loads up to 125A, with standard 18mm MCB/RCBOs for other smaller loads.
- Surface mounted steel enclosure, IP3XD rated, available with plain steel or glazed door options.
- Conforms to BS EN 61439-3.  $I_{nA} = 250A$ ,  $I_{nC} = 63A / 125A$ ,  $I_{cC} = 25kA$
- For dimensions see page 1.49.

### Single Meter Packs for 250A Boards

#### Characteristics:

- Meter kit for standard 250A distribution boards & hybrid 250A distribution boards.
- Each meter pack contains: meter, 3 pole CT Block, 3 x fuses & carriers on DIN rail, wiring loom, incoming shroud & instructions.

Description	Cat ref.
Multifunction Meter Pack 250A Pulsed & Modbus	<b>JK240PM</b>

JK240PM

### Double & Triple Meter / Splitter Enclosures for Standard 250A Boards

#### Characteristics:

- These meter modules provide a solution to distribute power across two or three, type B distribution boards from a single cabled supply at 250A rating. This solution facilitates the requirement of separately metering (kWh) different load types in a commercial building application e.g Power and Lighting or Power, Lighting and mechanical services.
- Modules as supplied with all necessary meter, CT and power cable items to link to TP boards above.
- Conforms to BS EN 61439-3
- $I_{nA} = 250A$ ,  $I_{nC} = 63A$ ,  $I_{cC} = 25kA$
- For meter module incomer kit dimensions see page 1.55.

### DIN Extension Boxes & Door Kits for 125A Primary Boards

**Characteristics:**

- Extension boxes have plain or glazed doors and a DIN rail for mounting modular devices.
- Conforms to BS EN 62208.
- Full width enclosure provided with sixteen modular ways per row.
- For dimensions see page 1.49.

### Side DIN Enclosures for Primary Boards

**Characteristics:**

- Side extension boxes allow for the installation of DIN rail mounted devices.
- Conforms to BS EN 62208.
- Can be horizontally or vertically attached to distribution boards.
- All Side DIN Enclosures supplied with two removable gland plates.
- For dimensions see page 1.48.

### Invicta 3 Panelboards (250A Incoming 125A Outgoing)

#### Characteristics

- Comprises of IP3XD rated enclosure, pan assembly, twin neutral and earth bars.
- Conforms to BS EN 61439-2.  $I_{nA} = 250A$ ,  $I_{nC} = 125A$ ,  $I_{CC} = 25kA$ .
- Supplied without incoming kit, JN 250A incomer kit must be used.
- Form 3B type 2 using outgoing terminal shield (form 3A without terminal shield).
- Removable side gland plates are standard. Removable gland plates are provided top and bottom for ease of installation.
- For dimensions see page 1.56.

#### Cable Capacity Incomers & Outgoers

- Incomers: 3 and 4 pole incomers, cable capacity 150mm<sup>2</sup>, max lug width 25mm, M8 bolt, direct connection kit.
- Outgoers: 1 & 3 pole MCCB 70mm<sup>2</sup> flexible, 95mm<sup>2</sup> solid.

#### Options

- Key lock, meter pack, DIN rail, extension box, spreader box.

#### Outgoing MCCBs

- Adjustable thermal options on triple pole devices.

### Invicta 3 Panelboards (400A Incoming 125A Outgoing)

#### Characteristics

- Comprises of IP3XD enclosure, pan assembly, neutral bar and earth bar.
- Conforms to BS EN 61439-2.  $I_{nA} = 400A$ ,  $I_{nC} = 125A$ ,  $I_{CC} = 50kA$ .
- Supplied without incoming kit, one of the incomer kits listed below must be used.
- Form 3B type 2 using outgoing terminal shield (form 3A without terminal shield).
- Removable gland plates are provided top and bottom for ease of installation.
- For dimensions see page 1.57.

#### Cable Capacity Incomers & Outgoers

- Incomers: 3 and 4 pole incomers, cable capacity: M12 bolt, direct connection kit: M10 hexagonal bolt.
- Outgoers: 1 & 3 pole MCCB: 70mm<sup>2</sup> flexible/ 95mm<sup>2</sup> solid.

#### Options

- Key lock, meter pack, DIN rail, extension box, spreader box.

#### Outgoing MCCBs

- Adjustable thermal options on triple pole.

### Invicta 3 Panelboards (630A/800A Incoming 125A Outgoing)

#### Characteristics

- Comprises of IP3XD enclosure, pan assembly, neutral bar and earth bar.
- Conforms to BS EN 61439-2.  $I_{nA} = 630/800A$ ,  $I_{nC} = 125A$ ,  $I_{cC} = 50kA$ .
- Supplied without incoming kit, one of the incomer kits listed below must be used.
- Form 3B type 2 using outgoing terminal shield (form 3A without terminal shield).
- Removable gland plates are provided top and bottom for ease of installation.
- Switch Disconnecter: 630A/800A, MCCB: 400A/630A, Direct connection: 800A.
- Incoming cable lugged via M12 hexagonal bolt.
- For dimensions see page 1.57.

#### Cable Capacity Incomers & Outgoers

- Incomers: 400A: 2 x 240mm<sup>2</sup>, 630A: 2 x 240mm<sup>2</sup> / 2 x 300mm<sup>2</sup>.
- Outgoers: Single pole up to 125A - 70mm<sup>2</sup> flexible, 95mm<sup>2</sup> solid, Triple pole up to 250A - 150mm<sup>2</sup> flexible.

#### Outgoing MCCBs

- Adjustable thermal options on triple pole.

### Meter Enclosures

- Blanking plates not included (utilise removed blanking plate from panelboard).
- When selecting outgoing metering, the panelboard metering system is easily configured by selecting a side, top or combination that matches the panelboard (e.g. for the **JF406B/G** board, you can select a **JF12504SM** side mounted meter enclosure that can house 4 **ECM01** panel mounted meters). When using both side and top/bottom meter enclosures, corner filler enclosures are available.
- For help choosing your metering solution see the Method Chart on page 1.58.
- Please contact us for any non-standard requirements or assembly.
- For dimensions see page 1.60.

### Fuse Combination Switches 20 - 800A

#### Characteristics

- Provides individual protection and control of circuits.
- Enclosures up to 100A have been designed to provide adequate cabling space without the need for additional cable spreader boxes.
- Operation of the device is through a door mounted rotary handle which is mechanically interlocked to prevent access to live conductors when the switch is in the on position. The handle is padlockable in the off position.
- All versions will accept standard BS 88 fuse links and can be converted to switch disconnector by fitting copper links.

#### Utilisation category

- AC22B - 630 - 800A
- AC23A - 20 - 630A

#### Product features

- Conforms to: BS EN 60947-3
- Rated IP31.

**Note:** Maximum rated fuse links are fitted in all fuse combination switches.

**Note:** Copper links for conversion to isolating switches

- For dimensions see page 1.67.

- For technical information see page 1.69.

### Switch Disconnectors 20-800A

#### Characteristics

- Designed to provide individual isolation of circuits up to 800A.
- Provides adequate cabling space without the need for additional cable spreader boxes.
- Operation of the device is through a door mounted rotary handle which is mechanically interlocked to prevent access to live conductors when the switch is in the on position. The handle is padlockable in the off position.

#### Utilisation category

- AC-21, AC-22 (page 1.71)

#### Product features

- Conforms to: BS EN 60947-3
- IP rating: IP31.
- For technical information see page 1.67 - 1.71.

### IP65 Switch Disconnectors

- A range of enclosed switch disconnectors to IP65 for individual isolation.
- The devices are padlockable in three positions and offer plenty of cabling space. Clip on auxiliary contacts can be fitted retrospectively.

**Product features**

- Conforms to: BS EN 60947-3.
- IP65 to BS EN 60529.

**Range:** TPN 10, 16, 25, 40, 63 & 80A.

**Utilisation category**

- AC- 21.
- AC- 22.
- For technical information see page 1.70.

### IP65 Switch Disconnectors - DC

- Used in applications such as photovoltaic installations where they isolate the incoming side of the inverter.
- They are supplied in grey with a black handle so that it is easy to distinguish them from the yellow/red a.c. switches used on the outgoing side of the inverter.

**Product Features**

- Conforms to: BS EN 60947-3 IP65 to BS EN 60529.
- An interlock ensures that the cover cannot be removed in both the ON and PADLOCKED OFF positions.

## Enclosed MCCBs

- The devices are mounted in IP31 enclosures, with removable cable entry plates located on the top and bottom.
- Single & triple pole devices are equipped with fully rated neutral links.

### Non-Auto MCCB

- Triple pole: 125A - 250A - 400A - 630A.
- Four pole: 125A - 250A - 400A - 630A.

### Specification

- Conforms to BS EN 61439-2.

### Cable Capacity

- 63 - 125A: Flexible cable: min 6mm<sup>2</sup>, max 70mm<sup>2</sup>, Rigid cable: min 6mm<sup>2</sup>, max 95mm<sup>2</sup>.
- RCD add-on adjustable from 0.03A, 0.1A, 0.3A, 1A, 3A, 6A.
- Time delay - Instantaneous, 60ms, 150ms, 300ms, 500ms, 1s.
- For technical details and dimensions see page 1.73.

### MCBs 10kA

#### Characteristics

- Provides protection against short circuits, protection against overload current, control, isolation, trip free mechanism.

#### Isolation

- The state of isolation is clearly indicated by the "OFF" mechanical position on the toggle with the green colour.
- Connection capacity: 25mm<sup>2</sup> flexible conductor, 35mm<sup>2</sup> rigid conductor.
- Conforms to: BS EN 60898-2 (10kA), BS EN 60947-2 (15kA).

### RCCB Add-On Blocks for MCB Devices

#### Characteristics

- Provide earth fault protection when associated with the 10kA (types **NBN, NCN, NDN**) range of MCBs.
- Designed to be fitted to the right hand side of 2 and 4 pole MCBs and the completed unit provides protection against overload, short circuit & earth faults.
- Protection against nuisance tripping.
- All devices have a test facility.
- Note: Not for use in fixed busbar distribution boards.

#### Technical Data

- Nominal voltage 230 - 400V.
- Selective (time delay) versions are available in 100mA & 300mA.
- Connection Capacity: 16mm<sup>2</sup> Flexible, 25mm<sup>2</sup> Rigid.
- Conforms to BS EN 61009 Appendix G

### One Module Add-On Blocks for MCB Devices

#### Characteristics

- Compatible with **NBN, NCN & NDN** range of MCB devices.
- Can be used in combination with any Hager 3 pole 10kA MCB up to 63A. Requires the use of the adjacent outgoing way.
- Type A RCD provides added protection against 'pulsating d.c. current'
- 3 Phase earth leakage protection up to 63A.
- One module add-on block + MCB combinations suit all Hager distribution boards.
- BS EN 61009-1 Appendix G.
- For technical details see page 1.86.

### MCBs 80 - 125A

- Suitable for isolation (according to BS EN 60947-2). The isolation of the circuit breakers is indicated by a green indicator on the toggle.

#### Standards

- 10 kA: BS EN 60898-1, 10 kA BS EN 60947-2
- 15 kA: BS EN 60898-1, 15 kA BS EN 60947-2
- $I_n$  80 to 125A

#### Connection Capacity

- 35mm<sup>2</sup> flexible (50mm<sup>2</sup> possible with some cable pin lugs).
- 70mm<sup>2</sup> rigid.

#### Nominal Voltage

- 230/415 V a.c.
- Calibration setting: 30 °C
- (BS EN 60898-1)
- Insulation voltage: 500 V

#### Lockable Toggle

- MCB can be locked in "Off" position by the integrated locking facility on the toggle.
- This lock allows the insertion of a 2.5-3.5mm plastic cable tie where you can fit a warning card if necessary, allowing a safer working environment.
- Compatible with RCD Add-On Blocks.

**RCCB Add-On Blocks Type a.c. for HMF, HMC, HMD MCBs (Not suitable for Hybrid DBs)**

**Fixed**

- High sensitivity 30 mA instantaneous, low sensitivity 300 mA instantaneous

**Adjustable**

- Sensitivity  $I_{\Delta n}$  0.3-0.5 - 1A
- Delay  $\Delta t$  0 - 60 - 150 ms

**Adjustable Blocks**

- The setting is done by actuating dial on the front face. The setting dials are protected by a transparent sealable cover.

**Disassembly**

- The bistable latch (two positions) facilitate the assembly or disassembly by the bottom of the add-on block.
- These RCD add-on blocks exist in version AC.
- The earth fault is indicated when the handle is in the lower position (yellow colour). Test button for earth fault check.

**Connection Capacity**

- 35mm<sup>2</sup> flexible connection
- 70mm<sup>2</sup> rigid connection.

**Nominal voltage**

- 2 pole 230V, three & four pole: 230 / 400V
- Test button: 230 / 400V.
- Conforms with BS EN 61009-1 appendix G.
- Conforms with BS EN 60947-2.

### RCBOs - Single Pole - 10kA B & C Curve Type A

#### Characteristics

- Compact protection devices which combine the overcurrent functions of an MCB with the earth fault functions of an RCCB in a single unit.
- These devices are single pole & solid neutral.
- Locking kit = Cat ref.: **MZN175**.

#### Technical Data

- Conforms to IEC 61009-1, IEC 61009-2-2, EN 61009-1.

#### Sensitivities (fixed)

- 10mA, 30mA & 100mA.
- Flying neutral lead: 700mm.
- Terminal Capacities, 25mm<sup>2</sup> rigid, 16mm<sup>2</sup> flexible.

#### Operating Voltage

- 230V a.c.

**RCBOs - Single Pole & Switched Neutral - 4.5kA C Curve**

**Characteristics**

- Compact protection devices which provide MCB overcurrent protection and RCCB earth fault protection in a single unit.
- The device switches both the line and neutral conductors. All ratings have 30mA earth fault protection. The units feature indicators which show whether a trip is due to an overcurrent or earth fault.

**Technical Data**

- Breaking capacity: 4.5kA.
- Conforms to EN 61009-1.
- Operating Voltage: 230V a.c. -15% +10% 50Hz.
- Mechanical life: 20,000 operations.
- Connection Capacity: Rigid conductor 25mm<sup>2</sup>, Flexible conductor 16mm<sup>2</sup>
- **Note:** Not for use in fixed busbar consumer units or distribution boards.

### 2 & 4 Pole RCCBs

#### Characteristics

- To open a circuit automatically in the event an earth fault between line and earth, and/or neutral and earth.

#### Technical Data

- Conforms to BS EN 61008, IEC1008

- Terminal capacities: 16-63A Rigid 25mm<sup>2</sup>, Flexible 16mm<sup>2</sup> / 80 & 100A Rigid 50mm<sup>2</sup>, Flexible 35mm<sup>2</sup>

#### Features

- Positive contact indication is provided by the rectangular flag indicator

- Red = Closed

- Green = Open

- Indication of trip is provided by the oval flag indicator

- Yellow = Tripped

- All RCCBs have trip free mechanisms and can be padlocked either on or off with the use of a **MZN175**.

#### Operating Voltage

- 2P 127- 230V a.c.

Description	Cat ref.
IP65 External Emergency Stop Button	<b>MZ530N</b>

### HRC Fuse Carriers (supplied without cartridge fuse)

#### Characteristics

- Protection and control of circuits against overloads and short-circuits.
- Suitable for fuses which comply with BS HD 60269-1 and with the standardised performance requirements for industrial fuse links specified in BS HD 60269-2 (formerly BS 88-2).

#### Technical Data

- Rating voltage: 415 V a.c., 250 V d.c.
- Rated breaking capacities: 80 kA at 415 V a.c., 40 kA at 250 V d.c.
- The LS201 HRC fuse carrier is suitable for the following type of BS 88-2 cartridge fuses:
  - 2A – 8A: with nickel-plated or silver plated caps.
  - 10A – 32A: with silver plated caps only.

### HRC Fuse Carriers (supplied with cartridge fuse)

#### Characteristics

- Protection and control of circuits against overloads and short-circuits.

#### Technical Data

- Suitable for fuses which fully comply with BS 88-3 (Formerly BS1361).
- Short-circuit rating: 16.5kA
- Connection Capacity: Top: 16 mm<sup>2</sup> flexible cable & busbar.

### Surge Protection

#### Characteristics

- SPD's protect electrical and electronic equipment against transients, originating from lightning, switching of transformers, lighting and motors. These transient voltages can cause premature ageing of equipment, downtime, or complete destruction of electronic components and materials. SPDs are strongly recommended on installations that are exposed to transient voltages, to protect sensitive and expensive electrical equipment such as TV, video, Hi-Fi, PC, alarm etc.
- The range of SPDs is separated into three types of protection:
  1. Main protection - class 1  
SPDs with higher discharge current ( $I_{max}$  10/350), to evacuate as much of the transient over-voltages associated with lightning strikes
  2. Main protection - class 2  
With a discharge current ( $I_{max}$  8/20), to evacuate as much of the transient over-voltage to earth as possible protection level ( $U_p \leq 1200V$ ).
  3. Main protection - class 3  
To cut-down the transient surge as low as possible to protect very sensitive equipment.

#### Technical Data

- Conforms to IEC61643-1.
- R Versions: reserve status indicator, signalling.
- D Versions: end of life indicator, auxiliary contact for remote indication.
- Connection Capacity (terminal blocks L, N & E): Rigid conductor: 10mm<sup>2</sup>, Flexible conductor: 6mm<sup>2</sup>.
- 230V a.c. 1A.
- 12V...10mA.

#### Installation and Connection

- The main protection SPDs are installed directly after the main incoming switch or RCCB
- SPDs are suitable for any supply system e.g TNCS, TNS, TT.
- Connected in parallel to the equipment to be protected.
- Protection is assured in both common and differential modes.

#### SPDs with Low Let Through Voltage Levels Type 3

- To protect very sensitive electronic equipment. This fine protection complements the main protection and can protect one or many electronic devices.
- Optimal coordination is obtained when cascaded with a main protection device.
- A green LED on the front face indicates the status of the **SP202N**, connected in series with the equipment that needs to be protected (with a maximum line current of 25A). Protection is assured in both common and differential modes.

#### Replacement Cartridges

- Allow simple replacement without the need to cut-off the power supply.
- Cartridges are available for all discharge currents (40kA and 15kA) with and without condition indication.
- A keying system exists to prevent a line cartridge being interchanged by mistake with a neutral one and visa versa. Neutral cartridges have a discharge current of 65kA.
- For technical details see page 1.89

## Earth Fault Relays

### Characteristics

- Provides monitoring of earth fault currents. When the fault current rises above the selected level, the output contacts of the product operate.
- Depending on the relay selected, it can have either fixed or adjustable sensitivity. A time delay is also available for selectivity purposes. The relays are linked with detection torroids, available in circular and rectangular variants.
- Positive safety: the relay trips in the event of a break in the relay/torroid link.
- Positive reset required after a fault is detected.
- Test button for simulation of a fault.
- Protected against nuisance tripping from transients.
- Conforms to BS EN 61008.

### Technical Data

- Type A RCD protection.
- Output: 1 C/O contact, 250V a.c. 5/6A AC1.
- Visual display of fault by red LED.

### Specific device features of HR525 & HR534.

- Display of fault current before it triggers the relay (5% to 75%).
- Extra output contact (250V 0.1A max.) to enable remote indication if fault currents over 50% of  $I_{\Delta n}$ .
- Remote test and reset (opto-coupled).

### Connection capacity

- Relay - 1.5 to 6mm<sup>2</sup>
- Relay - torroid link: 2 wires, 25m max.
- Test and remote reset link: 3 wires, 20m max.
- For enclosure selection, please consult us.

**Moulded Case Circuit Breakers x160 18kA**

**Characteristics**

- Thermal magnetic trip unit, two versions: Z version: fixed thermal and fixed magnetic. U version: adjustable thermal and fixed magnetic.
- Access to mechanical test button on cover.
- Lockable cover protects MCCB settings.
- Integrated padlocking handle: Ø 4mm.
- Connection capacity: 95mm<sup>2</sup> rigid cables, 70mm<sup>2</sup> flexible cables.
- Cage terminals
- Conforms to BS EN 60947-2.
- Fixed thermal: 1 x I<sub>n</sub>
- Adjustable thermal: 0.63 - 0.8 - 1 x I<sub>n</sub>
- For technical details see table on page 1.96.

### Accessories for x160 Devices

#### Indication contacts

- 1 changeover switch (ON/OFF): indicates the position of the MCCB "open" or "close".
- 1 changeover alarm contact: indicates MCCB tripped.

#### Coil connection

- Connection capacity: 0.75 mm<sup>2</sup> flexible or rigid cables
- The cable capacity of the terminals is 0.5 to 1.25mm<sup>2</sup>.

#### Shunt trip

- Remote tripping of MCCBs
- Operating voltage: 0.7 to 1.1 x U<sub>N</sub>

#### Under voltage release

- Enables tripping of MCCBs or moulded case switches when voltage level drop between 35 and 70% of U<sub>N</sub>. Pick up voltage 0.85 x U<sub>N</sub>.
- Padlockable direct rotary handle is equipped with front cover and handle, fixing without additional screws.

### Add-On Blocks for x160 Devices

#### Characteristics

- These devices are intended to be fixed on the right side of the devices.
- Type A RCD protection for protection against pulsating d.c.
- High Immunity reduces unexpected tripping (generated by micro-processing, electronic ballast etc.).
- Fixed version: 300 mA sensitivity and instantaneous tripping, adjustable version: adjustable sensitivity and time delay.
- Test button for electrical functioning check.
- LED fault indication and auxiliary output for remote indication - (25-50% I<sub>ΔN</sub>).
- Assembly and disassembly facilitated by the drawer assembly system.
- Connection capacity: 95 mm<sup>2</sup> rigid cables, 70 mm<sup>2</sup> flexible cables.
- Sensitivity I<sub>ΔN</sub>, adjustable: 0.03 - 0.1 - 0.3 - 1 - 3 - 6A
- Adjustable tripping: instantaneous or time delay: 0.06 - 0.15 - 0.3, 0.5 - 1s
- Conforms to BS EN 60947-2.

### Moulded Case Circuit Breakers x250 25kA

#### Characteristics

- Thermal magnetic trip unit, two versions: Z version: fixed thermal and fixed magnetic. H version: adjustable thermal magnetic.
- Access to mechanical test button on cover.
- Lockable cover protects MCCB settings.
- Integrated padlocking handle: Ø 4mm.
- Connection capacity: 150mm<sup>2</sup> rigid cables, palm lug max. width: 25mm
- Conforms to BS EN 60947-2
- AC 22/23A.
- For technical data see page 1.106.

#### x250 25kA

- Fixed thermal:  $1 \times I_n$
- Fixed magnetic:  $> 10 \times I_n$

#### x250 40kA

- Adjustable thermal: 0.63, 0.8,  $1 \times I_n$
- Adjustable magnetic: 6 - 8 - 10 -  $13 \times I_n$  (100 - 200A). 5 - 7 - 9 -  $11 \times I_n$  (250A).

### Accessories for x250 Devices

#### Indication contacts

- 1 changeover switch (ON/OFF): indicates the position of the MCCB "open" or "close".
- 1 changeover alarm contact: indicates MCCB tripped.

#### Coil connection

- Connection capacity: 0.75 mm<sup>2</sup> flexible or rigid cables
- The cable capacity of the terminals is 0.5 to 1.25mm<sup>2</sup>.

#### Shunt trip

- Remote tripping of MCCBs
- Operating voltage: 0.7 to 1.1 x U<sub>n</sub>

#### Under voltage release

- Enables tripping of MCCBs or moulded case switches when voltage level drop between 35 and 70% of U<sub>n</sub>. Pick up voltage 0.85 x U<sub>n</sub>
- Padlockable direct rotary handle is equipped with front cover and handle, fixing without additional screws.

- 96 x 96mm Flush mounting
- Single phase or 3 phase (4 wire) network balanced or unbalanced load
- Built in energy pulsed output or with pulsed output and RS485 (modbus)
- Backlit LCD display with bargraph current indication on every page
- Automatic or manual scrolling display
- 330mV current transformer input
- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- Programmable VT ratio
- 3-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage
- THD up to 31<sup>st</sup> harmonic for voltage and current
- Self supplied auxiliary
- Programmable CT ratio 5 to 10,000A
- Frequency 45/65Hz
- Wide range of measured parameters (see table below)
- Selectable CT phase correction allows reversal of L1 and L3
- Weight 230g

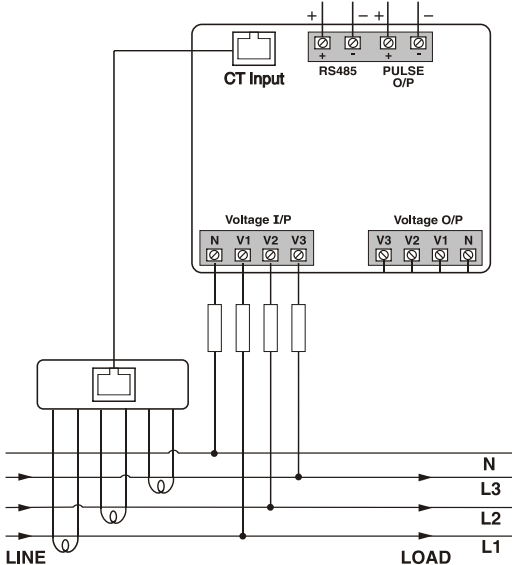

### Function Diagram

**Dimension Diagrams (mm)**

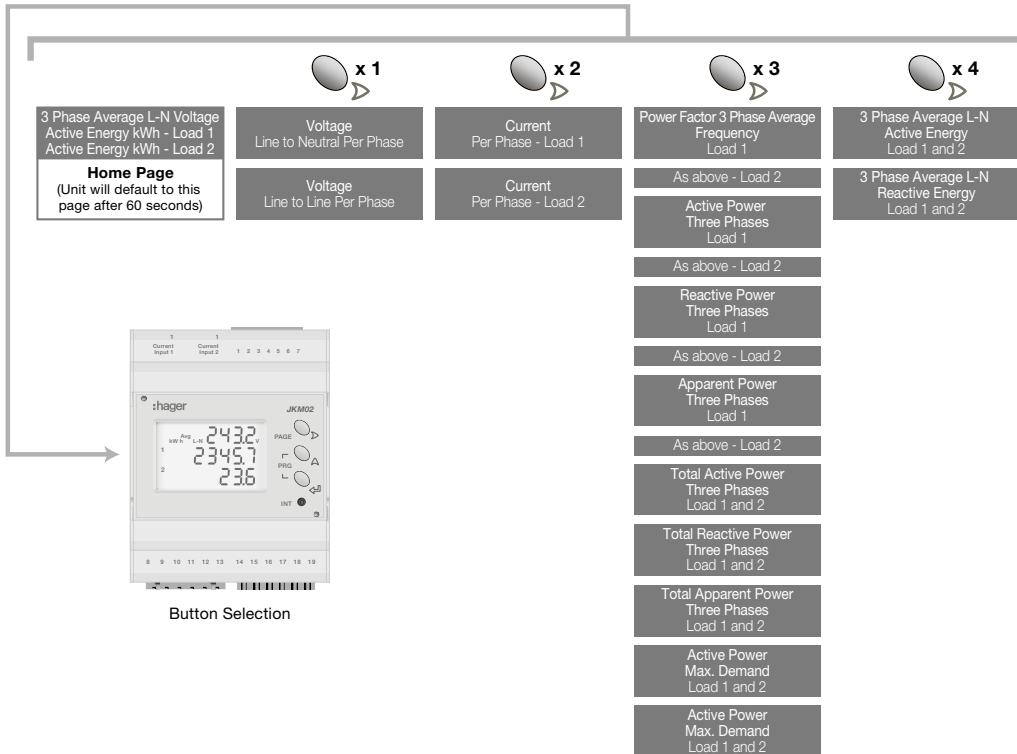

Please allow space above and below the meter for cable connections.

- Split Load, Dual CT input meter
- 4 Module DIN rail mounting
- Single phase or 3 phase (4 wire) network balanced or unbalanced load
- Built-in dual energy pulse output, one for each load and RS485 MODBUS communication
- Wide range of measured parameters (see table below)
- High quality backlit LCD display
- 330mV current transformer input
- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- THD up to 31st harmonic for voltage and current
- 3-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage
- Self supplied auxiliary
- Programmable CT ratio 5...10,000A per load
- Programmable VT ratio
- Frequency 45/65Hz
- Selectable CT phase correction allows reversal of L1 and L3
- Weight 200g

### Function Diagram

### Dimension Diagrams (mm)

Please allow space above and below the meter for cable connections.

- Connect up to three standard or split core CT's (1A or 5A secondaries)
- Integrated protection circuitry

**Standard CT to plug-in Adaptor**

The **JFA03** converter allows for the connection of up to three standard current transformers, or standard split-core current transformers (with 1A or 5A secondary's), to the plug-in system.

The unit has integrated protection circuitry allowing for disconnection from meter under load conditions for maintenance.

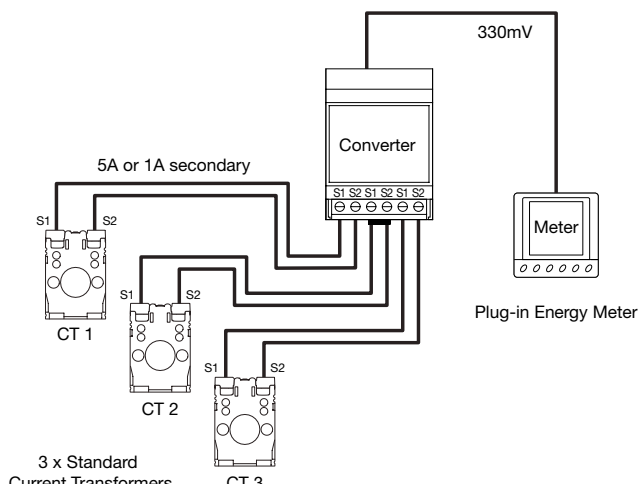

**Important Note**

This converter does not provide electrical isolation. Current transformer secondaries may not be earthed and should be wired as shown.

**Technical Specification**

<b>Burden:</b>	<2VA per channel (5A Version) <0.5VA per channel (1A Version)
<b>Accuracy:</b>	0.4%
<b>Suggested Cable Size: (CT to Adaptor)</b>	1.5mm <sup>2</sup> or 2.5mm <sup>2</sup> (2.5mm <sup>2</sup> Max.)
<b>Mounting:</b>	DIN rail 35mm
<b>Termination:</b>	CT to adaptor - Rising clamp screw terminals Adaptor to Meter - RJ45 Patch Cable
<b>Operating Temperature:</b>	-10°C...+45°C
<b>Storage Temperature:</b>	-25°C...+70°C

Commercial  
Distribution

**Dimension Diagrams (mm)**

### Description

Designed for use with Hager x160 MCCBs and the plug-in multifunction power meters.

Internal safety circuitry is provided which limits the output voltage to a safe level, allowing the transformer secondary to be left disconnected under load.

### Installation

The CT uses plug-in technology allowing much faster installation, saving you time and money. Additionally, all our three phase current transformers have been designed with hole centres and apertures to fit most standard industrial circuit breakers.

**CT Output and RJ45 Lead Tester**

This device makes it possible to test the RJ45 patch lead used to connect the current transformer to the meter. It also enables a standard electricians multimeter to measure the individual secondary outputs of the current transformer. To test the RJ45 patch lead, simply disconnect the lead from the meter and current transformer. Plug one end into socket 1 and the other end into socket 2 on the test box. Press the test button - the Green LED will light to indicate the lead is OK or the Red LED will light to indicate a faulty lead. When the lead is proven to be OK you can then check the individual secondary outputs of the current transformer. To measure the secondary output plug one end of the RJ45 patch lead into the current transformer and the other end into socket 2 on the test box. You can now use a standard multimeter to test the secondaries using the test points on the front of the test box. The output measured for each phase should be between 0 and 330mV a.c.  
 Model Reference: **JFT03**

**3 Phase CT Splitter Box**

This 3 Phase CT Splitter Box allows the separate monitoring of each phase of a three phase current transformer on individual energy meters.  
 Model Reference: **JFS03**

Commercial Distribution

**Meter Voltage Supply Cable**

Our high quality Meter Voltage Supply Cables are fitted with a plug at one end and insulated bootlace ferrules at the other and provide power to the plug-in meter from your mains supply.

**Meter to Meter Supply Cable**

Our high quality Meter to Meter Voltage Supply Cables are fitted with a plug at one end and socket at the other. This allows multiple plug-in meters to be energised from a common supply. Up to 32 meters can be powered in a 'daisy chain' arrangement using this method.

**RJ45 Connection Cable**

The high quality low loss Category 5e RJ45 Connection Cable provides secondary connection between the plug-in current transformer and meter.

Two type of cable material are available:- LSZH (Low Smoke Zero Halogen).

### Fuse Combination Switches

### Fuse - Combination Units - BS EN 60947-3

Many people are attracted to fuse-combination units by their simplicity in application and their reliability in operation. They are particularly useful for use on very high prospective fault level systems where the high energy limiting characteristic of the HRC fuse can be effectively utilised. In the past fuse-combination units came in two forms:

**Switch Fuse**  A switch in which one or more poles have a fuse in series.

**Fuse Switch**  A switch in which one or more poles have a fuse carrier/link which forms the moving contact.

The definitions of these two basic types of fuse combination units have now been extended to include units suitable for making, breaking and isolation and units which are only suitable for providing isolation for maintenance work.

Definition	Symbol	Function
Switch Fuse		Making and breaking current
Disconnecter Fuse		Isolating
Switch Disconnecter Fuse		Making, breaking and isolating
Fuse Switch		Making and breaking current
Fuse Disconnecter		Isolating
Fuse Switch Disconnecter		Making, breaking and isolating

However, in order to keep the selection of fuse-combination units as simple as possible, Hager offer a range of high performance double break switch-fuses, which also satisfy the isolating requirement of the British standard. These are correctly shown as and defined as a Fuse Combination Switch.

**Switch disconnectors - BS EN 60947-3.** A range of switch disconnectors (isolators) are available for use on lower current ratings from 20A to 125A. These switches are rated at AC-22 and provide a cost effective alternative to the fuse combination switch, especially where the utilisation category AC-23 is not required. ie; mixed resistive and inductive loads.

### Utilisation categories

Utilisation categories are not new but they are important because they help the designer or specifier identify the correct unit for a particular application.

The designation of the utilisation category is made up of three parts:

1. The prefix AC or DC, which indicates the nature of the current.
2. The two digit number, which indicates the type of application the unit is suitable for:
  - 20 Connecting and disconnecting under no-load.
  - 21 Switching of resistive loads.
  - 22 Switching of mixed resistive and inductive loads.
  - 23 Switching of highly inductive loads.
3. The suffix A or B, which indicates whether the unit is suitable for frequent or infrequent operation.
  - A Frequent operation
  - B Infrequent operation.

For example a fuse-combination unit feeding a 400V AC circuit of mixed resistive and inductive loads which would need to be operated frequently would require a minimum utilisation category of AC-22A.

If the load was highly inductive, i.e. motor loads, then the minimum utilisation category would be AC-23A.

Generally, category AC-23 does not cover the switching of capacitors. Usually this is the subject of agreement between manufacturer and user.

### Motor Power Circuit Protection

Fuse-combination units can be used very effectively for motor power circuit protection, the energy limiting HRC fuse offering very good protection to its associated starter. Category AC-23A should be specified for this duty. Special motor circuit protection fuse links are available which eliminate the need to fit a larger bodied fuse just to take care of the starting current of the motor.

The protection of motor power circuits should not be confused with the direct switching of a single motor. If a fuse-combination unit is required to perform this function then it must comply with the requirements of Appendix A of BS EN 60947-3 which makes provision for different utilisation categories for this application.

### Switch Fuses

The IP rating for all low voltage enclosures up to 1000 V a.c. and 1500 V d.c. is defined in identical fashion by the standards EN 60529 - IEC 529. It comprises the letters IP followed by two character numerals and or additional/ supplementary letters.

**The first character numeral** indicates the degree of protection provided by the enclosure against access to hazardous parts by preventing or limiting the ingress of a part of the human body or an object held by a person and ingress of solid foreign objects.

**The first character numeral:**  
Protection against foreign objects

IP	Description	
0		Non-protected
1		Protected against solid objects $\geq$ than 50mm
2		Protected against solid objects $\geq$ than 12.5mm
3		Protected against solid objects $\geq$ than 2.5mm
4		Protected against solid objects $\geq$ than 1.0mm
5		Dust-protected
6		Dust-tight

**Additional letter (optional)**  
Protection of people against access to hazardous parts

	Description
A	Protected against access to hazardous parts with the back of the hand
B	Protected against access to hazardous parts with a finger
C	Protected against access to hazardous parts with a tool - $\phi$ 2.5mm
D	Protected against access to hazardous parts with a tool - $\phi$ 1mm

**The second character numeral** indicates the degree of protection provided by the enclosure with respect to harmful effects on the equipment due to the ingress of water. An X signifies that the tests are not applicable to the product.

**The second character numeral:**  
Protection against ingress of water with harmful effects

IP	Description	
0		Non-protected
1		Protected against dripping water
2		Protected against dripping water when tilted up to 15°
3		Protected against spraying water
4		Protected against splashing water
5		Protected against jetting
6		Protected against powerful jetting
7		Protected against the effect of temporary immersion
8		Protected against continuous immersion

**Additional letter (optional)**

Connection of Auxiliaries	No		Yes					

**Table 1**

\*Din rail mount only, not for use in fixed busbar distribution boards.

### Power Loss

The power loss of MCB's is closely controlled by the standards and is calculated on the basis of the voltage drop across the main terminals measured at rated current. The power loss of our circuit breakers is very much lower than that required by the British Standard, so in consequences run cooler and are less affected when mounted together.

The table below gives the watts loss per pole at rated current.

MCB Rated current (A)	0.5	1	2	3	4	6	10	13	16	20	25	32	40	50	63
Watts loss per pole	1.2	1.3	1.5	2.0	1.8	1.4	1.9	2.1	2.5	2.8	3.2	3.8	4.0	4.5	5.1

### For use with DC

Because of their quick make and break design and excellent arc quenching capabilities, our circuit breakers are suitable for DC applications.

The following parameters must be considered:

1. System voltage:  
Determined by the number of poles connected in series (see **Table 14**).

2. Short circuit current:  
(See **Table 14**).

3. Tripping Characteristics:  
If the thermal trip remains unchanged the magnetic trip will become less sensitive requiring derating by  $\sqrt{2}$  the ac value (See **Table 14**).

No. of poles	1 pole		2 poles in series	
Range	max voltage	breaking capacity L/R=15ms	Max voltage	breaking capacity L/R=15ms
MTN	60V	6kA	125V	6kA
NBC NCN NDN	60V	10kA	125V	10kA

**Table 13**

Characteristic curve	B		C		D	
	50Hz	dc	50Hz	dc	50Hz	dc

**Table 14**

### Connection

The circuit breaker can have the line/load connected to either the top or bottom terminals

### Temperature Derating

MCBs are designed and calibrated to carry their rated current and to operate within their designated thermal time/current zone at 30°C. Testing is carried out with the breaker mounted singly in a vertical plane in a controlled environment. Therefore if the circuit breaker is required to operate in conditions which differ from the reference conditions, certain factors have to be applied to the standard data.

I <sub>n</sub> (A)	-25°C	-20°C	-15°C	-10°C	-5°C	0°C	5°C	10°C	15°C	20°C	25°C	30°C	35°C	40°C	45°C	50°C	55°C	60°C

Commercial Distribution

### Diversity Factor - Commercial Distribution boards to BS EN 61439-3

Consideration should be given to the proximity heating effect of the breakers when fully loaded and mounted together in groups.

Adjacent circuit breakers having a load 'on' time exceeding 30 minutes or where the load not exceeding 30 minutes has an 'off' time less than the 'on' time, will need to have the rated diversity factor applied.

No. of Outgoing Circuits	Assumed Loading Factor
2 and 3	0.8
4 and 5	0.7
6 to 9 inclusive	0.6
10 and above	0.5

### Frequency

Circuit breakers are designed to operate at a frequency of 50-60Hz. Should the supply differ from this then the following factors should be applied

Thermal – unchanged

Magnetic – value multiplied by coefficient K

F (Hz)	17Hz - 60Hz	100Hz	200Hz	400Hz
K	1	1.1	1.2	1.5

Consideration should be given to the proximity heating effect of the breakers when fully loaded and mounted together in groups. (continuously & simultaneously loaded).

### B Curve (BS EN 60898)

MCBs: MTN rated 6 - 63A  
NBN rated 6 - 63A

Commercial  
Distribution

### C Curve (BS EN 60898)

MCBs: NCN rated 0.5 - 63A  
MLN rated 2 - 32A  
HMF/HMC rated 80 - 125A

### D Curve (BS EN 60898)

MCBs: NDN rated 6 - 63A  
HMD rated 80 - 125A

Commercial Distribution

**C Curve**

**D Curve**

### Functions

Tripping and indication auxiliary contacts are common to the range of multi-pole 10kA MCBs, and RCCBs. They should be mounted on the left hand side of the device.

#### Auxiliary Contact MZ201 (Fig 9)

Allows remote indication of the status of the device contacts to which it is associated.

#### Auxiliary Contact and Alarm Contact MZ202

This accessory has two separate functions. Like the MZ201 auxiliary contact, however the alarm contact will provide indication if the breaker trips under fault conditions.

#### Wiring Diagram

MZ201 Auxiliary Contact and Alarm Contact

Fig. 9

#### Electrical Characteristics

MZ201/MZ206	MZ203	MZ206
1 x O 1 x C Contact 230V ~ 6A AC-1		
	230 - 415 ~ 110 - 130...	230V ~ 50Hz

#### Grouping / Combination of Several Auxiliaries

On 2, 3 and 4 pole MCBs it is possible to associate 3 auxiliaries – 2 indication auxiliaries and 1 release auxiliary. In this case, it is important to first fix the indication auxiliary (MZ201 and MZ202) and then the release auxiliary (MZ203 and MZ206).

Fig. 11

#### MZ203 Shunt Trip\*

Allows tripping of the device by feeding the coil. The contacts also allow for remote indication of operation.

#### MZ206 Under Voltage Release\* (Fig 10)

Allows the MCB to trip when the voltage drops or by pressing a remote off switch (i.e. emergency stop).

\* Indication that the product has tripped due to the voltage release is provided by a flag on the product.

#### MZ206 Under Voltage Release

Fig. 10

#### Electrical connection

By terminal fitted with fixed clamp screws wiring capacity.

Flexible : 2 x 1.5mm<sup>2</sup>

Rigid : 2 x 1.5mm<sup>2</sup>

#### MZ203

Power - 8VA

tolerance : -15% of U<sub>n</sub>

#### MZ206

Latching voltage is between 35 and 70% of U<sub>n</sub> 230V~

Coil consumption 3VA

### Residual Current Devices

A residual current device (RCD) is the generic term for a device which simultaneously performs the functions of detection of the residual current, comparison of this value with the rated residual operating value and opening the protected circuit when the residual current exceeds this value. These devices can take several different forms i.e. Residual Current Circuit Breaker (RCCB), Residual Current Circuit Breaker with integral Overload protection (RCBO), or a residual current device incorporated within a socket outlet or other accessory (SRCD)

Residual current circuit breakers (RCCB) protect against earth faults only and not short circuits. They are usually therefore used in conjunction with overcurrent protective devices.

## Transformer Protection

Tables 19 & 20 show the recommended MCB's for the protection of single phase (230V) and three phase (400V) transformers.

### Single Phase 230V

Transformer Rating (VA)	Primary Current	Recommended MCB		
		NBN	NCN	NDN
50	0.22	-	1	6
100	0.43	-	2	6
200	0.87	-	3	6
250	1.09	6	4	6
300	1.30	10	4	6
400	1.74	10	6	6
500	2.17	16	10	6
750	3.26	16	10	6
1000	4.35	25	16	10
2500	10.87	63	40	20
5000	21.74	-	63	32
7500	32.60	-	-	50
10000	43.48	-	-	63

### Three Phase 400V

Transformer Rating (VA)	Primary Current	Recommended MCB		
		NBN	NCN	NDN
500	0.72	-	3	6
750	1.08	6	4	6
1000	1.44	10	6	6
2000	2.88	16	10	6
3000	4.33	25	16	10
4000	5.77	32	20	10
5000	7.21	40	25	16
7500	10.82	63	32	20
10000	14.43	-	50	25
15000	21.64	-	63	32
20000	28.86	-	-	50
25000	36.07	-	-	63

## Motor Circuit Protection

Tables 28,29,30 and 31 give general recommendations for the selection of circuit breakers and HRC fuses for the protection of motor power circuits and are based on the assumptions shown in Table 28 for a cage motor running at approximately 1400 Rev/Min.

Motor Rating	DOL Starting Conditions	Assisted Start Conditions
Up to 0.75kW	5 x FLC for 6 secs	2.5 x FLC for 15 secs
1.1 to 7.5kW	6 x FLC for 10 secs	2.5 x FLC for 15 secs
11 to 75kW	7 x FLC for 10 secs	2.5 x FLC for 15 secs
90 to 160kW	6 x FLC for 15 secs	2.5 x FLC for 20 secs

Approval marking		KEMA	

		SPN215D/R	SPN415D/R	SPN440D/R
Tested to		EN 61643-11 (VDE0675-6-11) 2002-12		
SPD type		Type 2 according to EN 61643-11		
SPD class		Class II according to IEC 61643-1		
Type of connection		Parallel connection		
Maximum continuous operating voltage $U_c$	Line / Neutral	$\leq 255V$		
	Neutral/ PE	$\leq 275V$		
Voltage protection level	$U_p$	$\leq 1kV$	$\leq 1kV$	$\leq 1.2kV$
Nominal discharge current (8/20 $\mu s$ ) [(DC+/DC-) --> PE]	$I_n$	5kA	5kA	15kA
Max. discharge current (8/20 $\mu s$ ) [(DC+/DC-) --> PE]	$I_{max}$	15kA	15kA	40kA
Short-circuit withstand capability with max. overcurrent protection		10kA - 32A	10kA - 32A	20kA - 32A
Operating temperature range		- 40°C ....+ 80°C		
Indication of SPD disconnecter		Green - Yellow - Red		
Cross sectional area	min	1,5mm <sup>2</sup> solid / flexible		
	max	35mm <sup>2</sup> multi-stranded / 25mm <sup>2</sup> flexible		
Tightening torque for terminals		4.0 Nm		
Mounting on		35mm DIN rail in accordance with EN 60715		
Enclosure material		grey thermoplastic, UL 94V-0		
Degree of protection		IP20		
Modular width (DIN 43880)		2	2	4
Auxiliary contact. Voltage/ nominal current (only applicable on the R suffix products)		230V/ 0.5A 12Vdc 10mA		

		SPV325
Tested to		EN 61643-11 (VDE0675-6-11) 2002-12
SPD type		Type 2 according to EN 61643-11
SPD class		Class II according to IEC 61643-1
Type of connection		Parallel connection
Maximum continuous operating voltage	$U_{cPV}$	$\leq 1000V$
Voltage protection level	$U_p$	$\leq 4kV$
Voltage protection level for 5kA	$U_p$	$\leq 3,5kV$
Total discharge current (8/20 $\mu s$ )	$I_{total}$	40kA
Nominal discharge current (8/20 $\mu s$ ) [(DC+/DC-) --> PE]	$I_n$	12.5kA
Max. discharge current (8/20 $\mu s$ ) [(DC+/DC-) --> PE]	$I_{max}$	25kA
Short-circuit withstand capability with max. overcurrent protection	$I_{scwPV}$	50 A / 1000 V DC
Response time	$t_A$	$\leq 25ns$
Operating temperature range		- 40°C ....+ 80°C
Indication of SPD disconnecter		green - red
Cross sectional area	min	1.5mm <sup>2</sup> solid / flexible
	max	35mm <sup>2</sup> multi-stranded / 25mm <sup>2</sup> flexible
Tightening torque for terminals		4.0 Nm
Mounting on		35mm DIN rail in accordance with EN 60715
Enclosure material		Grey thermoplastic, UL 94V-0
Degree of protection		IP20
Installation width		3 modules, DIN 43880
Weight		316g

Characteristics		
Tested to		EN 61643-11 (VDE0675-6-11) 2007-08
SPD type / class		Type 3 / III
Ports		one port
Type of connection		Parallel connection
Type of power supply system		TT / TN system
Nominal voltage	$U_N$	230V ac
Rated voltage	$U_C$	255V ac
Voltage protection level ( L - N)	$U_p$	$\leq 1.25kV$
Voltage protection level (L/N - PE)	$U_p$	$\leq 1.5kV$
TOV - Characteristic (L - N)	$U_T$	335V / 5s
TOV - Characteristic (L/N - PE) (I)	$U_T$	400V / 5s
TOV - Characteristic (L/N - PE) (II)	$U_T$	1200V / 200 ms
Rated load current	$I_L$	16 Aeff
Nominal discharge current (8/20)	$I_n$	3kA
Maximal discharge current (8/20)	$I_{max}$	5kA
Combination wave (1,2/50 - 8/20) (L - N)	$U_{oc}$	6 kV
Combination wave (1,2/50 - 8/20) (L/N - PE)	$U_{oc}$	10 kV
Residual current	IPE	$\leq 5\mu A$
Replacement cartridge		NO
Maximal rating of overcurrent protection	fuse	16 A gL / gG
	MCB	16A B curve
Short-circuit withstand capability with max. overcurrent protection	fuse	6kA eff ac
	MCB	1kA eff ac
Response time	$t_A$	$\leq 25ns$
Operating temperature range		- 25°C ....+ 40°C
Indication of SPD disconnector		NO
Remote signalisation contact		Green light off
Cross sectional area	min	1.5mm <sup>2</sup> solid / flexible
	max	10mm <sup>2</sup> stranded / 6mm <sup>2</sup> flexible
Tightening torque for terminals		1.2 Nm
Mounting on		35mm DIN rail in accordance with EN 60715
Enclosure material		Grey thermoplastic, UL 94V-2
Degree of protection		IP20
Installation width		2 modules, DIN 43880

### Reserve Indicator Light

Neutral cartridges cannot be put into spares reserved for phase cartridges and visa versa.

### Main Characteristics

#### “Reset” Button

When pressed, the output remains switched and return to normal is obtained by either: by pressing the “reset” clear pushbutton or cutting off the power supply. If the “reset” button is not pressed the device remains in the fault position.

#### Test Button

Pressing the test button allows a fault simulation which operates the relay and the output contacts. The fault level display is shown by an LED on the front of the product.

#### $I_{\Delta n}$ Selector

Sensitivity setting: 0.03A instantaneous  
0.1A/0.3A/1A and 3A time delay

#### Time Delay Selector

Adjustable time setting - instantaneous / 0.13s / 0.3s / 1s and 3s

### Sealable Settings

A sealable cover prevents interference once the settings have been made.

#### Standard Output (1 C/O contact)

Switching to state 1 on:

- Failure of the core/relay connection
- Fault current in the monitored installation

#### Positive Safety Outlet (1 C/O contact)

Switching to state 1: Switching on the power

Switching to state 0: Failure of the core/relay connection  
fault current in the monitored installation  
failure of relay supply  
internal failure of relay

Optical scale display by 5 LEDs of the fault in % of  $I_{\Delta n}$

Optical scale display by (5 LEDs) of the fault in % of  $I_{\Delta n}$

Common pin 6:

State 1 : output terminal 8

State 0 : output terminal 4

1. Reset push button

When associated with MCCB, the add-on block provides an earth fault protection and protects against electrical shocks by direct or indirect contact.

The add-on blocks are protected against nuisance tripping caused by transient voltages. It's able to detect sinusoidal alternating currents and residual pulsating direct currents (A type ). It also avoids miss tripping (HI type - High Immunity).

### Characteristics

**Reset button :**  
Signals add-on block tripping and must be reset before switching on the installation.

**Test button for RCD function :**  
Checks the electrical operating of the MCCB / Add-on block association.

**Mechanical test button :**  
Checks the mechanical operating of the MCCB / Add-on block association.

**LED signaling residual current level in the installation:**  
25% (orange) and 50% (red)  $I_{\Delta n}$ ; green light to signal correct operating.

**Remote tripping and advanced warning (50%  $I_{\Delta n}$ ) signaling thanks to these contacts:**

### Earth leakage current ( $I_{\Delta n}$ ) and delay ( $\Delta t$ ) setting

### Add-on block operating

		A ( $I_{\Delta n}$ )

# Modular Devices & Enclosures

Dimmers, time switches, meters and thermostats are among our varied range of devices, and they can all be perfectly housed in our expansive range of enclosures to tailor a building's energy to an individual's style. It's just like a home, miniaturised.

### DIN Rail Enclosure - Design 30

**Characteristics:**

- Metal DIN rail enclosures, 1 row from 4 to 22 modules.
- Design 30 enclosures come supplied with a full metal DIN rail, full complement of earth and neutral terminals along with marking labels, instructions & cable protector plate for rear knockouts.
- Optional health & safety padlock bracket & keylock available (see page: 4.19).
- Conforms to BS EN 62208.
- For dimensions see page 2.37.

GD102E

### Mini Gamma

**Characteristics:**

- Insulated enclosures 1 row from 2 to 10 modules.
  - Surface mounted enclosures with a rigid chassis, housing a DIN rail, IP30 Rated.
  - Supplied with earth terminals (except **GD102E**), marking labels and sealing grommets.
- Options:** Keylock, plain or transparent door, terminals and terminal supports.
- For dimensions see page 2.38.

## IU Enclosures

### Characteristics:

- 1 row boxes 1-5 modules.
- Ideally suited for the installation of individual modular devices. (RCCBs, MCBs, RCBOs, switch disconnectors etc).
- Available without door, with plain door or with glazed door.
- Where larger cables need to be accommodated (for switch disconnectors etc.) extra cabling space is provided in the extended height versions (Recommended maximum cable size: extended height = 35mm<sup>2</sup>, all other references = 6mm<sup>2</sup>).
- All boxes from 2-5 modules are fitted with an earth bar as standard and for those with doors the catch can be replaced with the optional key locking facility.
- For dimensions see page 2.38.

Keylock with 2 Keys Suitable for All <b>IU</b> Enclosures Fitted with Door	<b>IKL1</b>

## Vega Enclosures

### Characteristics:

- Insulated enclosure rated IP40, 1 to 3 rows, 18 to 54 modules (RAL 9010) available with transparent or plain doors.
- **VB118\*\*** & **VB218\*\*** - 90A max. total load. **VB318\*\*** & **VB418\*\*** - 125A max. total load.
- Features a removable chassis with DIN rails for ease of installation.
- Top and bottom cable entry plates are removable and interchangeable. The door is also reversible with an integral flush handle.

### Options:

- Door lock
- Note:** Not suitable for single module RCBO's.
- For dimensions see page 2.38.

## Orion - Steel Enclosures

### Characteristics:

- Steel (1.5mm) IP65 rated enclosure, insulation class: I (RAL 7035).
- Mounting plates and modular chassis' are required for the installation of devices, see page 2.9.
- 2 removable gland plates for cable entry on top and bottom.
- IP65 with door closed, complies with BS EN 60529.
- Earth studs on both body and door.
- Plain, easily removable door equipped with one or two locks with triangular 8mm bit centres.

**Options:** Key lock, wall fixing brackets, mounting plate, equipment kits for modular devices.

**Note:** Not suitable for outdoor use.  
- For full dimensions see page 2.39.

### Plain Mounting Plates for Orion Enclosures

**Characteristics:**

- Steel sheet, zinc plated, 2mm thickness.
- Fixed directly to the back or sides of the enclosure allowing adjustable depth setting (Fixing Bracket - **FL450A**).
- For dimensions see page 2.39.

For Enclosure	Dimensions (H x W x D mm)	Cat ref. Glazed Door
<b>FL102A, FL152A</b>	300 x 250	<b>FL402A</b>

Adjustable Depth Fixing Bracket	-	<b>FL450A</b>

FL981A

### Functional Frames for Orion Enclosures

- Mounted to enclosure only for **FL980A** and **FL981A**.

**On Chassis**

- Comprises of: DIN rails (slide length 44mm) assembled on chassis and adjustable in depth (of front plates with slide).

**On Vertical Rail**

- Comprises of: 2 vertical rails, DIN rail (slide length 44mm), front plates with slit and a cross-rail allowing for the assembly of bars on to the base and slides.

### Brass Terminals ≤ 60A With Support

#### Characteristics

- Brass terminals with or without support for neutral/earth/phase connections.

#### Colour Coded Supports

- Neutral = Blue, Earth = Green/Yellow, Phase = Brown.

- Insulated support can be fitted on DIN rail with **KZ060** rail clip or flat bar 12 x 2mm.

### Single Phase kWh Meters

**Description:**

- Energy meters are used to measure the active energy consumed by an installation. They allow the user to understand the real cost of an installation and to identify the consumption between the different appliances.

**Characteristics:**

- Complies with EN 50470-3.
- Class B
- Accuracy  $\pm 1\%$ .
- Energy readout: 7 digits.
- Backlit display.
- Indication of instantaneous power consumption.
- Total / partial counter.
- Pulsed output.
- Unlimited saving of measurements.
- LED flashes according to consumption.
- Display indication in case of incorrect wiring.
- Voltage 230V a.c. 50Hz.
- Direct connection.
- Current = 320mA - 32A.
- For technical data, see page 2.41.

**Note:**

- Use of heat dissipation inserts (cat ref. **LZ060**) are recommended on each side of direct connection meters.

Description	Width (1 Mod =17.5mm)	Cat ref.
Total counter, non resettable counter	1 Mod	<b>EC050</b>
Total counter, non resettable counter, pulsed output 1 pulse = 100Wh	1 Mod	<b>EC051</b>

### Single Phase kWh Meters - Direct 63A

**Description:**

- Energy meters are used to measure the active energy consumed by an installation. They allow the user to understand and control the real cost of an installation and to divide the consumption between the different appliances.
- MID approval for sub billing on **EC154M**.

**Characteristics:**

- Fully compliant with the European standard EN 50470-3.
- Class B
- Accuracy  $\pm 1\%$ .
- Energy readout: 7 digits.
- Backlit display.
- Indication of instantaneous power consumption.
- Total / partial counter (expected MID references).
- Pulsed output.
- Unlimited saving of measurements.
- LED flashes according to consumption.
- Tariff 1/ tariff 2 options.
- Display indication in case of incorrect wiring.
- Voltage 230V a.c. 50/60Hz.
- Current = 40mA - 63A.
- Max cable size = 16mm.
- For technical data, see page 2.41.

**Note:**

- Use of heat dissipation inserts (cat ref. **LZ060**) are recommended on each side of direct connection meters.

## Three Phase kWh Meters - Direct 63A

### Description:

- Energy meters are used to measure the active energy consumed by an installation. They allow the user to understand and control the real cost of an installation and to divide the consumption between the different appliances.

### Characteristics

- Fully compliant with the European standard EN 50470-3
- Class B
- Accuracy  $\pm 1\%$
- Energy readout: 7 digits
- Backlit display
- Indication of instantaneous power consumption
- Total / partial counter (expected MID references)
- Pulsed output
- Unlimited saving of measurements
- LED flashes according to consumption
- Option: tariff 1 / tariff 2
- Three phase energy meters are adapted to all kind of networks
- Display indication in case of incorrect wiring
- Voltage 230/400V a.c. 50/60Hz
- Operating Current: 0.04 A to 63 A
- Max cable size = 16mm
- For technical data, see page 2.41.

### Note:

- Use of heat dissipation inserts (cat ref. **LZ060**) are recommended on each side of direct connection meters.

EC350

## Three Phase kWh Meters - Direct 100A

### Description:

- Energy meters are used to measure the active energy consumed by an installation. They allow the user to understand and control the real cost of an installation and to divide the consumption between the different appliances.
- MID approval for sub billing on **EC364M**.

### Characteristics

- Fully compliant with the European standard EN 50470-3
- Class B
- Accuracy  $\pm 1\%$
- Energy readout: 7 digits
- Backlit display
- Indication of instantaneous power consumption
- Total / partial counter (expected MID references)
- Pulsed output
- Unlimited saving of measurements
- LED flashes according to consumption
- Option: tariff 1 / tariff 2
- Three phase energy meters are adapted to all kind of networks
- Display indication in case of incorrect wiring
- Voltage 230/400V a.c. 50/60Hz
- Operating Current: 0.08 A to 100 A
- Max cable size = 35mm
- For technical data, see page 2.41.

### Note:

- Use of heat dissipation inserts (cat ref. **LZ060**) are recommended on each side of direct connection meters.

### Three Phase kWh Meters - Connection via Current Transformers

**Description:**

- Energy meters are used to measure the active energy consumed by an installation. They allow the user to understand and control the real cost of an installation and to divide the consumption between the different appliances.

**Characteristics**

- Fully compliant with the European standard EN 50470-3
- Class B
- Accuracy  $\pm 1\%$
- Energy readout: 7 digits
- Backlit display
- Indication of instantaneous power consumption
- Total / partial counter (expected MID references)
- Pulsed output
- Unlimited saving of measurements
- LED flashes according to consumption
- Option: tariff 1/ tariff 2
- Three phase energy meters are adapted to all kind of networks
- Display indication in case of incorrect wiring
- To be connected to CT with 5A on the secondary
- Voltage 230/400V a.c. 50/60Hz
- Starting current = 10mA
- Max current on CT secondary = 6A
- For technical data, see page 2.41.

**Note:**

- Use of heat dissipation inserts (cat ref. **LZ060**) are recommended on each side of direct connection meters.

### Current Transformers (CT)

**Characteristics:**

- Current transformers are used to feed analogue and digital ammeters and kilowatt hour meters.
- The current on the secondary circuit (0 - 5A) is proportional to the current on primary circuit class: 1.
- Suitable for use with copper bar or cable.
- Can be mounted on a DIN rail (up to 600A CT).
- For complete list of dimensions see page 2.42.

### Description:

- Dedicated to monitoring and reporting of electrical networks (balanced or unbalanced – 1, 2, 3 or 4 wires) The meters are connected through a CT to the network and measure all the parameters (TRMS).
- Allows communication via pulsed output and/or RS485 Jbus/Modbus.
- For technical data, see page 2.43.

### Standards

- IEC 61557-12.
- IEC 62053-22 (class 0.5s).
- IEC 62053-23 (class 2).
- Connection solid & stranded 4mm<sup>2</sup> (power).
- 2.5mm<sup>2</sup> (communication).

### CT Output & RJ45 Lead Tester

Description	Cat ref.
CT Output and RJ45 Lead Tester	<b>JFT03</b>

### Hour Counter

**Characteristics:**

- To measure the total operating time of any circuit/load non resettable.
- For technical data, see page 2.50.

**Application Example:**

- Total time of plant running.
- Connection in parallel with contactor coil.
- Recording of lighting hours for relamping purposes.

Voltage	Width (1 Mod =17.5mm)	Cat ref.
230V - 50Hz	2 Mod	<b>EC100</b>

EC100

### Analogue Voltmeters

**Characteristics:**

- Single phase: direct connection.
- Three phase: use of a voltmeter selector switch **SK602** (see page 2.21).
- Frequency: 50 Hz.
- Accuracy:  $\pm 2\%$ .
- For technical data, see page 2.50.

**Connection Capacity**

- Rigid conductor 10mm<sup>2</sup>.
- Flexible conductor 6mm<sup>2</sup>.

Consumption	Width (1 Mod =17.5mm)	Cat ref.
2.5VA	4 Mod	<b>SM500</b>

SM500

### Analogue Ammeters

**Characteristics:**

- For domestic and commercial installations.
- Indirect reading via current transformers: 50-100-150-250-400A.
- Accuracy:  $\pm 2\%$ .
- Connection via a current transformer (CT).
- For technical data, see page 2.50.

### Digital Voltmeters

**Characteristics:**

- Three phase: use of a voltmeter selector switch **SK602** (see page 2.21).
- Voltage rating: 220/230V; 50/60Hz.
- Accuracy:  $\pm 2\%$ .
- Consumption: 4 VA.
- For technical data, see page 2.51.

Scale	Width (1 Mod =17.5mm)	Cat ref.
0-500V	4 Mod	<b>SM501</b>

SM501

### Digital Ammeters

**Characteristics:**

- **SM151, SM401, SM601**: reading via a current transformer (see below).
- Voltage rating: 220/230V; 50/60Hz.
- Accuracy:  $\pm 1\%$ .
- Consumption: 4 VA.
- For technical data, see page 2.51.

Description	Scale	Width (1 Mod =17.5mm)	Cat ref.
Reading via CT 150/5 (SRA01505)	0 - 150A	4 Mod	<b>SM151</b>

SK602

### Voltmeter Selector

**Characteristics:**

- For use with Voltmeters.
- Complies with IEC 947-3, BS EN 60947-3
- Isolating voltage 500V a.c.
- Nominal current 10-20A
- 3 Ph&N
- 3 Readings between phases
- 3 Readings between phase & neutral
- Null position (no reading)

**Terminal Capacity**

- 1 - 6mm<sup>2</sup> Flexible
- 1.5 - 10mm<sup>2</sup> Rigid

Description  
20A 400V a.c.

Width

SK603

### Ammeter Selector

**Characteristics:**

- For use with Ammeters.
- Complies with IEC 947-3, BS EN 60947-3
- Isolating voltage 500V a.c.
- Nominal current 10-20A
- 4 Positions
- Use in 3 Ph&N
- Reading by phase
- Null position (no reading)
- Should be used with Current Transformer (see page 2.50)

**Terminal Capacity**

- 1 - 6mm<sup>2</sup> Flexible
- 1.5 - 10mm<sup>2</sup> Rigid

Description  
20A 400V a.c.

Width  
(1 Mod =17.5mm)    Cat ref.

Modular Devices & Enclosures

## Switch Disconnectors

### I<sub>n</sub>: 25 -32A

- Shrouded cable terminal.
- Connection capacity: 16mm<sup>2</sup> rigid conductor, 10mm<sup>2</sup> flexible conductor.

### I<sub>n</sub>: 40 - 63A

- Shrouded cable terminal.
- Connection capacity: 25mm<sup>2</sup> rigid conductor, 16mm<sup>2</sup> flexible conductor.

### I<sub>n</sub>: 80 - 125A

- Shrouded cable terminal.
- Connection capacity: 50mm<sup>2</sup> rigid conductor, 35mm<sup>2</sup> flexible conductor.

### Characteristics

- Complies with BS EN 60947-3 all ratings.
- On position "I" in red & Off position "0" in green giving positive contact indication.
- For technical details see 2.52.

### Light Sensitive Switch

#### Characteristics

- A photo-electric cell measures the light level and in conjunction with the relay provides on/off control of a circuit.
- This device controls lighting circuits in relation to ambient light, based on user settings.
- Sealable front cover.
- Outputs: 1 changeover AC1 contact 16A - 230V a.c.
- Maximum distance: 50m between photocell and controller

#### Application Example:

- Street lighting, display lighting, illuminated signs etc.

#### Connection

- Capacity: Rigid: 1.5 to 10mm<sup>2</sup>, Flexible: 1 to 6mm<sup>2</sup>.
- On board LED shows status of changeover contact.

#### Technical Data

- 4 position override switch allowing: auto, on, off, test
- 2 sensitivity ranges: 5 to 50 lux, 50 to 2000 lux.
- Supplied with a separate surface-mounted photo-electric cell **EE003**.
- Must be used in conjunction with a suitably rated contactor where load conditions demand.
- For technical data, see page 2.54.

EEN100

Description	Width (1 Mod =17.5mm)	Cat ref.
Light Sensitive Switch	1 Mod	<b>EEN100</b>

### Light Sensitive Programmer

#### Characteristics

- To control the lighting installation in relation to time and ambient light.
- A weekly programmer associated with a light sensitive switch.
- Outputs: 1 changeover AC1 contact 16A - 230V a.c.
- Maximum distance: 50m between photocell and controller.

#### Working Principle

- The user programmes both on/off periods and a desired light level. The cell measures the light level within the on period. Depending on the light level (below or above the programmed threshold) the output will be switched on/off.
- 20 program steps, 1 minute switching increments.

#### Programming Function

- Programming by keys and display on LCD screen.
- On/off override facility, permanent working.
- Display and control of the programme.
- Test setting for easy adjustment.
- 2 sensitivity ranges: 5 to 50 lux, 50 to 2000 lux.
- Supplied with a separate surface-mounted photo-electric cell **EE003**.
- Must be used in conjunction with a suitably rated contactor where load conditions demand.
- For technical data, see page 2.54.

### Emergency Lighting Module

#### Application

- For both residential and commercial applications.
- Installed in a consumer unit or distribution board. Can be configured to provide emergency lighting.
- It can also be withdrawn from it's base, to act as a mini torch with an operating duration of 1 hour 30 mins.

### Universal Dimmers

Functional Characteristics Load	EVN011	EVN012	EVN002	EVN004
230V Incandescent/halogen lamps	300W	300W	500W	500W
ELV Halogen lamps via fermagnetic transformer (transformer shall not be used under 75% of its nominal load)	300VA	300VA	500VA	500VA
ELV halogen & dimmable ELV LED via electronic transformer (maximum number of lamps allowed shall be calculated based on transformers output)	300VA	300VA	500VA	500VA
Dimmable compact fluorescent	60W	60W	100W	100W
230V dimmable LED lamps	60W	60W	100W (10 lamps)	100W (10 lamps)
No load consumption	0.2W	0.2W	0.2W	0.2W

### Characteristics

- Controls the lighting level of all types of light source: incandescent, LV halogen, ELV halogen with electronic or ferromagnetic transformer, LED lamps, ELV LED lamps with electronic transformer, fluorescent with electronic ballast.
- The EVN 300W and 500W dimmers also allow lighting level adjustment for dimmable CFL and dimmable LED lamps.
- Dimming controlled by push button: start / stop by short press, increasing / decreasing by maintaining pressure.
- Automatic load recognition.
- Soft start (progressive start) to increase the working life of lamps.
- Remembers previous dimming level.
- Protection against overheating.
- 3 modes for load learning: auto, advanced, expert (comfort version).
- Can replace a latching relay, with light level function.
- Push button (line or neutral).
- Comfort version includes scene setting by two short presses on the push button, progressive switch-off & night light.

500W Standard Version	2	<b>EVN002</b>
500W Comfort Version	2	<b>EVN004</b>

### Latching Relays

#### Description

- Operate when impulsed by a signal voltage.
- The impulse can be provided via a pushbutton or pushswitch. The first pulse operates the relay and latches it to its set (opposite) state, the next operation of the pushbutton returns the relay to its reset (original) state.
- Auxiliary contacts (**EPN050, EPN051**).
- Are available for remote signalling and centralised control applications and can be easily combined with the latching relays.
- Connection: 10mm<sup>2</sup> flexible, 6mm<sup>2</sup> rigid.
- For technical details see page 2.56.

### Relays

#### Characteristics

- To provide control of low power circuits max 16A; associated with switches, time switches etc for remote control applications.
- The relays will accept an auxiliary contact for remote signalling applications (**ESC080**).
- For the command of ELV circuits use interface relays **EN145** and **EN146**.
- For the command of high power circuits (20, 40 & 63 Amps) use contactors as shown on page 2.27.

### Low Noise Contactors

#### Description

- For the remote switching and control of power circuits where noise may be a concern i.e. hotel bedrooms etc.

#### Technical Data

- The choice of contactor depends upon a number of parameters, e.g. The nature of the supply, the power it is switching, the characteristics of the load, the control voltage required & number of operations.

- All contactor ratings are for AC1 loads only – if the load differs from AC1 the contactor may need de-rating

- The use of **LZ060** (heat dissipation inserts) between all contactors installed or between contactors and adjacent devices is required.

- For technical data, see page 2.57.

#### Options

- Contact choice: Normally open (NO), Normally closed (NC).

### Override Contactors

#### Description

- Manual override facility allows temporary override, with automatic return at next coil energisation. Permanent off can also be selected. **ETC225S** is a low noise version.

#### Technical Data

- The choice of contactor depends upon a number of parameters, e.g. the nature of the supply, the power it is switching, the characteristics of the load, the control voltage required, number of operations.

- All contactors ratings are for AC1 loads only – if the load differs from AC1 the contactor may need de-rating (see technical characteristics on page 2.58).

- The use of **LZ060** (heat dissipation inserts) between all contactors installed or between contactors and adjacent devices is recommended.

#### Options

- Contact choice
- Normally open (NO)
- Normally closed (NC)

#### Auxiliary

- All contactors will accept auxiliary, **ESC080** contact.

### Safety Transformers

#### Characteristics

- Provide Separated Extra Low Voltage (SELV) 8, 12, 24V a.c.

#### Technical Data

- Secondary voltages: 8V, 12V, 24V a.c.
- Cable capacities: 6mm<sup>2</sup>
- For technical data, see page 2.62.

#### Note:

- The transformers have a higher no load voltage. The stated voltages correspond to the voltages on nominal load.

### Bell Transformers

#### Characteristics

- Provide Separated Extra Low Voltage (SELV) 8, 12, 24V a.c.

#### Technical Data

- Secondary voltages: 8V, 12V, 24V a.c.
- Cable capacities: 6mm<sup>2</sup>.
- Bell transformers are short-circuit protected.
- For technical data, see page 2.62.

#### Note:

- When a bell transformer is installed in an enclosure with mains voltage equipment, 230V cable should be used on the secondary side of the transformer or extra low voltage cable should be sheathed within the enclosure.

### Electromechanical Time Switches

#### Characteristics

- For hourly, daily or weekly programming.
- To control lighting, heating, ventilation, household appliances etc. to save energy and to improve comfort.

#### Technical Data

- Programming by captive segments.
- Manual override for 1 module products: Automatic, Permanent ON.
- Manual override for 3 module products: Automatic, Permanent ON, Permanent OFF.
- Minimum Switching Time: 15 min for daily dial, 2h for weekly dial.
- Supply failure reserve where applicable 200 hours, after being connected for 120 hours.
- For a selection chart see page 2.64, for technical data see page 2.63.

#### Connection

- 1-4mm<sup>2</sup>.

EG071

EG103

EG203

### Digital Time Switches

#### Characteristics

- For the control of lighting, heating, household appliances, shop windows, signage etc. to improve comfort and to save energy.

#### EG103 and EG203 (Basic Version)

- Automatic change of summer / winter time.

#### EG103E/V and EG203E (Advanced Version)

- Automatic change of summer / winter time.
- Holiday mode: forcing ON or OFF between two dates, presence simulation with random switching.
- Backlit screen.
- Impulse programming capability (1s to 30 min).

#### Programming Key

- To allow easy back up and re-installation of the program to allow permanent program overrides.
- Programming per day or group of days.
- 56 ON / OFF programme steps.
- Permanent ON/OFF overrides.
- Temporary ON/OFF overrides bar graph indication showing the daily profile.
- Ability to disable device button controls with **EG004**.
- Programming can be completed without the need to be energised.

#### Connection

- **EG010 / EG071**: 0.5 to 4mm<sup>2</sup>.
- **EG103 and EG203/E**: 1 to 6mm<sup>2</sup> Flexible, 1.5 to 10mm<sup>2</sup> Rigid.

#### Operating Voltage

- 230 a.c. 50/60 Hz (except **EG103V** - 12/24V AC/DC).
- For a selection chart see page 2.64, for technical data see pages 2.63 - 2.67.

**4 Channel Digital Time Switches**

**Weekly and Annual Cycle**

- In commercial premises timed programming often requires the use of multi-circuit equipment with large programming capacities for a weekly or annual cycle.

**Applications**

- Command of lighting circuits, control of heating, ventilation control, bells, alarms.

**Functions**

- Summer/winter time pre-programmed.
- External input for override (permanent, temporary, timed)
- The output can be defined as ON/OFF, impulse or cycle.
- 4 different cycles can be defined.
- Calculates automatically all dates linked with Easter.
- Programming for holiday period, including random mode.
- 10 specific weekly programs.
- Hour counter on each channel.
- Ability to disable device button controls with PIN code.

**Connection**

- Quick connect terminals.
- Capacity: 0.75 to 2.5mm<sup>2</sup>.
- For a selection chart see page 2.64.

EG493E

**Astronomical Time Switches**

**Characteristics**

- Programming of lighting loads, with automatic change of winter / summer time.
- Expert program with individual astronomical program steps.
- Programming for day or group of days.
- Weekly programming.
- Permanent or temporary override.
- Programming for holiday period.
- Can be programmed via the PC software and the associated interface (**EG003**).
- For technical information see page 2.67.

### Time Lag Switches

#### Characteristics

- Provides control of lighting circuits with automatic switch-off after a pre-set time.
- Compact design with a 2 position switch, permanent / timed lighting control facility.

#### Basic Staircase Time Lag Switches

- Adjustable time delay setting 30 sec. to 10 minutes.

#### Multifunction Staircase Time Lag Switches

- Incorporates a pre-warning of switch OFF improving safety.
- Double delay function: 30 sec. to 10 min. 1 hour on override by pressing the push-button for more than 3 seconds. Double delay with pre-warning mode.
- For technical data see page 2.68.

### Delay Timers

#### Characteristics

- For timing and automation in domestic and commercial premises. The input signal can be via various switching devices (pushbutton, latching switch, timeclock etc.) and the timed output used to control the application.

#### Applications

- To provide all types of automatic control i.e. lighting, ventilation, watering, machine pre-heating, cycle control etc. with automatic switch off / on after preset time.

#### Terminal Capacity

- 6mm<sup>2</sup> max flexible.
- 1.5 - 10mm<sup>2</sup> rigid.

#### Technical Data

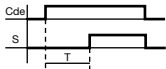

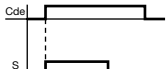

- Voltage range: 12 to 48V DC, 12 to 230V AC.
- Adjustable: Time delay from 0.1s to 10hrs.
- Complies with BS EN 60669-2-1.
- For technical data see page 2.69 - 2.70.

**Multi-range Thermostats**

**Description**

- Electronic thermostats for any application requiring temperature control (from cold rooms to steam rooms).

**Characteristics**

- 3 working modes are possible (selected by wiring): permanent off, permanent on, cyclic operation.
- Output status is indicated via an LED.

**Technical Data**

- Requires sensor head, **EK081** or **EK083**.
- Voltage rating: 230V a.c. - 50/60 Hz.
- Output: 1 changeover contact, 2A AC1 - 230V a.c.
- 4 ranges: -30 to 0°C, 0 to +30°C, 30 to +60°C, 60 to +90°C.
- For technical data see page 2.71.

**Multi-Channel Thermostats**

**Description**

- Electronic thermostats for any application requiring temperature control (from cold rooms to steam rooms).

**Characteristics**

- 3 working modes are possible (selected by wiring): permanent off, permanent on, cyclic operation
- Output status is indicated via an LED.

**Technical Data**

- Two adjustable temperature levels are selected by external signals (operation by time switch or digital programmer).
- Additionally there is an adjustable low level temperature for frost protection etc. In the event of probe disconnection the heating system is switched on one minute in every four.
- Accuracy ±0.2°C, Voltage rating: 230V a.c. - 50/60 Hz.
- Output: 1 changeover contact, 2A AC1 - 230V a.c.
- Temperature Level 1 (Comfort) Adjustable 5 - 30°C.
- Temperature Level 2 (Night setting) Adjustable 2 - 8°C less than Level 1 setting.
- Temperature Level 3 (Frost setting) Adjustable 5 - 30°C.

- 96 x 96mm Flush mounting
- Single phase or 3 phase 4 wire network balanced or unbalanced load
- Built in energy pulsed output or with pulsed output and RS485 (modbus)
- Backlit LCD display with bargraph current indication on every page
- Automatic or manual scrolling display
- 330mV current transformer input

- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- Programmable VT ratio
- 3-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage
- THD up to 31st harmonic for voltage and current
- Self supplied auxiliary
- Programmable CT ratio 5 to 10,000A
- Frequency 45/65Hz

- Wide range of measured parameters (see table below)
- Selectable CT phase correction allows reversal of L1 and L3
- Single CT Connection
- Weight 230g

### Function Diagram

Modular Devices & Enclosures

### Dimensions Diagram (mm)

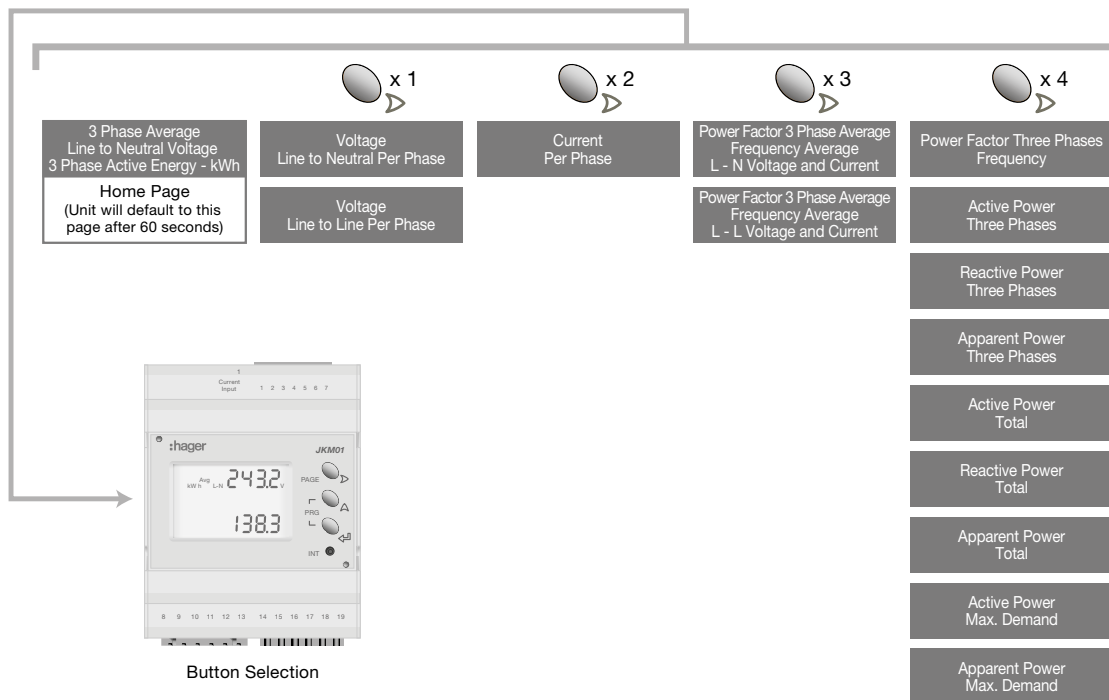

Please allow space at the rear of the meter for cable connections.

- 4 Module DIN rail mounting
- Single phase or 3 phase (4 wire) network balanced or unbalanced load
- Built-in energy pulse output and RS485 MODBUS communication
- Wide range of measured parameters (see table below)
- High quality backlit LCD display
- 330mV current transformer input
- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- THD up to 31st harmonic for voltage and current
- 3-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage
- Self supplied auxiliary
- Programmable CT ratio 5...10,000A
- Programmable VT ratio
- Frequency 45/65Hz
- Selectable CT phase correction allows reversal of L1 and L3
- Single CT Connection
- Weight 190g

### Function Diagram

### Dimension Diagrams (mm)

Please allow space above and below the meter for cable connections.

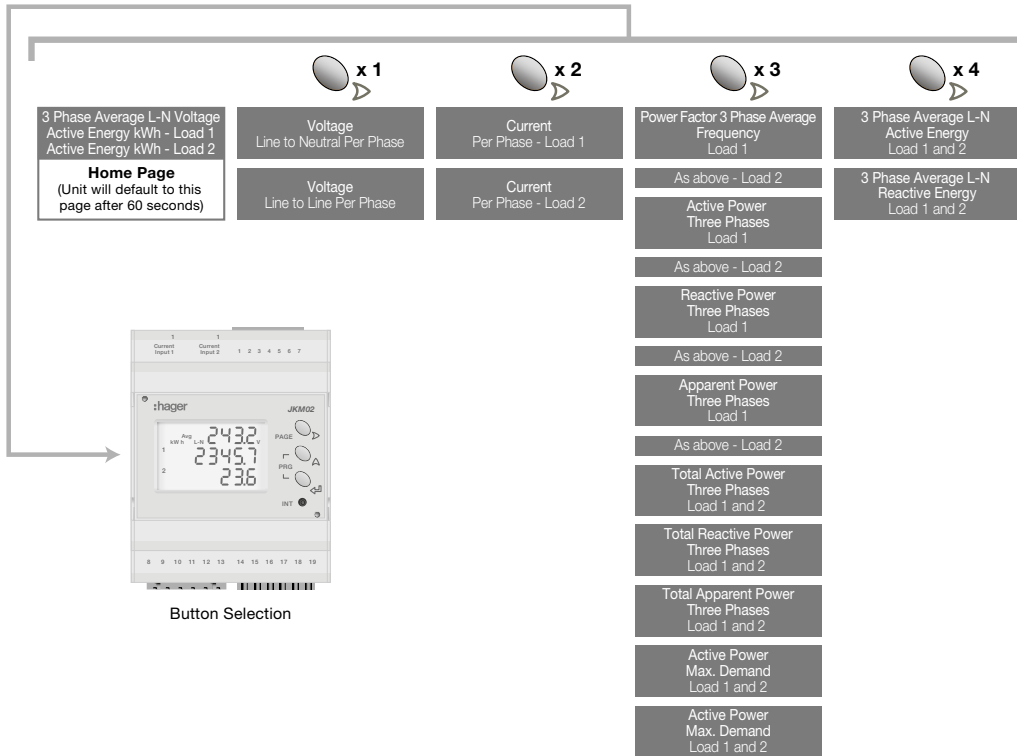

- Split Load, Dual CT input meter
- 4 Module DIN rail mounting
- Single phase or 3 phase (4 wire) network balanced or unbalanced load
- Built-in dual energy pulse output, one for each load and RS485 MODBUS communication
- Wide range of measured parameters (see table below)

- High quality backlit LCD display
- 330mV current transformer input
- Active energy class 1 (EN62053-21)
- Reactive energy class 2 (EN62053-23)
- THD upto 31st harmonic for voltage and current
- Three-phase: 140...460Vac measured voltage
- Single phase: 80...265Vac measured voltage
- Self supplied auxiliary

- Programmable CT ratio 5...10,000A per load
- Programmable VT ratio
- Frequency 45/65Hz
- Selectable CT phase correction allows reversal of L1 and L3
- Weight 200g

Function Diagram

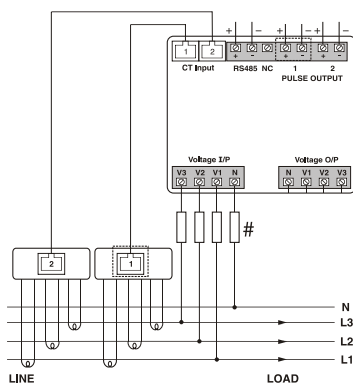

Modular Devices & Enclosures

Dimension Diagrams (mm)

Please allow space above and below the meter for cable connections.

- Connect up to 3 standard or split core CT's (1A or 5A secondaries)
- Integrated protection circuitry

### Standard CT to plug-in Adaptor

The JFA03 converter allows for the connection of up to three standard current transformers, or standard split-core current transformers (with 1A or 5A secondary's), to the plug-in system.

The unit has integrated protection circuitry allowing for disconnection from meter under load conditions for maintenance.

### Important Note

This converter does not provide electrical isolation. Current transformer secondaries may not be earthed and should be wired as shown.

### Technical Characteristics

Burden:	<2VA per channel (5A Version) <0.5VA per channel (1A Version)
Accuracy:	0.4%
Suggested Cable Size: (CT to Adaptor)	1.5mm <sup>2</sup> or 2.5mm <sup>2</sup> (2.5mm <sup>2</sup> Max.)
Mounting:	DIN rail 35mm
Termination:	CT to adaptor - Rising clamp screw terminals Adaptor to Meter - RJ45 Patch Cable
Operating Temperature:	-10°C...+45°C
Storage Temperature:	-25°C...+70°C

Modular Devices & Enclosures

### Dimension Diagrams (mm)

### Description

Designed for use with Hager x160 MCCBs and the plug-in multifunction power meters.

Internal safety circuitry is provided which limits the output voltage to a safe level, allowing the transformer secondary to be left disconnected under load.

### Installation

The CT uses plug-in technology allowing much faster installation saving you time and money. Additionally, all our three phase current transformers have been designed with hole centres and apertures to fit most standard industrial circuit breakers.

### CT Output and RJ45 Lead Tester

This device makes it possible to test the RJ45 patch lead used to connect the current transformer to the meter. It also enables a standard electricians multimeter to measure the individual secondary outputs of the current transformer.

To test the RJ45 patch lead, simply disconnect the lead from the meter and current transformer. Plug one end into socket 1 and the other end into socket 2 on the test box. Press the test button - the Green LED will light to indicate the lead is OK or the Red LED will light to indicate a faulty lead. When the lead is proven to be OK you can then check the individual secondary outputs of the current transformer.

To measure the secondary output plug one end of the RJ45 patch lead into the current transformer and the other end into socket 2 on the test box. You can now use a standard multimeter to test the secondaries using the test points on the front of the test box. The output measured for each phase should be between 0 and 330mV a.c.

Cat ref. **JFT03**

### 3 Phase CT Splitter Box

This 3 Phase CT Splitter Box allows the separate monitoring of each phase of a three phase current transformer on individual energy meters.

Cat ref. **JFS03**

### Meter Voltage Supply Cable

Our high quality Meter Voltage Supply Cables are fitted with a plug at one end and insulated bootlace ferrules at the other and provide power to the plug-in meter from your mains supply.

Cable type: PVC

### Meter to Meter Supply Cable

Our high quality Meter to Meter Voltage Supply Cables are fitted with a plug at one end and socket at the other. This allows multiple plug-in meters to be energised from a common supply. Up to 32 meters can be powered in a 'daisy chain' arrangement using this method.

Cable type: PVC

### RJ45 Connection Cable

The high quality low loss Category 5e RJ45 Connection Cable provides secondary connection between the plug-in current transformer and meter.

**Light Sensitive Switches**

Using light sensitive switches can prevent the unnecessary use of lighting circuits where sufficient daylight exists. The benefit of modular devices is the facility to set the ambient lighting level at which the device will operate, and as the device is fitted at the distribution point prevent unauthorised tampering. The remote photocell unit can be mounted up to a distance of 50 metres from the device. Two devices are available the standard **EE100** light sensitive switch and an enhanced programmable version the **EE171** that also allows time clock control.

**Principle of Operation**

Both devices control lighting systems according to natural illumination;

- The user sets the working level:
- The photo cell measures the external light level

The output of the **EE100** is:

- ON, when the measured level is lower than the pre-set light level
- OFF, when the measured level is higher than the pre-set light level

The output of the **EE171** during the programmed ON time period is:

- ON, when the measured level is lower than the pre-set light level
- OFF, when the measured level is higher than the pre-set light level

The output of the **EE171** during the programmed off time period is:

- OFF, regardless of the lighting level

The light sensitive switches include a built in time delay which avoids unnecessary switching due to temporary factors such as car headlight beams etc...

**Description**

The programmable light sensitive switch **EE171** has two main functions:

Light sensitive switch comprising

1. Override selector switch to allow permanent ON or OFF, auto or test mode
2. Lighting range selector
3. Potentiometer to set light level
4. Indicator to show output switching status

A programmer to establish the automatic operating cycle

The programmer comprises 4 keys:

5. **ON / OFF** to choose whether the circuit is on or off.
6. **Prog** to set the program and scroll program steps
7. **Reset**
8. **+** and **-** to change settings

### Mounting the Cell

To ensure correct operation of the light sensitive switch, the cell must not be influenced by artificial light or direct solar radiation and should be sheltered from dust and humidity. In case of disconnection of the link between the cell and the light sensitive switch, the output of the device will be switched on. Make sure the light sensitive switch is unplugged before connecting the cell.

	EE002	EE003
Type	Flush Mounting	Surface Mounting
Dimensions (mm)	89 x 48 x 32	25 x 25 x 20 Hole 25mm
Connection	Cable 1m 2 x 0.75mm <sup>2</sup>	0.75 to 4mm <sup>2</sup>
Protection Class	IP54	IP54
Working & Storage Temperature	-30°C to +60°C	-30°C to +60°C

### Adjustment of the Working Level

The test position of the override selector 1 makes setting the preset level easier by removing the ON and OFF delay.

Select the sensitivity range which suits your application (selector 1)  
5 to 100 lux (low light level) application examples; public lighting, shop windows, signals...

50 to 2000 lux (high light level) application examples; controls of shades

At the appropriate moment of the day, put the selector 1 in test position; turn the potentiometer 2 up to the switching point (the indicator 4 lights); put the selector back to position 'auto' the normal operating mode of the device.

### Technical Specification

#### Electrical Specification

Voltage Rating	230V +10 -15% 50Hz
Consumption	1.5VA Max
Output	1 Voltage Free Changeover Contact
Max Breaking Capacity	AC1 16A 250V~
Incandescent Lamp	2000W 230V~
Halogen Lamp	1000W 230V~
Fluorescent Lamp Uncompensated	1000W 230V~
Compensated in Series (10µF)	1000W 230V~
// Compensated (15µF)	200W 230V~
Duo	1000W 230V~

#### Functional Characteristics

Sensitivity Range	5 to 100 lux, 50 to 2000 lux
Cycle	Weekly
Programs	8 Pre-defined Program
Program Setting	1 Minute Increments*
Accuracy	+6min / annum*
Operating Reserve	Lithium Battery Total of 3 Years Supply Failure*
On and Off Delay	15 to 60s
Working Temperature	-30°C to +60°C (cell) -10°C to +50°C (modular device)
Storage Temperature	-20°C to +60°C
Protection Class (cell)	IP54
Insulation Class	II

#### Connection Capacity

Modular Device	0.5 to 4mm <sup>2</sup>
Cell	0.75 to 2.5mm <sup>2</sup>
Max Length between Cell and Modular Device	50m
Mounting of the Cell with 2 Screws	2.5mm

\* EE171 only

Modular Devices  
& Enclosures

Auxiliary Contacts (EPN051)

The range of latching relays have been designed for use with an auxiliary contact. The devices simply clip on the side of the relay.

Technical Characteristics

	EPN051
Voltage	-
Contact Rating	2A / 250V
I <sub>min</sub> / 230V	15mA

<sup>1</sup> Voltage dependant on associated relay

### Heating

The choice of the contactor depends on the mechanical endurance (number of operations) and on the electrical heating load i.e. resistive elements, infra-red element, convectors.

### Choice of Contactors

The choice of contactor is dependant upon many parameters i.e. operating voltage, size of contacts, number of operations, ambient temperature, type of load supplied etc.

### Type of Load

Loads are categorised into various AC ratings, (AC1, AC2, AC3 etc.) and the higher the AC rating the more inductive the load becomes. All Hager contactor ratings are given at AC1, therefore they must be de-rated if used on other types of AC load.

### Heat Dissipation Inserts

The ambient temperature around a contactor can affect its life expectancy, therefore, we strongly recommend that heat dissipation inserts (**LZ060**) are fitted between all contactors and adjacent devices.

### Single Phase

### Three Phase

Modular Devices & Enclosures

		Number of operations					
		100,000	150,000	200,000	500,000	1,000,000	
Max. load in kW	230V	16A	3	2.5	1.9	0.85	0.7
		25A	4.6	4	3	1.35	1
		40A	7.3	6.3	4.7	2.2	1.6
		63A	11.6	10	7.5	3.5	2.5
	400V	16A	8.9	8	5.8	2.8	2

40A		22	18.5	14.385	6.3	5	
	63A	35	30	22.6	10.2	7.6	

### Contactor selection when using with motors

#### Single Phase 230V (AC3 or AC7b)

#### Three Phase 400V (AC3 or AC7b)

Maximum load in kW	Single Phase with Capacitor 230V	Three Phase (AC3 or AC7) 400V	Choice of Contactor According to control diagram	
			2 Wires	3 Wires
0.88			2 pole 25A	
2.6			2 pole 40A	
		2.6		3 pole 25A
		7.8		3 pole 40A
		10		3 pole 63A

### Requirements of Use

#### Influence of Working Temperature

Derating factor between 40°C and 50°C : 0.9

Example: Heating with convector

The maximum load of **ESC225** is 4.6kW for 50,000 operations and for a temperature <40°C.

between 40°C and 50°C, the load is 4.6 x 0.9 i.e. 4.14kW

### Close Fitting

It is necessary to put a heat dissipation insert (reference **LZ060**) between each contactor.

Lighting systems with electronic ballasts cause inrush current peaks. Therefore we recommend you use the chart below to determinate the maximum amount of lamps that can be connected to a Hager contactor: The chart gives the maximum amount of lamps per contact. In 2014 the performances of the contactors in combination with lights increased. The products identified on the front face with the '+' can accept a higher number of lamps. For these products, see the figures in the column with the '+' in the header.

### Safety Transformers

These transformers are designed to ensure personal safety, their primary winding are electrically separated from their secondary windings and they are intended to feed separated extra low voltage circuits  $U \leq 50V$ . A thermal overload, in the primary windings, ensures that if a short circuit or an overload occurs in the output it will not damage the device.

### Bell Transformers

Bell transformers are similar to safety transformers but the secondary voltages do not exceed 24 volts, they are also similarly protected against short circuits and overloads, by thermal protection in the primary winding.

### Compliance with the Standards

The bell and safety transformers conform with BS EN 61558. Where transformers are to be used in a common enclosure with other devices heat dissipation inserts LZ060 should be used.

### Recommendation of Use

- To link only one secondary (never link both simultaneously)
- Do not connect (in series or in parallel) secondaries of different transformers

### Technical Characteristics - EG010

#### Electrical Characteristics

Voltage Supply	230V ±10% 50/60Hz
Consumption	1VA
Output	1 Changeover contact 16A - 250V AC 1 3A - 250V cosφ = 0.6 1000W Incandescent lighting

#### Functional Characteristics

Number of programs	5 Adjustable Pre-recorded Programs
Accuracy	±6min per year
Supply Failure Reserve	Total of 3 years

#### Environment

Working Temperature	-10°C to +50°C
Storage Temperature	-10°C to +60°C
Cable Capacity	1 to 4mm <sup>2</sup>
Main Characteristics	Easy to program: 5 programs are pre-recorded. The user just has to select the program which corresponds to its use and modify time switches if necessary.

The 5 pre-registered programs are as follows:

P	Prog
P0	OFF
P1	ON
P2	6.00 — 23.00
P3	6.00 — 8.00      17.00 — 23.00
P4	6.00 — 8.00      11.00 — 13.00      17.00 — 23.00

### Product Presentation

#### Display

2. Circuit Status
3. Program Selection

#### Buttons

4. P to select the program to apply
5. Reset
6. ↻ to scroll program steps
7. + and - : to input time

### Electrical Connection

### Technical Characteristics - EG071

#### Electrical Characteristics

Voltage Supply	230V ±10% 50/60Hz
Consumption	1VA
Output	1 Changeover contact 16A - 250V AC 1 3A - 250V cosφ = 0.6 1000W Incandescent lighting

#### Functional Characteristics

Number of programs	20 Program Steps (each program step can be applied to one of several days)
Accuracy	±6min per year
Supply Failure Reserve	Total of 3 years

#### Environment

Working Temperature	-10°C to +50°C
Storage Temperature	-10°C to +60°C
Cable Capacity	1 to 4mm <sup>2</sup>

### Product Presentation

#### Display

1. Time
2. Circuit Status
3. Days of the week

#### Buttons

4. ON / OFF : to select the circuit status
5. Reset
6. Prog: to program the device and scroll program steps
7. To input time and day

### Electrical Connection

**Keys**

1.	Menu	Selection of operating mode
	Auto	Mode of running according to the program selected
	Prog	New for programming mode
	Prog	To modify an existing program
	←	Checking of the program
	🕒	Modification of time, date and selection of the winter/summer time change mode.
	📅	Holidays
2.	+ / -	Navigation or setting of values
	👤	In auto, mode, selection of overrides, waivers or random operation
3.	OK	To validate flashing information on display
4.	←	To return to the previous step

You may return into auto mode at any moment using menu.  
If no action is taken for 1 min, the switch returns to auto mode.

**Major Characteristics**

- Product delivered with current time and date set
- Automatic change of winter / summer time 🕒/🕒
- Programming key 🗑️
  - For permanent waivers
  - For program copy or save
- Programming for day or group of days
- 56 program steps On, Off
- Impulses ⏏ (1 sec to 30 min)\*
- Permanent overrides On or Off (👤 permanent light on)
- Temporary overrides On or Off (👤 flashing)
- Holiday mode 📅 : overrides On or Off between two dates\*
- Simulation of presence 🏠 \*
- Display bar graph of daily profile
- Keyboard locking possible 🔒
- Programmable with power off
- Back lit display\*

\* Evolution models E or V only

### EE181 : 2 Channels

### Time Lag Switches

A common area where time delay devices are used is stairways and corridors in multi occupancy buildings where they provide a level of energy efficiency. The EMN001 device provides basic time lag control.

### Wiring Diagrams 4-Wire

### 3-Wire

### Combination EMN002 with EMN001

### A: Basic Mode

Press push button to switch ON the light. After a set time (Adjustable "T"), the light will switch OFF automatically.

A

### B: Prewarning Mode

A signal (blink) will appear before the end of the lighting period.

B

### C: Double delay mode

Press push button to switch light ON. After a set time (Adjustable "T"), the light will switch OFF automatically. If you press the button for more than 3 seconds, a time lag of one hour begins.

C

### Delay Timers

Delay timer devices are used to control a variety of processes where the requirement is for switching circuits on, off or delaying the on or off switching for a pre-set period of time. Typical device types are:

- **Delay on** - intended to delay the starting or switching of a circuit for a set period of time following the command signal e.g. to delay the starting of motor loads where a large number of motors are to be started by the same switch to reduce the effects of the starting currents.
- **Delay off** - intended to delay the stopping or switching off of a circuit for a set period of time following the removal of the command signal e.g. to overrun an extractor following the switching off of a process that creates fumes.
- **Adjustable time on** - intended to switch on for a set period, the command signal must remain on throughout the set period e.g. to switch on two sets of heaters with one set (the boost) switching off after the set period.
- **Impulse timer** - intended to switch on for a set period, the command signal length is not important e.g. to boost a time clock controlled circuit such as a water storage heater.
- **Symmetrical timer** - intended to toggle a circuit on and off in regular time patterns e.g. to run an extractor intermittently.

### Multifunction Timer - 6 Individual Functions

- A** = Timer.
- B** = Delay off (output relay opens either at end of command or after set time period - whichever is shorter).
- C** = Delay off.
- D** = Delay on.
- E** = Delay on (output relay closes either at end of command or after set time period - whichever is shorter).
- F** = Symmetrical timer.

On selection - contact permanently closed

Off selection - contact permanently open

## Technical Specifications

EZN001, EZN002, EZN003, EZN004, EZN005, EZN006	
<b>Electrical Characteristics</b>	
Supply Voltage	24-28 Vdc 12-48 Vdc (+10%) Terminals A1 & A2 12-230 Vac (+10%) Terminals A3 & A2
Output	1 Volt Free C/O Contact
<b>Life Expectancy</b>	
Max Load AC 1	8A / 230V~ 50,000 Cycles
Incandescent	450W~ 500,000 Cycles
Fluorescent Non Comp.	600W~ 50,000 Cycles
Inductive Load 0.6pf	5A / 230V~ 100,000 Cycles
<b>Min Power</b>	
AC	100mA at 230V
DC	100mA at 12V
Galvanic Isolation	2kV
Standard / Norm	BS EN 60669-2-1
<b>Functional Characteristics</b>	
Timer Range	0.1s - 10 hours
<b>Min. Command Period</b>	
AC	50ms
DC	30ms
<b>Operating Temperature</b>	
Working	-20°C to +50°C
Storage	-40°C to +50°C
<b>Connection Capacity</b>	
Flexible	1 to 6mm <sup>2</sup>
Rigid	1.5 to 10mm <sup>2</sup>

### Technical Specifications

#### Electrical Characteristics

Voltage Supply	230V +10 -15% 50/60Hz
Consumption	1.5VA
Output	1 Changeover Contact 2A 230V AC1

#### Functional Characteristics

4 Temperature Ranges	-30 to 0°C 0 to +30°C +30 to +60°C +60°C to +90°C (Varying accuracy)
----------------------	--

#### Environment

Working Temperature	-10 to +50°C
Storage Temperature	-20 to +70°C

#### Connection Capacity

Flexible	1 to 6mm <sup>2</sup>
Rigid	1.5 to 10mm <sup>2</sup>
Probe	Maximum Distance 50m

### Main Characteristics

#### Multiple Applications

A single device to solve all your problems of regulation or temperature control, from cold room to incubator.

#### Varying Accuracy

The accuracy can be adapted according to the application. e.g.: low for ambient temperature regulation, high for incubator regulation.

#### Safety Feature for Probe Failure

To protect the installation in case of disconnection from the probe. Various connections can be made so the thermostat will be:

- Permanent OFF
- Permanent ON
- Cyclical operation: output ON 1 minute in every 4

#### Display

State of output.

### Product Presentation

1. Selection of the range
2. Adjustment of the temperature setting
3. Selection of temperature range
4. Display of state of output

#### Working Principle

The **EK186** regulates the temperature according to all or nothing principle, it can be associated with different probes, according to the application the accuracy is a function of the temperature range and is selected by a slide switch.

Position on Slide Switch	Temperature range °C			
	-30 to 0	0 to 30	30 to 60	60 to 90
1	± <b>2.15</b>	± 2.54	± 2.98	± 3.43
2	± 0.15	± <b>0.18</b>	± 0.21	± 0.24
3	± 0.38	± 0.45	± <b>0.53</b>	± 0.61
4	± 1.23	± 1.45	± 1.70	± <b>1.96</b>

**Bold** - Preferential accuracies for each temperature range.

#### Example of Choice of Accuracy

- Regulation of ambient temperature  
Range: 0 to +30°C  
Accuracy: ± 0.18°C = 2
- Control of hot water outgoing circuit  
Range: 30 to +60°C  
Accuracy: ± 0.53°C = 3

### Electrical Connection Caution

When the temperature ranges 30 to 60°C and 60 to 90°C are selected and the temperature measured by the probe is below 30°C, the safety feature for probe failure must be "permanent on", until the measured temperature reaches the minimum temperature corresponding to the range (i.e. 30°C for the range 30°C to 60°C and 60°C for the range 60°C to 90°C).

**Technical Specifications**

**Electrical Characteristics**

Voltage Supply	230V +10 -15% 50/60Hz
Consumption	1.5VA
Output	1 Changeover Contact 2A 230V AC1

**Functional Characteristics**

3 Temperature Ranges Controllable by External Setting	Comfort: Adjustable from +5 to +30°C Reduced: Decrease 2 to 8°C in Comparison with Comfort Setting Frost setting: Adjustable from +5 to +30°C Accuracy ±0.2°C
--	--

**Environment**

Working Temperature	-10 to +50°C
Storage Temperature	-20 to +70°C

**Connection Capacity**

Flexible	1 to 6mm <sup>2</sup>
Rigid	1.5 to 10mm <sup>2</sup>
Probe	Maximum Distance 50m

**Product Presentation**

1. Reference setting: comfort TO
2. Decrease in comparison with reference setting: reduced to TO
3. Frost setting
4. Frost setting override

5. Display of state of output i.e. contact position
6. LED indicating the frost override is on.
7. LED indicating the regulation in comparison with a reduced setting

**Electrical Connection**

**Main Characteristics**

- **Temperature settings controllable by external setting** when associating a digital time switch, it is possible to regulate the heating in relation with a program established by the user.
- **2 wires link** between the probe and the unit, enables the easy replacement of the ambient thermostats of an existing installation.
- **Safety feature for "probe failure"** in case of probe disconnection, the output will be switched 1 minute in every 4; so that in case of disconnection during winter, it will protect the installation from frost.
- **Display** of state of the output and of the setting.

**Working Principle**

**EK187** adjusts the temperature under the "all or nothing" principle it is associated to an ambient probe and thus works in closed loop the temperature settings are selected by external settings (contacts free of potential).

**EK187** is thus generally associated to a time switch or a digital time switch in the case of absence of external signal, EK187 regulates the heating in comparison with the reference setting, a switch enables the override of the dispensation setting.

②							
③							

### EK083 Universal Probe

- To associate with **EK186** thermostat
- To associate with **EK187** thermostat and **EK618** time programmable thermostat (for those applications insert in series with the probe a resistance of 1500Ω)

**EK083:** 10 kOhms at 25°C  
cable length: 4m

#### Environment

- Working temperature: -30 to +90°C
- Storage temperature: -30 to +100°C

### Electrical Connection

- Associated with **EK186**

- Associated with **EK187 - EK618**

### Examples of Applications

#### Use with the clamp collar

- For the control of hot water

#### Use with the clamp collar

- Protected by a sheath for the control of floor temperature

- Used as an external probe in a weatherproof box.

### Resistance of Probes According to Temperature

Temperature °C	EK083 R (KΩ)	EK081* R (KΩ)	EK081** EK082 R (KΩ)

# Lighting, Connection & Control

Lighting creates an impression. Klik, our lighting connection system provides the roots to a buildings lighting system, allowing it to adapt and grow with ease. Controls, including occupancy sensors, ensure that light is only available when needed and tailored to a users needs.

Our lighting offer also extends to our new range of LED lights and IP55 outdoor sensors, which will brighten up the night and secure your surroundings.

KLMB4W

## Marshalling Boxes - Wire In, Plug Out

### Characteristics:

- The KLMB marshalling box allows the connection and control of multiple luminaires. The marshalling box utilises a robust extruded aluminium body.
- 7 Pole.
- 4, 6, 8, 10 & 12 outlets.
- 16A Rated BS 5733:2010 .
- Short circuit tested: 1500A conditional rating.

Description	Cat ref.

## Klik 7 Pre-wired Plugs with Sockets

### Characteristics:

- Connections to the luminaire are made via a pre-wired plug and lead. All leads are low smoke zero halogen and are factory connected and tested.
- Standard, digital and emergency luminaires.
- Short circuit tested: 1500A conditional rating.
- Cable standard BS 7211.

Description	Cat ref.
<b>Pre-wired Plugs and Sockets for Standard Luminaires</b>

**Ceiling Roses**

**Characteristics:**

- 7 Pole conduit box / surface connector to allow the easy connection of digital lighting within traditional fixed wire installations. The connector is fitted directly to trunking or conduit allowing the luminaire to be connected / disconnected via the pluggable luminaire lead.
- 7 Pole.
- 16A Rated.
- Standards: BS 5733:2010.
- Short circuit tested: 1500A conditional rating.

K7PLUGPCR

**Wireable / Rewireable Plug**

**Characteristics:**

- 7 Terminal plug, enabling you to make leads on site to the configuration required.
- Complies with BS EN 61535-2009+A1-2013
- Enables you to add the plug after cable routing, for example when cables pass through walls.

EEK001

### Occupancy Sensors with Remote Programming & Control Options

#### Characteristics:

- **EEK520B** - Detector for control of digital (DSI/DALI) luminaires
- Direct control of a light load.
- Lux level and ON delay adjustable via potentiometers or **EEK001** remote control.
- DALI/DSI bus output accommodates up to 24 ballasts.
- 230V wall switch override.
- Presence or absence detection available.
- **EEK523P** - As **EEK520B** but pre-wired with 3m Lead
- **EEK525P** - As **EEK520B** but pre-wired with 5m Lead
- **EEK513P** - detector for control of standard luminaires (On/Off)
- Presence or Absence detection available.
- Programmable from **EEK001**
- 7m Range
- **EEK515P** - As **EEK513P** but pre-wired with 5m Lead
- **EEK001** - IR programming tool
- Installer remote control to commission settings.
- **EEK002** - IR remote control
- Customer remote control for override operation.
- Complies with BS EN 60669-1 & BS EN 60669-2-1.

### Semi-Recessed Occupancy Sensor

**Characteristics:**

- The presence area is especially suitable in offices, where there may be notional corridors.
- **EE810** - 1 channel detector
- Provides direct control of a light load or can be used as a slave with **EE811** for enlargement of detection area.
- Lux level and ON delay (duration or pulse) defined via potentiometers.
- Test mode in order to set lux level and the detection pattern.
- **EE811** - 2 channel detector
- Lux level and ON delay adjustable via potentiometers.
- Input for slave (**EE810**) and/or remote push button.
- 230V wall switch override.
- Complies with BS EN 60669-1 & BS EN 60669-2-1.

### Hyper Frequency Detector

**Characteristics:**

- The detection range diameter is adjustable from one to eight metres. The hyper frequency sensor allows for detection of movement through partitions (drywall, wood, glass) independent of temperature detection.

**Features**

- 230V AC.
- IP54 rated.
- Detection area 360°.
- Complies with BS EN 60669-1, BS EN 60669-2-1.

EE883

Description	Cat ref.
360° Hyper Frequency Sensor	<b>EE883</b>

### Corridor Motion Detector

**Characteristics:**

- Infra-red corridor motion detector for surface mounting.

**Features**

- 230V AC.
- IP54 rated.
- Detection zone of 4m x 20m.
- Overrun timer from 5 seconds to 15 minutes.
- Complies with BS EN 60669-1 & BS EN 60669-2-1.

KLCM413W

KlikLink App (Shown on iPad, not included)

### Lighting Control Module with KlikLink

**Characteristics:**

- The KLCM allows connection and control of multiple luminaires with four separate channels.
- Switching, dimming (DSI & DALI), corridor hold, partition switching, daylight switching & dimming, scene settings, integral emergency test times, reset profiles, light level offset (channel to channel).
- Setting up of **KLCM** is accomplished via KlikLink app, available on iOS for iPad.

### Marshalling Boxes

#### Characteristics:

- Klik marshalling boxes are used in conjunction with Klik 3 and 4 pin plugs to connect luminaires within an area. The Klik marshalling box can be separated into two independently switched circuits. These circuits can be controlled via wall switch or occupancy sensor.
- Complies with BS 5733:2010.
- Main terminal rating: 16 Amps.
- Socket outlet rating: 6 Amps.
- Separate terminals for flexible conductors, rating: 10 Amps.
- Short circuit tested 1500A conditional rating.
- Socket outlets accept either Klik lighting (3 pin) plugs, Klik auxiliary (4 pin) plugs.

### Outdoor IP55 Motion Detectors

- These devices are made for automatic control of lighting.
- Detection head with fresnel lenses and PIR detectors.

#### Features:

- Available with a variety of detection zones.
- Enhanced versions include a secondary detection zone directly beneath the sensor head.
- Time, lux and sensitivity can be adjusted locally via potentiometers.
- The enhanced range can be set with a remote control providing speed and convenience when setting final adjustments.
- Detectors can be mounted in corners or to ceilings, utilising the relevant mounting accessory.

#### Power Supply:

- Basic detector: 230V AC (50/60Hz)
- Switching capacity: 10A AC1 relay and cut phase.
- Enhanced detector: 230V AC Output: 16A AC1 relay potential free.
- Complies with EN 60669-1 & EN 60669-2-1.

## Mounting Options for Trunking

Mounting Accessory can be clipped into the rear or top channel slot. It can be easily removed by inserting a screwdriver in the RELEASE slot.

## Fixed Wiring Connection

Klik 7 Pin LMB has seven screw terminals available to the installer and are arranged in the end cap as per diagram. DA+/DA- connections can be used for DALI/DSI control.

## Mounting Options for Drop Rod (Lighting Marshalling Box)

### Option 1.

Klik 7 Pin LMB features open ends to allow you to slide the box into position before tightening for easier installation, or push the box up on to the nut and rotate to locate and tighten to secure.

### Option 2.

Single sided LMB can be mounted from the top as option 1 or from the rear as shown. Note: Double sided LMBs can only be mounted with option 1.

## Mounting Options for Wall & Ceiling

Klik 7 Pin LMB includes the Klik mounting accessory, this makes it much easier to mount LMB with Nail Guns or traditional fixings. 2 accessories are included with each LMB. Mounting Accessory can be clipped into the rear or top channel slot. It can be easily removed by inserting a screwdriver in the RELEASE slot.

**Note: Double sided LMB can only be mounted on top channel slot.**

KLMB266W

**Grouped Circuits - Control**

1. Grouped Circuits Channel A can be controlled by using pluggable sensors and/or pluggable switch. Alternatively hard wired sensors and/or switches can be used.

2. Grouped Circuits Channel B must use pluggable sensors and/or switches for control.

**KLPCR - Surface Mount Connector**

PCR can be mounted in two ways, firstly on to conduit box or secondly direct on to a surface.

Terminating cables.  
Terminal screws are retained in pockets.  
Max Terminal Capacity 2x4mm<sup>2</sup>  
Conductor strip length: 10mm.

**K7PLUG Wireable Plug Configurations and Labels**

**Self Adhesive ID Labels:**

Apply label for the type of lead you are making.

Lighting configurations for on / off and dimmable solutions.

**Luminaire Connections**

**Switch Drops**

**Link Lead**

### EEK Sensors

#### Detection areas

H	2.5m	3m	3.5m
X	5m	5m	5m
Y	7m	8m	9m

#### Settings EEK513P/EEK515P EEK523P/EEK525P

#### Mounting

### EE804A / EE805A Sensors

1. Connecting terminals
2. Mounting device locking screw
3. Release opening
4. Fastening grids
5. Detector lens
6. Response brightness potentiometer
7. Potentiometer delay time

8. Cover for potentiometer
9. Locking screw
10. Fixing springs
11. Strain relief with mounting device for cable ties
12. Cover for connection compartment

### Manual dimming with retractable switch (no OS)

Hager Sollysta retractable wall switch  
reference: **WMSG13R**

## Klik 7 Pin Product Standards

Product Description	Klik Product identification	BS number	Description
Klik 7 pin Marshalling Boxes	KLMB*W	BS 5733:2010	General Requirements for Electrical Accessories.
Occupancy Sensor	EEK*	IEC 60669-1, IEC 60669-2-1	Switches for household & similar fixed electrical installations Part 2-1 for Electronic switches.
Conduit Box / Surface Connector	KLPCR/7	BS 5733:2010	General requirements for Luminaire supporting couplers for domestic, light industrial & commercial use.
Luminaire Leads	KLB*, KLJ*, KLP*, KLT*	BS 5733:2010 BS EN 61535	Thermosetting insulated & thermoplastic sheathed cables for voltages up to & including 450 / 750 V for electric power & lighting & having low emission of smoke & corrosive gases when affected by fire.
LS0H Flexible Cord	Supplied with luminaire lead	BS 6500:2000 BS 7211:2012	Thermosetting insulated & thermoplastic sheathed cables for voltages up to & including 450 / 750 V for electric power & lighting & having low emission of smoke & corrosive gases when affected by fire.

### Product Materials

Klik plugs and sockets feature solid brass terminals and phosphor bronze contacts for good conductivity. Moulded components are manufactured from high quality thermoplastics.

### Klik Terminal Capacities

	Number of Conductors				
	0.75mm <sup>2</sup>	1.0mm <sup>2</sup>	1.5mm <sup>2</sup>	2.5mm <sup>2</sup>	4.0mm <sup>2</sup>
Socket Outlets	-	5	4	3	2
Plugs P22, P64X, P26 K7PLUG	1	1	1	-	-

The acknowledgment LED blinks during the sending of the IR message.

**Technical specification**  
Power supply: 1x 3V CR2032  
Shelf life of battery: 2½ years  
Protection index: IP 30

**Use**

The remote control allows the user to set or modify presence detector settings. When the potentiometer is on auto test it allows single and multiple settings. The SET key is used to send the IR messages to the occupancy sensors. Multiple settings can be stored in Memo 1 and Memo 2 and re-called to set several devices.

**Single setting**

Example: reset

**Multiple settings**

Define the parameters to be changed and press SET to send.

Example: for 25 minutes and corridor use, press 20', 5' and corridor.

In the case of 2 opposite states the green LED denotes ON and red LED denotes OFF (except Presence / Absence).

When no function is selected all LED's are OFF.

**Settings available**

Key	Meaning	Indication	Function
	Presence	Green LED on	Presence on (automation mode)
	Absence	Red LED on	Absence on (semi automatic mode)
	Power Up	Green LED on	The light is automatically switched on for 30 seconds after power up
		Red LED on	During warm up phase, the light output is off
Reset	Reset	LED on	To return to factory settings (Lux = 400, time = 20 min, presence on, power up off and cell active)
Test	Test	LED on	To validate the detection area
	Time	LED on	To set the time It is possible to add times together e.g. press 2' and 5' for a time value of 7'
	Day level 1000 Lux	LED on	To set the value to 1000 Lux
	Learn	LED on	To learn the current Lux level
	Corridor 200 Lux	LED on	To set the value to 200 Lux
	Office 400 Lux	LED on	To set the value to 400 Lux
+	Lux +	LED on	To increase the Lux level (+100)
-	Lux -	LED on	To decrease the Lux level (-100)
	Active cell	Green LED on	The light is continuously measured
	Passive cell	RED LED on	The sensor will not switch the light off even if the ambient luminosity is sufficient
<b>Memo and set Key</b>	<b>Meaning</b>	<b>Indication</b>	<b>Function</b>
Memo 1	Press	LED is on until a setting is changed	To load/unload Memo 1
	Long press	LED is on for 5s, then will blink until released. After release, the LED goes off in case of setting change	To save the current setting as Memo 1
Memo 2	Press	LED is on until a setting is changed	To load/unload Memo 2
	Long press	LED is on for 5s, then will blink until released. After release, the LED goes off in case of setting change	To save the current setting as Memo 2
SET	Short press (<5s)	LED flashes	To send an IR message of the current setting
	Long press (>5s but <10s) only available if no setting active	LED blinks until release press	To toggle automatic mode on DALI/DSI

**Use**

The remote control allows the user to set or modify settings on the presence detectors **EEK513W** and **EEK510B**.

Each button corresponds to a command.

The acknowledgment LED blinks during the sending of the IR message.

**Technical specification**

Power supply: 1x 3V CR2032  
Shelf life of battery: 3½ years  
Protection index: IP 30

**Settings available**

Key	Action	Function	Product Type
on +	Short Press (< 5s.)	On	<b>EEK513W / EEK510B</b>
	Long Press (> 5s.)	Dim up	<b>EEK513W / EEK510B</b>
off -	Short Press	Off	<b>EEK513W / EEK510B</b>
	Long Press (> 5s.)	Dim down	<b>EEK513W / EEK510B</b>
1	Short Press	To start scene 1	
2	Short Press	To start scene 2	
3	Short Press	To start scene 3	
4	Short Press	To start scene 4	

## Fixing Methods

Drop Rods

Trunking  
(Not possible for plug-in **KLCM412P**)

Direct: e.g. nail gun or screw fixing  
(not possible for hard-wire **KLCM413W**)

## Switch inputs - 1 to 4 (retractive wall switch ref: WMGS13R)

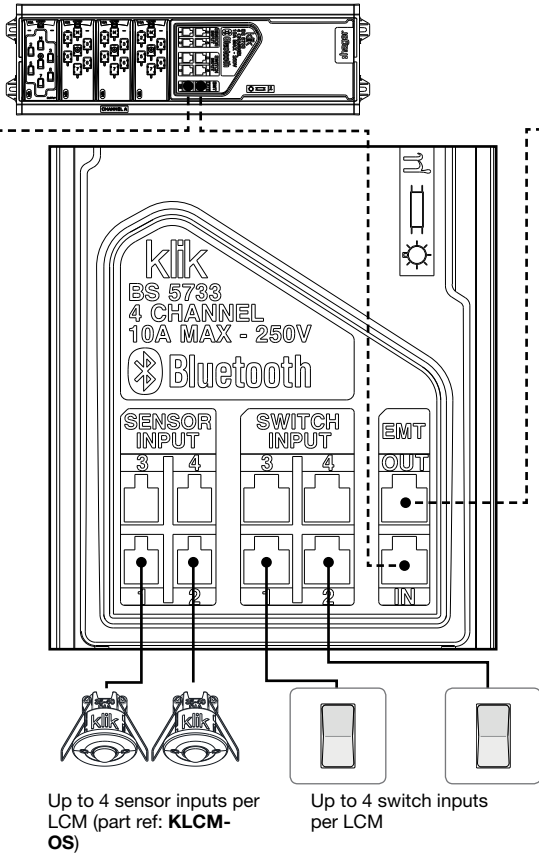

## Emergency test in & out

Orange/White	Override - All Outputs On
Orange	Override - All Outputs Off
Green/White	Corridor Hold Line
Blue	Emergency Test (Timer 1)
Blue/White	Emergency Test (Timer 2)
Green	Emergency Test (Timer 3)
Brown	Common
Brown/White	Not Used.

## Occupancy Sensor Technical Characteristics

Technical Characteristics	KLCM-OS	KLCM-3OS	KLCM-5OS
Supply Voltage	12V DC	SELV (12VDC)	SELV (12VDC)
Detection Area	Motion area: diameter 6m (product installed at 2½m height) presence area: diameter 6m (product installed at 2½m height)	360° 5m to 15m	360° 15m

Polution degree	2	2	2
Connection	RJ11	RJ11 6P4C	RJ11 6P4C
Dimensions		High: 70mm, Diameter: 101mm	High: 70mm, Diameter: 101mm
Weight		110 grams	110 grams
Mounting hole diameter		85mm	85mm

- Plug-in sensor and switch control
- Any port can be configured via the KlikLink App.
- Grouping LCMs via RJ45 leads for corridor hold and groups for emergency test
- Programmed via the KlikLink app. Download from the App Store.

**Wiring accessories from the Sollysta Grid range**

Centre off retractive switch module	<b>WMGS13R</b>
White moulded Grid Plates	<b>WMGPx</b> (1,2,3,4,6 & 8) G
Grid Frames	<b>WMGFx</b> (1,2 & 3/4) G

**Technical Characteristics**

Number of channels	4			
Number of outputs per channel	3 (hard wired LCM has 4 outputs on channel A)			
Number of sensor inputs	4 ( <b>KLCM-OS</b> )			
Number of switch inputs	4			
Supply Voltage	230V AC 50Hz			
Rated current	10A (total load)			
Rated current each connector	10A			
Complies with	BS 5733:2010, BS EN 60669-2-5 BS EN 61535:2009 - (Excluding clauses 10.1 and 10.3 due to Aluminium enclosure)			
IP protection	IP20			
Connection for programming	Bluetooth Smart (Bluetooth 4) (only available on Apple iPad)			
Dimensions	Height 145mm	Width 440mm	Depth 58mm	Weight 1.9kg

**Supply input connection**

**Hard wired**

**Pluggable**

- Connecting the supply lead: plug in and push down
- Disconnecting the supply lead: press button and push up.

**Plug colour coding**  
White: Luminaire Lead  
Red: Luminaire & Emergency  
Black: Link Lead

### Mounting Methods

- Hanging from ceiling suspension system with Caddy Clips™
- Direct fixing to lighting trunking
- Direct fixing to ceiling or wall with No. 8 screws

Drop rods on sides

Screw to surface

Drop rods on rear

### Local Lighting Switch Control Permanent emergency feed

### Local Lighting Switch Control Centralised emergency test via key switch

### Zone Lighting Control Local emergency test control

Lighting, Connection & Control

### All ways switched by a single Hager EEK513W occupancy sensor

Switch wire to be connected as required.

### Connected directly to a single luminaire

1. Strip cable as above -  
**Note:** Trim cable tails to double over for better terminal contact.

2. Remove plug cover.  
3. Pass cable through plug cover centre hole.

4. Terminate conductors into terminals.  
5. Push outer sheath of cable firmly into jaws of sheath grip, making sure that at least 2mm of sheath protrudes below the grip.

6. Refit cover.

**PCR2000**

**CR64AX**

**CR64AX**

Note: earth connections omitted for clarity

# Residential Distribution

Functional, stylish, and innovative, our Design Range of consumer units provide an exceptional option for any home. In addition, we offer MCB's and RCBO's as well as new surge protection and arc fault detection solutions to provide optimal protection.

100 A  $I_{nA}$  Consumer unit enabling conformity with 18<sup>th</sup> Edition wiring regulations for overload protection of RCCBs and switches, in any single phase residential application regardless of the current rating of the supply authority fuse. Type A RCDs are provided, these devices can detect AC sinusoidal waveforms and pulsating DC components.

VM106

### Switch Disconnecter Incomer

#### Characteristics:

- Metal switch disconnecter incomer consumer units, single row from 2 to 20 and dual row from 6+6 to 20+20 outgoing ways.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- Supplied with a full metal DIN rail, 100A switch disconnecter incomer and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- References ending in **SPD** come with a Type 2 SPD fitted.
- Recommended for use with TT systems when utilising RCBO on outgoing circuits.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

### RCCB Incomer

#### Characteristics:

- Metal RCCB incomer consumer units, single row from 2 to 14 and dual row contains 6+6 outgoing ways.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, 40A, 63A or 100A 30mA RCCB incomer and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

**Split Load**

**Characteristics:**

- Metal split load and configurable consumer units, single row from 6 to 16 and dual row from 4+6 to 18+20 outgoing ways.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, 100A switch disconnecter incomer, 2 100A RCCBs and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

**Configurable**

**Characteristics:**

- Metal split load and configurable consumer units with ability to protect selected circuits with RCBOs and the remainder of circuits split across two RCCBs. Single row from 10 to 16 and dual row from 8+10 to 18+20 outgoing ways.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, 100A switch disconnecter incomer, 2 100A RCCBs and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- References ending in **SPD** come with a Type 2 SPD fitted.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

with Surge

100 A  $I_{nA}$  Consumer unit enabling conformity with 18<sup>th</sup> Edition wiring regulations for overload protection of RCCBs and switches, in any single phase residential application regardless of the current rating of the supply authority fuse. Type A RCCDs are provided, these devices can detect AC sinusoidal waveforms and pulsating DC components.

VM918C

### Multi Tariff

#### Characteristics:

- Metal switch disconnecter incomer consumer units, single row 12 or 18 and dual row 10+14 outgoing ways.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, multiple switch disconnecter incomers and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

### Time Delayed RCCB Incomer

#### Characteristics:

- Metal RCCB incomer consumer units, single row 12 outgoing ways.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, 100A 100mA time delayed incomer, 63A 30mA RCCBs and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- References ending in **SPD** come with a Type 2 SPD fitted.
- Recommended for use with TT systems (meter tail clamp secures meter tails to prevent accidental disconnection and contact with metal enclosure).
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

VM24AH

### Garage Board

#### Characteristics:

- Consumer unit comes complete with Type A RCCBs, 40A 30mA RCCB Incomer, 32A MCB and 6A MCB, earth & neutral connections, busbar, cable protector plate, grommet strip, meter tail clamp, marking labels & instructions.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- For dimensions see page 4.25, refer to board sizes below.

2 Way 40A 30mA Type A RCCB with 1x 32A & 1x 6A MCB	2	<b>VM24AH</b> ★	<b>VM24AHK</b> ★

**Arc Fault Detection**

**Characteristics:**

- Metal split load board with 100A incomer and 2 x 100A RCCBs.
- Supplied with Type A RCCBs
- Supplied with double pole busbar system.
- All consumer units contain rear cable entry. Boards with knockouts have top & bottom knockouts. A meter tail cable entry plate (**VM04CE**) is provided as standard - see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, switch disconnecter incomer and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- Conforms to BS EN 61439-3
- Suitable for use with Hager AFDD ARC\*\*\*
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

VML106

### Switch Disconnector Incomer

#### Characteristics:

- Metal switch disconnector incomer consumer units, single row from 2 to 20 and dual row from 6+6 to 20+20 outgoing ways.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Supplied with a full metal DIN rail, 100A switch disconnector incomer and a full complement of earth and neutral terminals along with marking labels, busbar and instructions.
- References ending in **SPD** come with a Type 2 SPD fitted.
- Recommended for use with TT systems when utilising RCBO on outgoing circuits.
- We also recommend the use of cable clamp (**VA10MT**) for use on TT systems, available as an accessory.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

VML410AH

### RCCB Incomer

#### Characteristics:

- Metal RCCB incomer consumer units, single row from 2 to 14 and dual row 6+6 outgoing ways.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, 40A, 63A or 100A 30mA RCCB incomer and a full complement of earth and neutral terminals along with marking labels, busbar and instructions.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

Description	Size	Cat ref.

**Configurable**

**Characteristics:**

- Metal split load and configurable consumer units with the ability to protect selected circuits with RCBOs and the remainder of circuits split across two RCCBs. Single row from 10 to 16 and dual row from 8+10 to 18+20 outgoing ways.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, 100A switch disconnecter incomer, 2 RCCBs and a full complement of earth and neutral terminals along with marking labels, busbar and instructions.
- References ending in **SPD** come with a Type 2 SPD fitted.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25.

with Surge

100 A  $I_{nA}$  Consumer unit enabling conformity with 18<sup>th</sup> Edition wiring regulations for overload protection of RCCBs and switches, in any single phase residential application regardless of the current rating of the supply authority fuse. Type A RCCDs are provided, these devices can detect AC sinusoidal waveforms and pulsating DC components.

VML918C

### Multi Tariff

#### Characteristics:

- Metal switch disconnecter incomer consumer units, single row 12 or 18 and dual row 10+14 outgoing ways.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, multiple switch disconnecter incomers and a full complement of earth and neutral terminals along with marking labels, busbar and instructions.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25.

### Time Delayed RCCB Incomer

#### Characteristics:

- Metal RCCB incomer consumer units, single row 12 outgoing ways.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail 100A 100mA time delayed incomer and 100A 30mA RCCB incomers and a full complement of earth and neutral terminals along with marking labels, busbar, meter tail clamp and instructions.
- Recommended for use with TT systems (meter tail clamp secures meter tails to prevent accidental disconnection and contact with metal enclosure).
- References ending in **SPD** come with a Type 2 SPD fitted.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

### Garage Boards

#### Characteristics:

- Consumer unit comes complete with Type A RCCB, 40A 30mA RCCB Incomer, 32A MCB and 6A MCB, earth & neutral connections, busbar, grommet strip, marking labels & Instructions.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Cable protector plate for rear knockouts is available as an accessory. (**VM02CE**)
- Conforms to BS EN 61439-3
- For dimensions see page 4.25.

**Arc Fault Protection**

**Characteristics:**

- Metal split load board with 100A incomer and 2 x 100A RCCBs.
- Supplied with Type A RCCBs
- Supplied with double pole busbar system.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Supplied with Type A RCCBs, a full metal DIN rail, switch disconnecter incomer and a full complement of earth and neutral terminals along with marking labels, busbar and instructions.
- Conforms to BS EN 61439-3, Annex ZB (16kA Rating)
- Suitable for use with Hager AFDD ARC\*\*\*\*
- For accessories see page 4.19, for dimensions see page 4.25, refer to board sizes below.

### Characteristics:

- Metal split load and configurable consumer units with the ability to protect selected circuits with RCBOs and the remainder of circuits split across two RCCBs. Single row from 10 to 16 and dual row from 8+10 to 18+20 outgoing ways.
- All Design 10 consumer units contain top, bottom & rear knockouts and a meter tail cable entry plate (**VM04CE**) as standard- see page 4.25 for knockout sizes.
- Supplied with a full metal DIN rail, 100A switch disconnecter incomer, 2 Type A RCCBs and a full complement of earth and neutral terminals along with marking labels, busbar and instructions.
- References ending in **SPD** come with a Type 2 SPD fitted.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- For accessories see page 4.19, for dimensions see page 4.25.

VML616C

with Surge

63 A  $I_{nA}$  consumer unit enabling conformity with the 18<sup>th</sup> Edition wiring regulations for overload protection of RCCBs and switches only when the current rating of the upstream overcurrent protective device is known to be 60/63 A. Type A RCDs are provided, these devices can detect AC sinusoidal waveforms and pulsating DC components.

### Configurable

#### Characteristics:

- Metal split load and configurable consumer units with the ability to protect selected circuits with RCBOs and the remainder of circuits split across two RCCBs. Single row from 10 to 16 outgoing ways.
- All consumer units contain rear cable entry, along with top & bottom knockouts.
- Supplied with a full metal DIN rail, 100A switch disconnecter incomer and 2 Type A RCCBs and a full complement of earth and neutral terminals along with marking labels, busbar, instructions, rear cable protector plate and meter tail clamp.
- References ending in **SPD** come with a Type 2 SPD fitted.
- Conforms to BS EN 61439-3 Including Annex ZB (16kA rating).
- Adjustable depth in wall 72mm-92mm.
- For accessories see page 4.19, for dimensions see page 4.26.

VM02CE

### Cable Protector Plate

**Characteristics:**

- Provides protection against sharp edges for cables entering a consumer unit.
- **VM01CE:** Simply insert protector plate and bend over tabs inside board.
- **VM02CE:** Designed to fit into the aperture left by the removal of a rear knockout on the Design 10, Design 30 & Design 50 Consumer Unit. (Included as standard with Design 30 & 50 consumer units). Break away sections as required and simply push into place.
- **VM03/04:** Simply clip into place to allow cable entry or blanking of removed knockouts.

VM10MT

### Cable Clamp

**Characteristics:**

- Secures supply cables on entry to main incoming device, eliminating any movement of the cables being transmitted to the terminals.
- Simply insert supply cables through clamp into incoming device & secure with fixing provided.
- (Included as standard with Design 30 & 50 consumer units)

Description	Cat ref.
Cable Clamp for Meter Tails	<b>VA10MT</b>

VMLOCK

### Locks

**Characteristics:**

- **VMLOCK** allows door to be lockable. Simply remove the centre of the lock surround and the knockout behind, and fit lock.
- Provides the ability to lock the consumer unit during the installation process.
- Can only be used with Design 30 consumer units.

Description	Cat ref.

MTN106

### MCBs - Single Pole, B Curve, 6kA

#### Characteristics:

- Protection and control of circuits against overloads and short circuits for use in domestic installations.
- Complies with BS EN 60898.
- Voltage rating: 230V
- Current rating: 6 - 63A
- Connection capacity: Rigid = 25mm<sup>2</sup>, Flexible = 16mm<sup>2</sup>
- Calibration temperature: 30°C

ADA332G

### Reduced Height RCBO - Single Pole, B Curve, 6kA, 30mA, Type A

#### Characteristics

- Protection devices which combine the overcurrent functions of an MCB with the earth fault functions of an RCCB.
- Complies with BS EN 61009-1, BS IEC 1009-2-2
- Single module width
- Sensitivity: 30mA
- Current rating: 6 - 32A
- Connection capacity: Rigid = 16mm<sup>2</sup>, Flexible = 10mm<sup>2</sup>
- Flying neutral lead: 300mm
- Single pole & solid neutral
- Type A (Pulsating DC Sensitive)
- Operational Voltage: 127-230V AC

MZN175

### Locking Kit

#### Characteristics:

- Allows MCBs, RCCBs and RCBOs to be locked in the off position.
- Will accept two padlocks with hasps of 4.75mm diameter max (supplied without padlock).

Description	Cat ref.
Padlockable Locking Kit for MCB, RCCB & RCBO (Padlock not Included)	<b>MZN175</b>
Padlock with 2 keys 3/4"	<b>JK25A</b>

### Arc Fault Detection Devices

**Characteristics:**

- Protection device which combines an MCB with an Arc Fault Detection Device.
- Complies with BS EN 62606
- Current rating 6A - 40A 6kA
- Available in B & C curve
- Connection capacity - Rigid=25mm<sup>2</sup>, Flexible = 16mm<sup>2</sup>

### Surge Protection

#### Characteristics

- SPD's protect electrical and electronic equipment against transients, originating from lightning, switching of transformers, lighting and motors. These transient voltages can cause premature ageing of equipment, downtime, or complete destruction of electronic components and materials. SPDs are strongly recommended on installations that are exposed to transient voltages, to protect sensitive and expensive electrical equipment such as TV, video, Hi-Fi, PC, alarm etc.

- The range of SPDs is separated into 3 types of protection:

**1. Main protection - Type 1** - SPDs with higher discharge current ( $I_{max}$  10/350), to evacuate as much of the transient over-voltages associated with lightning strikes

**2. Main protection - Type 2** - With a discharge current ( $I_{max}$  8/20), to evacuate as much of the transient over-voltage to earth as possible protection level ( $U_p \leq 1000V$ ).

**3. Main protection - Type 3** - To cut-down the transient surge as low as possible to protect very sensitive equipment.

#### Technical Data

- Complies with IEC61643-1.

- D Versions: end of life indicator, auxiliary contact for remote indication.

- R Versions: reserve status indicator, signalling.

- Connection Capacity (terminal blocks L, N & E): Rigid conductor: 10mm<sup>2</sup>, Flexible conductor: 6mm<sup>2</sup>.

- 230V a.c. 1A. 12V...10mA.

#### Installation and Connection

- The main protection SPDs are installed directly after the main incoming switch or RCCB

- Connected in parallel to the equipment to be protected.

- Protection is assured in both common and differential modes.

#### Replacement Cartridges

- Allow simple replacement without the need to cut-off the power supply.

- Cartridges are available for all discharge currents, (40kA and 15kA) with and without condition indication.

- A keying system exists to prevent a line cartridge being interchanged by mistake with a neutral one and visa versa neutral cartridges have a discharge current of 65kA.

- For technical details see page 4.29.

#### Reserve Indicator Light

Neutral cartridges cannot be put into spares reserved for phase cartridges and visa versa.

### MTN Electrical Characteristics.

Poles	Rated Operational Voltage $U_e$ (V)	Nominal Current	Breaking Capacity ( $I_{cn}$ ) to BS EN 60898	Breaking Capacity ( $I_{cs}$ ) to BS EN 60898	Rated Insulation Voltage $U_i$ (V)	Rated Impulse Voltage $U_{imp}$ (kV)	Electrical Endurance	Connection of Auxiliaries
Single Pole	230	6 - 63A	6kA	6kA	500V	4kV	10,000 cycles	No

### Power Loss

The power loss of MCB's is closely controlled by the standards and is calculated on the basis of the voltage drop across the main terminals measured at rated current. The power loss of hager circuit breakers is very much lower than that required by the British Standard, so in consequences run cooler and are less affected when mounted together.

The table below gives the watts loss per pole at rated current.

MCB Rated current (A)	0.5	1	2	3	4	6	10	13	16	20	25	32	40	50	63
Watts loss per pole	1.2	1.3	1.5	2.0	1.8	1.4	1.9	2.1	2.5	2.8	3.2	3.8	4.0	4.5	5.1

### Connection

The circuit breaker can have the line/load connected to either the top or bottom terminals

### Temperature Derating

MCBs are designed and calibrated to carry their rated current and to operate within their designated thermal time/current zone at 30°C. Testing is carried out with the breaker mounted singly in a vertical plane in a controlled environment. Therefore if the circuit breaker is required to operate in conditions which differ from the reference conditions, certain factors have to be applied to the standard data.

$I_n$ (A)	-25°C	-20°C	-15°C	-10°C	-5°C	0°C	5°C	10°C	15°C	20°C	25°C	30°C	35°C	40°C	45°C	50°C	55°C	60°C

### SPA201 Technical Characteristics

		SPA201
Tested to		EN 61643-11 2002-12
SPD type / class		Type 1 + Type 2 / Class I
Energy-coordinated protection effect on terminal equipment		Type 1 + Type 2
Energy-coordinated protection effect on terminalequipment ≤ 5 m		Type 1 + Type 2 + Type 3
Type of connection		Parallel connection
Type of power supply system		TT / TN system
Type of protection		common and differential modes
Nominal voltage	$U_N$	230V/400V ac
Rated voltage	$U_C$	255V ac
Voltage protection level	$U_P$	≤ 1.5kV
TOV Voltage	$U_T$	440V / 5s 1200V / 200ms
Rated load current	I(L)	n/a
	I(L-L)	n/a
Follow current interrupting rating	$I_{fi}$	25kA rms 100A rms
Nominal discharge current (8/20)	$I_n$	12.5kA 25kA
	$I_{imp}$	12.5kA 25kA
Max. rating of overcurrent protection	fuse	160A gL / gG
	MCCB	n/a
Short-circuit withstand capability with max. overcurrent protection	fuse	25kA rms
	MCB	n/a
Response time	$t_A$	≤ 100ns
Operating temperature range		- 40°C .....+ 80°C
Indication of SPD disconnecter		Green/Red flag on L and N
Cross sectional area	min	1,5mm <sup>2</sup> solid / flexible
	max	35mm <sup>2</sup> stranded / 25mm <sup>2</sup> flexible
Tightening torque for terminals		4 Nm
Mounting on		35mm DIN rail in accordance with EN 60715
Enclosure material		grey thermoplastic, UL 94V-0
Degree of protection		IP20
Modular width		2
Weight		275 g
Approval marking		KEMA

### SPN215D/R Technical Characteristics

		SPN215D/R
Tested to		EN 61643-11 (VDE0675-6-11) 2002-12
SPD type		Type 2 according to EN 61643-11
SPD class		Class II according to IEC 61643-1
Type of connection		Parallel connection
Maximum continuous operating voltage $U_C$	Line / Neutral	≤ 255V
	Neutral/ PE	≤ 275V
Voltage protection level	$U_P$	≤ 1kV
Nominal discharge current (8/20 μs) [(DC+/DC-) --> PE]	$I_n$	5kA
Max. discharge current (8/20 μs) [(DC+/DC-) --> PE]	$I_{max}$	15kA
Short-circuit withstand capability with max. overcurrent protection		10kA - 32A
Operating temperature range		- 40°C .....+ 80°C
Indication of SPD disconnecter		Green - Yellow - Red
Cross sectional area	min	1,5mm <sup>2</sup> solid / flexible
	max	35mm <sup>2</sup> multi-stranded / 25mm <sup>2</sup> flexible
Tightening torque for terminals		4.0 Nm
Mounting on		35mm DIN rail in accordance with EN 60715
Enclosure material		grey thermoplastic, UL 94V-0
Degree of protection		IP20
Modular width (DIN 43880)		2
Auiliary contact. Voltage/ nominal current (only applicable on the R suffix products)		230V/ 0.5A 12Vdc 10mA

### SPV325 Technical Characteristics

		SPV325
Tested to		EN 61643-11 (VDE0675-6-11) 2002-12
SPD type		Type 2 according to EN 61643-11
SPD class		Class II according to IEC 61643-1
Type of connection		Parallel connection
Maximum continuous operating voltage	$U_{cPV}$	$\leq 1000V$
Voltage protection level	$U_p$	$\leq 4kV$
Voltage protection level for 5kA	$U_p$	$\leq 3,5kV$
Total discharge current (8/20 $\mu s$ )	$I_{total}$	40kA
Nominal discharge current (8/20 $\mu s$ ) [(DC+/DC-) --> PE]	$I_n$	12.5kA
Max. discharge current (8/20 $\mu s$ ) [(DC+/DC-) --> PE]	$I_{max}$	25kA
Short-circuit withstand capability with max. overcurrent protection	$I_{scwPV}$	50 A / 1000 V DC
Response time	$t_A$	$\leq 25ns$
Operating temperature range		- 40°C .....+ 80°C
Indication of SPD disconnecter		green - red
Cross sectional area	min	1.5mm <sup>2</sup> solid / flexible
	max	35mm <sup>2</sup> multi-stranded / 25mm <sup>2</sup> flexible
Tightening torque for terminals		4.0 Nm
Mounting on		35mm DIN rail in accordance with EN 60715
Enclosure material		Grey thermoplastic, UL 94V-0
Degree of protection		IP20
Installation width		3 modules, DIN 43880
Weight		316g

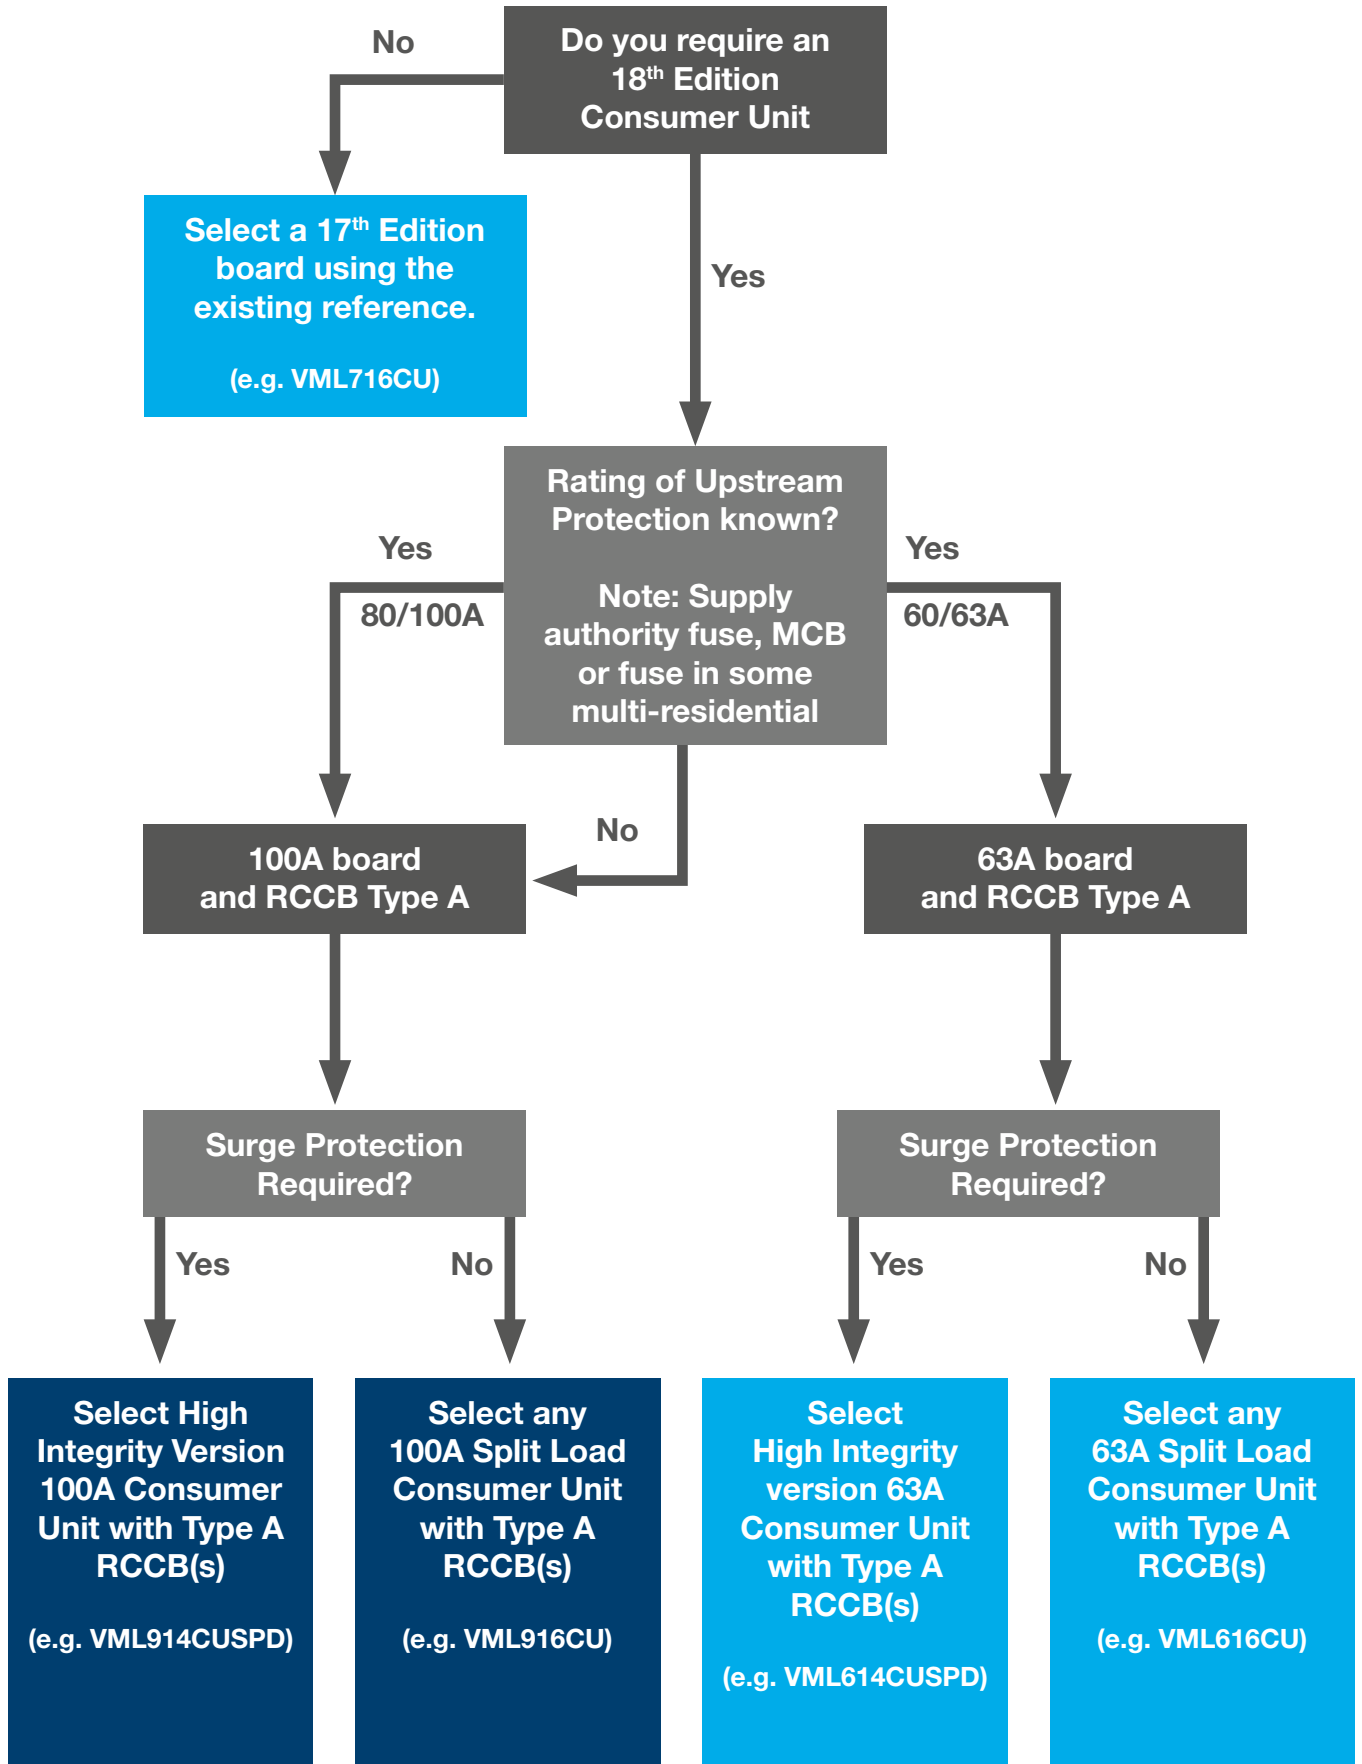

### SPN203N Technical Characteristics

		SPN203N
Tested to		EN 61643-11 (VDE0675-6-11) 2007-08
SPD type / class		T3 / III
Ports		one port
Type of connection		Parallel connection
Type of power supply system		TT / TN system
Nominal voltage	$U_N$	230V ac
Rated voltage	$U_c$	255V ac
Voltage protection level (L - N)	$U_p$	$\leq 1.25kV$
Voltage protection level (L/N - PE)	$U_p$	$\leq 1.5kV$
TOV - Characteristic (L - N)	$U_T$	335V / 5s
TOV - Characteristic (L/N - PE) (I)	$U_T$	400V / 5s
TOV - Characteristic (L/N - PE) (II)	$U_T$	1200V / 200 ms
Rated load current	$I_L$	16 Aeff
Nominal discharge current (8/20)	$I_n$	3kA
Maximal discharge current (8/20)	$I_{max}$	5kA
Combination wave (1,2/50 - 8/20) (L - N)	$U_{oc}$	6 kV
Combination wave (1,2/50 - 8/20) (L/N - PE)	$U_{oc}$	10 kV
Residual current	IPE	$\leq 5\mu A$
Replacement cartridge		NO
Maximal rating of overcurrent protection	fuse	25A gL / gG
	MCB	25A B curve
Short-circuit withstand capability with max. overcurrent protection	fuse	6kA eff ac
	MCB	1kA eff ac
Response time	$t_A$	$\leq 25ns$
Operating temperature range		- 25°C .....+ 40°C
Indication of SPD disconnecter		NO
Remote signalisation contact		Green light off
Cross sectional area	min	1.5mm <sup>2</sup> solid / flexible
	max	10mm <sup>2</sup> stranded / 6mm <sup>2</sup> flexible
Tightening torque for terminals		1.2 Nm
Mounting on		35mm DIN rail in accordance with EN 60715
Enclosure material		Grey thermoplastic, UL 94V-2
Degree of protection		IP20
Installation width		2 modules, DIN 43880

**Q. What is different about Hager 100A I<sub>NA</sub>, 100A I<sub>NC</sub> (VML955H) Consumer unit in relation to the 17<sup>th</sup> Edition consumer unit (VML755H)?**

**A.** The 100A I<sub>NA</sub>, 100A I<sub>NC</sub> Hager consumer unit has been designed to allow the board to meet the requirements of the 18<sup>th</sup> edition for both overload protection of RCCBs and to meet the requirements for RCD selection where there is expected to be electronic loads connected to the circuit(s) which could induce a pulsating DC component onto the sinusoidal waveform.

**Q. Where can I install the 100A board?**

**A.** In any single phase residential application.

**Q. Where can fit a 63A I<sub>NA</sub> board?**

**A.** Only on installations where the upstream protection device (MCB or Fuse) is known to be 60/63 A or below and the building owner is in control of this device.

**Q. How do I know if I need Surge Protection?**

**A.** If using the risk assessment method  $CRL = f_{env}/(L_p \times N_g)$  where;

$f_{env}$  - Environmental factor. Is the installation in an urban or rural/suburban environment?  
(Factor of 850 for urban or 85 for rural/suburban)

$L_p$  - Length of cable supplying installation (if unknown a factor of 1(km) should be used)

$N_g$  - Flash density of location.

Note if location is rural/suburban and the length of cable supplying the installation is unknown (hence factor of 1 is used) regardless of the location of the installation the risk assessment will result in surge protection being required even if lowest flash density factor 0.1 is used.

If CRL is less than 1000, surge protection is required.

**e.g.**

**Rural/suburban locations**

$CRL = 85 / (1 \times 0.1)$

$CRL = 850$  Surge Protection required

For Urban locations where the length of cable is unknown, with a flash density of above 0.8 surge protection is required.

**e.g.**

**Urban location with flash density ( $N_g$ ) of 0.8**

$CRL = 850 / (1 \times 0.8)$

$CRL = 1062.5$  Surge protection not required

**Urban location with flash density ( $N_g$ ) of 1.0**

$CRL = 850 / (1 \times 1)$

$CRL = 850$  Surge Protection required.

# Wiring Accessories

Our expansive range of Sollysta Wiring Accessories have been designed from the beginning to be installer friendly, tactile & safe.

Connect cables and install lamps securely with our Ceiling Accessories and Junction Boxes.

### Wall Switches

#### Characteristics:

- Unique patented loop terminal allows neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to derate for fluorescent loads.
- Clear terminal markings: 1-way L1, 2-way L2
- Capacity of each terminal - 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 5.47.
- For multigang switches use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

#### Description

#### Cat ref.

## Push Button Dimmer Switches

### Characteristics:

- Stylish flush button with quick press for on/off.
- Hold button down to dim or brighten light level.
- Leading edge.
- Soft start feature prolongs lamp life.
- Suitable for dimming mains and dimmable transformer extra low voltage lamps.
- Complies with BS EN 60669-2-1 (including BS EN 55015).
- Automatic switch off in event of transformer instability, protects the dimmer and the transformer.
- Supplied with M3.5 x 30mm long fixing screws.

## Switched & Unswitched Socket Outlets

### Characteristics:

- Unique patented three part safety shutter.
- Complies with BS 1363-2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminal screws grouped in-line and upward facing for ease of installation.
- Clear printed and engraved terminal markings.
- Capacity of each terminal: 3 x 4mm<sup>2</sup> conductors switched & unswitched (for other sized conductors see terminal capacities on page 5.48).
- **WMSS82USB(S) - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **WMSS82USB(S)** USB output: 5V d.c. 2.4A total max.
- For mounting boxes see selection chart on page 5.47.
- Supplied with M3.5 x 30mm long fixing screws.

## Cooker Control Unit

### Characteristics:

- Complies with BS 4177.
- Switch and socket are double pole.
- Twin earth as standard.
- Main switch is suitable for isolation.
- All terminals are upward facing for ease of installation.
- Clearly printed terminal marking.
- Capacity of terminals: 2 x 6.0mm<sup>2</sup>, 1 x 16.0mm<sup>2</sup>.
- For mounting boxes see selection chart on page 5.47.
- Supplied with M3.5 x 30mm long fixing screws.

### Description

### Cat ref.

45A Cooker Control Unit	<b>WMCC50</b>
45A Cooker Control Unit with LED Indicator	<b>WMCC50N</b>

## Outlet Plates

### Characteristics:

- Complies with BS 5733
- Terminal capacity: 20A 2 x 6.0mm<sup>2</sup>, 45A 2 x 10.0mm<sup>2</sup> conductors
- 20A plate features 2 separate terminals for each of Line, Neutral and Earth so flexible and fixed wiring do not occupy the same terminal.
- Single screw fast fix cable clamp.
- Supplied with M3.5 x 30mm long fixing screws.
- 45A features large open brass terminals for ease of installation.
- Protective red washer must be used under cable clamp to prevent damage to cable.

45A Cooker Cable Outlet with Terminals	<b>WMP50FO</b>

## Switched & Unswitched Fused Connection Units (13A)

### Characteristics:

- Complies with BS 1363-4.
- Single screw fast fix cable clamp, accommodates up to 1.5mm<sup>2</sup> flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0mm<sup>2</sup> conductors.
- Supplied with M3.5 x 30mm long fixing screws.
- For mounting boxes see selection chart on page 5.47.
- We also offer a bespoke printing service for your individual requirements. Please contact our Estimation Team on 01952 675594 for further details.

### Double Pole Switches (20A)

#### Characteristics:

- Complies with BS EN 60669-1, a.c. only.
- Single screw fast fix cable clamp, accommodates up to 1.5mm<sup>2</sup> flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 5.47.
- Supplied with M3.5 x 30mm long fixing screws.
- We also offer a bespoke printing service for your individual requirements. Please contact our Estimation Team on 01952 675594 for further details.

## Double Pole Switches (50A)

### Characteristics:

- Complies with BS EN 60669-2-4.
- Rated conditional short circuit current ( $I_{nc}$ ) 1500A tested with Hager **MTN150** 6kA B curve MCB.
- All terminal screws upward facing for ease of installation.
- Clearly printed terminal marking.
- Capacity of each terminal: 2 x 6mm<sup>2</sup>, 1 x 10mm<sup>2</sup>.
- For mounting boxes see selection chart on page 5.47.
- Supplied with M3.5 x 30mm long fixing screws.
- We also offer a bespoke printing service for your individual requirements. Please contact our Estimation Team on 01952 675594 for further details.

### Shaver Socket

**Characteristics:**

- Complies with BS EN 61558-2-5.
- Capacity of each terminal 2 x 2.5mm<sup>2</sup> conductors.
- Designed for use in bathrooms and shower rooms and incorporates a double wound transformer for an earth free supply.
- Designed to supply electric shavers rated 50 VA or less.
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets. Rating 20VA on either voltage.
- Primary circuit protected by a self resetting thermal overload device.
- Insertion of shaver plug automatically switches on the transformer.
- Supplied with M3.5 x 30mm long fixing screws.

Description

Shaver Socket 115/230 Volt

## Light Switches

### Characteristics:

- Complies with BS EN 60669-1.
- 'X' rated - no need to de-rate for fluorescent loads.
- Earth terminal in base.
- Switch will operate at up to an angle of 45°.
- Pull cords 1.5m long.
- Capacity of each terminal: 2 x 1.5mm<sup>2</sup> conductors.

## Grid Switches

### Characteristics:

- Complies with BS EN 606691-1 switches, BS 5733 fuse carrier.
- Shallowest switch modules which clip in from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip together to ease alignment for 6 gang and 8 gang applications.
- We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

## Part M Wiring Accessories

### Characteristics:

- Designed to satisfy Buildings Regulations Approved Document M (referred to as Part M)
- All products comply with their relevant British Standards
- Switches have wide rockers and dark face plates for clear visibility and ease of actuation
- Sockets have outboard rockers to ensure correct switching of appliances and dark face plates for ease of identification of switch position
- Grid modules can be found on page 5.12. Euro modules can be found on page 5.10.

## Wall Switches Raised Plate

### Characteristics:

- Unique patented LOOP terminal to allow neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to de-rate for fluorescent loads.
- Capacity of each terminal 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 5.47.
- For multi-gang switches, use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

## Dimmers Raised Plate

### Characteristics:

- Quick press for ON/OFF, hold button down to dim or brighten light level.
- Leading edge.
- Soft start feature prolongs lamp life.
- Suitable for dimming mains and dimmable transformer extra low voltage lamps.
- Automatic switch off in the case of transformer instability, protects the dimmer and the transformer.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

**Isolator Switches Raised Plate**

**Characteristics:**

- Complies with BS EN 60669-2-4.
- Capacity of each terminal 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 5.47.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

**Socket Outlets Raised Plates**

**Characteristics:**

- Unique patented three part safety shutter.
- Complies with BS 1363 Part 2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal: 3 x 4mm<sup>2</sup> conductors, switched & unswitched (for other sized conductors see terminal capacities on page 5.48).
- For mounting boxes see selection chart on page 5.47.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.
- **Sockets with USB connections - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **Sockets with USB connections:** USB output: 5V d.c. 2.4A total max.
- All decorative USB sockets come with spacer colour matched to insert and 30mm & 20mm screws.

### Cooker Control Unit Raised Plate

#### Characteristics:

- Complies with BS 4177.
- Switch and socket are double pole with twin earth as standard.
- Main switch is suitable for isolation.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of terminals 2 x 6.0mm<sup>2</sup>, 1 x 16.0mm<sup>2</sup>.
- For mounting boxes see selection chart on page 5.47.
- WR references supplied with M3.5 x 30mm long fixing screws.

## Shaver Socket Raised Plate

### Characteristics:

- Complies with BS EN 61558-2-5.
- Capacity of each terminal 2 x 2.5mm<sup>2</sup> conductors.
- Designed for use in bath/shower rooms & incorporates a double wound transformer for an earth free supply.
- Designed to supply electric shavers rated 50 VA or less.
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets.
- Rating 20VA on either voltage.
- Primary circuit protected by a self resetting thermal overload device.
- Insertion of shaver plug automatically switches on the transformer.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

## Euro Frontplates Flat Plate

### Characteristics:

- Carrier plates facilitate installation of industry standard modular data outlets.
- Easy to configure for all applications.
- Quick release of modules for maintenance.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

## Grid Switches - White Moulded Finish

### Characteristics:

- Complies with BS EN 606691-1 switches, BS 5733 fuse carrier.
- Shallowest switch modules which clip in from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip together to ease alignment for 6 gang and 8 gang applications.
- We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

## Metalclad Wall Switches (10A)

### Characteristics:

- Unique patented LOOP terminal to allow neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to de-rate for fluorescent loads.
- Capacity of each terminal 2 x 4.0mm<sup>2</sup> conductors.

## Metalclad Socket Outlets

### Characteristics:

- Unique patented three part safety shutter.
- Complies with BS 1363-2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- Terminal screws grouped in-line and upward facing for ease of installation with clear printed and engraved terminal markings.
- Capacity of each terminal: 5 x 2.5mm<sup>2</sup> conductors switched; 4 x 2.5mm<sup>2</sup> unswitched (for other sized conductors see terminal capacities on page 5.48).
- **Sockets with USB - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **Sockets with USB** - USB output: 5V d.c. 2.4A total max.

## Metalclad Fuse Connection Units

### Characteristics:

- Complies with BS 1363-4.
- Single screw fast fix cable clamp accommodates up to 1.5mm<sup>2</sup> flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0 mm<sup>2</sup> conductors.

**Grid Switches with LED Indicator - Printed**

**Characteristics:**

- Complies with BS EN 606691-1 switches, BS 5733 fuse carrier.
- Shallowest switch modules which clip in from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip together to ease alignment for 6 gang and 8 gang applications.
- We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

### Metalclad Euro Plates

#### Characteristics:

- Carrier plates facilitate installation of industry standard modular data outlets.
- Easy to configure for all applications.
- Quick release of modules for maintenance.
- Available as plate only for installation with standard wall box.

# Robust & Safe

Manufactured from a tough, durable thermoplastic, the Sollysta IP66 range is ideal for indoor and outdoor applications where wiring accessories may be vulnerable to the potentially harmful effects of dust or water ingress.

See more about Sollysta IP66 on our website [www.hager.co.uk](http://www.hager.co.uk)

J804

### Maintenance Free Junction Box

**Characteristics:**

- Complies with BS EN 60670-22.
- Suitable for use in inaccessible areas.
- Spring fit terminals do not relax over time.
- Four separate cable terminations per connector.
- Comes complete with incoming and outgoing cable clamps.
- Junction box selection chart see page 5.50.

Description	Terminal capacity	Pack qty.	Cat ref.
Maintenance Free 32A - 3 Terminals	4 x 4mm <sup>2</sup> x (0.5 - 4.0)	10	<b>J803</b>
Maintenance Free 20A - 4 Terminals	4 x 4mm <sup>2</sup> x (0.5 - 4.0)	10	<b>J804</b>

J501

### Downlighter Junction Box

**Characteristics:**

- Comes complete with incoming and outgoing cable clamps to prevent strain on terminations.
- Three plate terminals with separate terminals for flexible cords.
- Complies with BS EN 60670-22.
- Fits through a 58mm diameter hole.
- 3 plate terminal style with captive terminal screws.
- Separate terminals for flexible cords.
- Current rating: 16 Amp.
- Junction box selection chart see page 5.50.

Description	Terminal capacity	Pack qty.	Cat ref.

J501

### Traditional Junction Box

**Characteristics:**

- Complies with BS EN 60670-22.
- Slot terminals are ideal for taking spurs off uncut ring or loop circuit cables.
- Solid machined brass terminals.
- Junction box covers secured by single centre screws.
- Junction box selection chart see page 5.50.

SEL212

### Safety Lampholders

#### Characteristics:

- Complies with BS EN 7895.
- T2 heat resistance rating: 210°C.
- Automatically disconnect power at the contacts when the lamp is removed.
- 50.8mm fixing centres for non-access versions. Use with mounting blocks **MB326E/MT**.
- Body angle of angled battens set at 30°.
- Access lampholders have integral **RL624** ceiling rose base and heat resisting PVC tails.

Description	Pack qty.	Cat ref.

### Safety Pendants Sets with Access Ceiling Rose

#### Characteristics:

- Pendant set complies with BS EN 60598-1.
- Capacity of each terminal: 3 x 1.00mm<sup>2</sup> conductor.
- Barriers between terminals.
- Flexible pendant cord restraining hooks.
- Fixing centres 50.8mm.
- Feet on base to aid mounting on uneven surfaces.
- Three separate knockouts accept 1, 2 or 3 x 1.5mm<sup>2</sup> conductors.
- Optional halo **RL602**.

**Super Access Terminal Bank Type Ceiling Rose**

**Characteristics:**

- Capacity of each terminal: 3 x 1.00mm<sup>2</sup> conductor
- Common base with 'access' batten lampholders.
- Barriers between terminals.
- Flexible pendant cord restraining hooks.
- Fixing centres 50.8mm.
- Feet on base to aid mounting on uneven surfaces.
- Three separate knockouts accept 1, 2 or 3 x 1.5mm<sup>2</sup> conductors.
- Optional halo **RL602** (see below)

**Printed Products**

Many of our Sollysta wiring accessories are available with printed options, such as Washing Machine, Dishwasher etc.

For a full list of products generally available from stock please go to [www.hager.co.uk/printedproducts](http://www.hager.co.uk/printedproducts)

We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

**Unique Safety Shutter**

Socket outlets have apertures for plug pins and therefore will have a shutter mechanism that prevents access to live parts unless the earth pin is also present and has been inserted first. This however can be either intentionally or inadvertently defeated by inserting something into the earth pin aperture.

All Sollysta sockets have a unique patented three pin shutter system that not only requires the earth pin to be inserted first, but the simultaneous insertion of the live and neutral pins as well, before the shutter mechanism is activated. This enhances the safety by making it more difficult to defeat the mechanism and therefore reducing the risk of electric shock.

**Neutral Loop Terminal**

Today it is increasingly likely that there is a decorative light fitting or even downlighters fitted in place of a standard pendant. These fittings are rarely provided with a neutral loop terminal.

It has also become more popular to make the loop connection at the switch. This has the advantage of the connections being accessible and at a more convenient working height.

However, this leaves the problem of terminating the neutral conductor.

One solution is to connect the neutral to a connector block inside the wall box, which takes up extra space. Another is to use the Sollysta light switch which has a unique neutral loop terminal.

The IP rating for all low voltage enclosures up to 1000 V a.c. and 1500 V d.c. is defined in identical fashion by the standards EN 60529 - IEC 529. It comprises the letters IP followed by two character numerals and or additional/supplementary letters.

The first character numeral indicates the degree of protection provided by the enclosure against access to hazardous parts by preventing or limiting the ingress of a part of the human body or an object held by a person and ingress of solid foreign objects.

The first character numeral:  
Protection against foreign objects

IP	Description	
0		Non-protected
1		Protected against solid objects $\geq$ than 50mm
2		Protected against solid objects $\geq$ than 12.5mm
3		Protected against solid objects $\geq$ than 2.5mm
4		Protected against solid objects $\geq$ than 1.0mm
5		Dust-protected
6		Dust-tight

The second character numeral indicates the degree of protection provided by the enclosure with respect to harmful effects on the equipment due to the ingress of water. An X signifies that the tests are not applicable to the product.

The second character numeral:  
Protection against ingress of water with harmful effects

IP	Description	
0		Non-protected
1		Protected against vertically falling water drops
2		Protected against vertically falling water drops when enclosure tilted up to 15°
3		Protected against spraying water
4		Protected against splashing water
5		Protected against water jets
6		Protected against powerful water jets
7		Protected against the effect of temporary immersion in water
8		Protected against continuous immersion in water

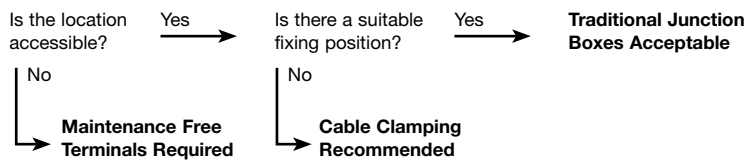

**Additional letter (in option)**  
Protection of people against access to hazardous parts

	Description
A	Protected against access to hazardous parts with the back of the hand
B	Protected against access to hazardous parts with a finger
C	Protected against access to hazardous parts with a tool - $\phi$ 2.5mm
D	Protected against access to hazardous parts with a wire - $\phi$ 1mm

**Additional letter (in option)**  
Specific information on the product

	Description
H	High voltage apparatus
M	Motion during water test
S	Stationary during water test
W	Weather conditions

**Junction Box Selection Chart**

Description	N° of Terminals	Terminal Rating	Reference	Benefits / Considerations
Downlighter Junction Box	3 x 3 x 1.5mm <sup>2</sup> 1 x 2 x 1.5mm <sup>2</sup>	16A	J501	Provided with cable clamps and separate terminals for flex
Maintenance Free Junction Box	3 x 4 x (0.5-4.0mm <sup>2</sup> )	32A	J803	Suitable for use in inaccessible locations
	4 x 4 x (0.5 - 4.0mm <sup>2</sup> )	20A	J804	
Traditional Junction Boxes	4	20A	J201	Acceptable for locations which are accessible
	4	20A	J301	
	3	30A	J401	
	6	20A	J601	

# Conterfeiting: A plague gaining ground

The counterfeiting of products is gaining ground around the world. Counterfeiting does not only concern luxury items, but also covers electrical products where peoples safety is endangered.

Counterfeit products do not bring any guarantee of safety or quality. These products can be dangerous, contain inappropriate materials or be of poor quality. In certain cases only the external appearance is preserved and the vital functions are removed to reduce the costs.

# check.hager.com

## **Authentication Process**

All of our circuit breakers, switches and earth leakage circuit breakers have been assigned a unique identification number which can be located on the side of the product. The identification number from each product is then stored in a protected database. If it doesn't have a number, then please contact us immediately.

## **Dedicated Website**

Our customers can access this database to check the authenticity of a hager product by going to 'check.hager.com'. The website will immediately check the validity of the identification number on the product and confirm if it is authentic or a suspected counterfeit.

## **Action Plan**

If you think you have a counterfeit product, contact Hager on 01952 675612 along with the details of the wholesaler from which the product was purchased. We will then take all the appropriate information and collect the product for analysis. If necessary we will take appropriate legal action.

## **Ethical Charter**

As a manufacturer we commit to:

- Providing our customers with the means to check the authenticity of our products
- Communicating the results of any investigations

Our distributors commit:

- To make sure that products purchased are not counterfeit.
- To inform the manufacturers of any offers to counterfeit products
- To support the actions of manufacturers.

**To ensure customers can check the authenticity of our products we have set up a simple and rapid procedure called: [check.hager.com](https://www.check.hager.com)**

1. In these Terms the following expressions shall have the following meanings:
  - 1.1 "Buyer" the purchaser of the Goods from the Seller.
  - 1.2 "Seller" Hager Limited.
  - 1.3 "Contract" the contract for the sale and purchase of the Goods made pursuant to these Terms.
  - 1.4 "Delivery" delivery of the Goods in accordance with these Terms.
  - 1.5 "Delivery Address" the location for Delivery agreed by the Seller and the Buyer (save where it is agreed that the Buyer shall collect the Goods from the Seller's premises).
  - 1.6 "Delivery Date" the date for Delivery agreed by the Seller and the Buyer.
  - 1.7 "Force Majeure" any circumstances beyond the reasonable control of the Seller.
  - 1.8 "Goods" the products which the Seller has agreed to supply to the Buyer pursuant to these Terms.
  - 1.9 "Loss" all actions claims demands losses (direct, indirect, consequential or otherwise) expenses costs actions and proceedings.
  - 1.10 "Payment Terms" the terms of payment in respect of the Price (and where relevant any delivery order or handling charges) which unless otherwise agreed by the Buyer and the Seller shall require payment not later than the last day of the month following that in which the Seller notifies the Buyer that the Goods are ready for despatch or have been dispatched.
  - 1.11 "Price" the price of the Goods as set out in the Seller's current price list at the date of despatch.
  - 1.12 "Quotation" includes any quotation, estimate, or tender given or made by the Seller.
  - 1.13 "Terms" the terms and conditions set out herein including any special terms and conditions agreed in writing by the Seller and the Buyer.
  - 1.14 "Product Lifetime" is the reasonable lifetime of a wiring accessory product in this catalogue and is taken to be 25 years from the date of manufacture.
2. All orders are accepted and all contracts are made subject to the Terms which shall prevail and be effective notwithstanding any variations or additions contained in any order or other document submitted by the Buyer including without limitation any standard conditions of purchase of the Buyer. No modification, of these Terms shall be binding upon the Seller unless made in writing by a duly authorised employee of the Seller.
3. A Quotation does not constitute an offer by the Seller to supply Goods and every acceptance of any Quotation by the Buyer shall be deemed an offer by the Buyer to purchase Goods from the Seller and will not be binding on the Seller until the Seller has given written acknowledgement or acceptance of such order.
4. The Seller reserves the right by giving notice to the Buyer at any time before Delivery to increase the price of the Goods or any installment of the Goods to reflect any increase in their cost of production, delivery, provision or otherwise which is due to Force Majeure, including but not by way of limitation any fluctuations in the cost of raw materials.
5. Unless otherwise agreed by the Buyer and the Seller, the Price shall be for Delivery to the Delivery Address. The Price shall include carriage and transit insurance costs to the Delivery Address. The Price is exclusive of any VAT (which will be applied in accordance with the legislation in force at the tax point date) for which the Buyer will be additionally liable.
6. In addition to the price, an order charge of £10 shall be payable by the buyer on orders under the value of £250 (per order number). The Seller reserves the right to charge the Buyer a reasonable handling charge for special deliveries made at the Buyer's request.
7. The Seller shall be entitled to send the invoice for the Goods to the Buyer immediately the Goods have been dispatched or when they are ready for despatch but are prevented or delayed from being dispatched due to Force Majeure.
8. The Buyer shall pay the Price plus any VAT strictly in accordance with the Payment Terms. The Seller will afford the Buyer a 2.5% discount on the Price if payment is made on or before the due date. Non-compliance with the Seller's terms of payment shall constitute default without reminder. In case of default the Seller may without prejudice to any other of its rights under these Terms charge interest to accrue on a daily basis at the rate of 3% per month from the date upon which payment falls due to the actual date of payment such interest to be paid monthly. Except where insolvency laws provide otherwise the Buyer shall not be entitled to withhold or set off payment for Goods for any reason whatsoever.
9. If the Buyer shall fail to fulfil the Payment Terms in respect of any invoice of the Seller the Seller may demand payment of all outstanding balances from the Buyer whether due or not and/or cancel all outstanding orders and/or decline to make further deliveries except upon receipt of cash or satisfactory securities.
10. In addition to any right or lien to which the Seller may by law be entitled the Seller shall in the event of the Buyer's insolvency or the Buyer failing to render payment for any Goods supplied by the Seller when due be entitled to a general lien on all goods of the Buyer in the Seller's possession for the unpaid price of any Goods sold and delivered by the Seller under the same or any other contract.
11. In addition and without prejudice to its other rights the Seller may on 14 days notice to the Buyer sell any goods of the Buyer on which the Seller has a lien and shall be deemed the Buyer's agent for the purposes of effecting such sale. The Seller may apply the proceeds of sale towards the satisfaction of sums due from the Buyer without prejudice to the Seller's right to recover the balance thereof from the Buyer.
12. Any date or period set out in a Quotation or the Seller's acceptance of order or which is otherwise agreed by the Seller and the Buyer for the delivery of the Goods or any part of them is approximate only and time shall not be of the essence of such delivery. If the Seller is prevented from delivering any Goods at the time provided for delivery by reason of Force Majeure then the period for delivery shall in any event be extended by the time lost due to such Force Majeure.
13. Delivery shall be made by the Seller supplying the Goods to the Delivery Address and the Buyer shall be responsible for the unloading of the Goods at the Delivery Address and the cost thereof. Where the Seller and the Buyer agree in writing that the Buyer shall collect the Goods from the Seller's premises the Buyer shall arrange at its expense unless otherwise agreed in writing for the carriage of the Goods (including cost of insurance in transit) and the Goods shall be deemed to have been delivered upon their loading upon the carrier and for the purpose of these Terms "Delivery" shall be construed accordingly.
14. Should the Buyer fail to take Delivery on or before the Delivery Date the Seller shall be entitled:
  - 14.1 If it has not already done so to invoice such Goods forthwith and to take the invoice into account;
  - 14.2 To treat the Contract as repudiated by the Buyer and without prejudice to any other right it may have against the Buyer the Seller shall be entitled to resell the Goods and shall be entitled to be indemnified by the Buyer for any Loss which it suffers.
15. The Seller reserves the right to deliver the Goods by installments and where it does so each delivery shall constitute a separate contract and any failure by the Seller to deliver any one or more of the installments in accordance with these Terms or any claim by the Buyer in respect of any one or more installments shall not entitle the Buyer to treat the Contract as a whole as repudiated.
16. The Buyer shall store and transport the Goods in conditions that will preserve the Goods in good condition. The Buyer shall comply with all reasonable requests made by the Seller with regard to the conditions in which the Goods are to be stored and transported.
17. Packing cases and cartons in which the Goods are supplied are non-returnable and provided free of charge.
18.
  - 18.1 If the Goods are to be manufactured by the Seller in accordance with a specification submitted by the Buyer, the Buyer shall indemnify the Seller against all Loss suffered by the Seller in connection with any claim by a third party that the manufacture and/or supply of the Goods to such specification infringes the rights of any third party.
  - 18.2 Unless otherwise agreed in writing all copyright and design rights in any drawings created by the Seller in the performance of the Contract shall vest in the Seller and remain the property of the Seller notwithstanding the purchase of the Goods by the Buyer.
19.
  - 19.1 Subject as expressly provided for herein all warranties, conditions, or other terms implied by statute or common law are excluded to the fullest extent permitted by law and the Seller shall have no liability to the Buyer other than as expressly set out herein.
  - 19.2 The Seller makes no warranty as to the accuracy of all general drawings including weights and dimensions issued by the Seller and such drawings and any descriptions and illustrations contained in any catalogue, price list or other advertising material are for information only and are a general description of the Goods and do not form part of the Contract.
  - 19.3 The Buyer shall be deemed to have inspected and quantified the Goods upon Delivery and the Seller shall have no liability to the Buyer in relation to short delivery or damage to the Goods in transit which was apparent on inspection or which would have been apparent on reasonable inspection unless such short delivery or damage is notified to the Seller and the carriers in writing within 3 days of Delivery specifying (in such detail as the Supplier shall reasonably require) the shortage in or damage to the Goods.
  - 19.4 The Seller shall have no liability to the Buyer in relation to non-delivery of the Goods unless such non-delivery is notified to the Seller in writing within 10 days of the Delivery Date.
  - 19.5 Where any valid claim in respect of short delivery or non-delivery of or damage to the Goods is notified to the Seller in accordance with these Terms, the Seller shall be entitled to supply goods to remedy any short delivery or non-delivery or damage free of charge or, at the Seller's discretion refund to the Buyer the price of the relevant Goods but the Seller shall have no further liability to the Buyer except in the case of death or personal injury caused by the negligence of the Seller.
  - 19.6 Where the Seller does not manufacture the Goods or any part thereof the Seller shall have no liability in relation to any defect in or failing of the Goods other than to use its reasonable endeavours to pass to the Buyer the benefit of any guarantee given in respect of the Goods or part thereof by their manufacturer.
  - 19.7.1 The company undertakes to replace or repair at its discretion products should they become inoperable within the time periods as outlined in the following table:

Brand	Product Lifetime	10 Years	2 Years
Hager Wiring Accessories	✓		
Metalclad ranges		✓	
Dimmer Switches, Shaver Units, Portable Lamps			✓
Klik	✓		
Occupancy Sensors			✓
Hager			✓

- 19.7.2 In all cases defects shall be taken as arising solely from faulty materials and or workmanship and the defective goods must always be returned to Hager Ltd and Hager Ltd must be notified of the defect or suspected defect immediately the same became known to the Buyer. The Guarantee will be invalidated if the product has not been installed or maintained in accordance with the Company's instructions, has not been used appropriately or if any attempt has been made to rectify, dismantle or alter the product in any way.
- 19.8 The Seller shall not be liable to repair or replace defective Goods or part thereof if the Goods or part thereof have been subject to any misuse, unauthorised repair replacement modification or alteration.
- 19.9 The Seller shall not be liable for any Loss suffered by the Buyer due to the Seller's failure to meet its obligations under the Contract due to Force Majeure.
- 19.10 Except in respect of death or personal injury caused by the Seller's negligence, the Seller shall have no liability to the Buyer for any loss of profit, business, contracts, revenues or anticipated savings or for any special indirect or consequential damage or loss of any nature whatsoever and whether caused by the negligence of the Seller or its employees, or agents) which arises out of or in connection with the supply of the Goods and/or their use or resale by the Buyer, except as may otherwise be expressly provided for in these Terms.
- 19.11 For the avoidance of doubt nothing herein contained shall be deemed to exclude or restrict the Seller's liability for death or personal injury arising due to the Seller's negligence.
20. The risk in the Goods shall pass to the Buyer immediately upon Delivery.
21. The Buyer shall indemnify the Seller against all Loss (including without limitation the Price in respect of Goods completed, costs incurred by the Seller in respect of partially completed Goods, reasonable cancellation charges incurred by the Seller due to any subcontracts entered into to perform the Contract and estimated profits on the Goods under the Contract on which work by the Seller has not been started) suffered by the Seller which arises as a result of the cancellation of the Contract by the Buyer, the breach by the Buyer of any provision of the Contract or the negligence of the Buyer or any of its representatives.
22. Until payment by the Buyer in full of the Price of the Goods and any other monies due to the Seller in respect of all other products supplied or agreed to be sold by the Seller to the Buyer (including but without limitation any costs of delivery):
- 22.1 The property in the Goods shall remain in the Seller and the Buyer shall hold the same as the fiduciary agent of and bailee for the Seller;
- 22.2 The Buyer shall store the Goods separately from other products in a manner which makes them readily identifiable as being the property of the Seller and shall keep them protected and insured but shall be entitled to resell or use the Goods in the ordinary course of its business.
23. Until such time as property in the Goods has passed to the Buyer (and provided that the Goods are still in existence and have not been resold) the Seller shall be entitled at any time to require the Buyer to deliver up the Goods to the Seller and if the Buyer fails to do so forthwith the Seller or its agents may enter the premises of the Buyer and take possession of any Goods in which property remains in the Seller and remove and dispose of them as the Seller thinks fit. The Seller shall apply the proceeds of disposal (after deduction of all expenses) in discharge of the amount unpaid by the Buyer.
- 24.
- 24.1 Save as may be otherwise agreed in writing between the Seller and the Buyer where Goods are supplied for export from the United Kingdom they shall be charged for and delivered FOB the air or sea port of shipment and the Seller shall not be obliged to give the Buyer the notice specified in Section 32(3) of the Sale of Goods Act 1979.
- 24.2 The Buyer shall be responsible for complying with any legislation or regulations governing the importation of the Goods into the country of destination and for the payment of any duties thereon. In particular, if any licence or consent of any government or other authority shall be required for the acquisition, carriage or use of the Goods by the Buyer the Buyer shall obtain the same at its own expense and if necessary produce evidence of the same to the Seller on demand. Failure to do so shall not entitle the Buyer to withhold or delay payment of the Price. Any additional expenses or charges incurred by the Seller resulting from such failure shall be for the Buyer's account.
- 24.3 The seller supplies the goods to the buyer on the sole basis that goods are on-sold by the buyer to suitably qualified, professional installers only.

25. If the Buyer:
- 25.1 Shall default in or commit any breach of any of its obligations to the Seller under these Terms; or
- 25.2 Shall be involved in any legal proceedings in which its solvency is in question; or
- 25.3 Being a company shall present a petition or have a petition presented for its winding up or convene a meeting to pass a resolution for voluntary winding up or have a receiver appointed over all or any part of its assets or call a meeting of or enter into any composition or arrangement with its creditors or being an individual shall be presented with a bankruptcy petition; or
- 25.4 Shall cease or threaten to cease to trade or if in the opinion of the Seller serious doubts arise as to the Buyer's solvency then in any such case the Seller shall immediately become entitled (without prejudice to its other claims and rights under the Contract) to suspend further performance of the Contract for such time as it shall in its absolute discretion think fit or (whether or not notice of such a suspension shall have been given) to treat the Contract as wrongfully repudiated by the Buyer and forthwith terminate the Contract (either with or without notice to the Buyer) and if the Goods have been delivered but not paid for the Price shall become immediately due and payable notwithstanding any previous agreement to the contrary.
26. All Contracts shall be governed by English Law and the English Courts shall have nonexclusive jurisdiction for the hearing of any dispute between the parties.
27. These Terms supersede all previous Conditions of Sale of the Seller.
28. The Seller shall be entitled to assign or sub-contract all or any of its rights and obligations hereunder. The Buyer shall not be entitled to assign transfer sub-contract or otherwise delegate any of its rights or obligations hereunder.
29. It is a condition of any sale under these terms and conditions that both parties shall abide by the principles of The Electrical Installation Industry Charter adopted by the major electrical industry trade bodies and consequently shall avoid the distribution of counterfeit and/or non-compliant electrical products.

#### Conditions of Use

The products listed in this publication should be installed by suitably qualified professional personnel in accordance with the company's instructions, requirements of relevant legislation, regulations (including IEE Wiring Regulations) and the accepted practice in the industry

#### End of life treatment of electrical/electronic equipment and batteries in the European Union Countries.

The crossed-out 'wheeled bin symbol' marked on the equipment or its packaging, indicates that the product is not to be disposed of with unsorted municipal / household waste. Please check with your local authority or retailer for recycling and collection advice. This will enable you to contribute to the disposal, treatment and recycling in an environmentally sound way and help prevent potential negative effects on the environment and human health.

# Sollysta

## Wiring Accessories

Sollysta offers a complete range of wiring solutions for any application with our White Moulded, Decorative, Grid, IP66 and Metaclad ranges.

Specifically designed to inspire confidence, the modern design combines stylish aesthetics and quality without compromising on functionality, reliability or safety.

All of the hallmark features run consistently throughout the range, including the unique neutral loop terminal on the switch and the patented three pin shutter mechanism on the sockets for additional safety. Moulded cable lead-ins, captive and backed off terminal screws, wire end stops and in-line terminals have all been designed to ease installation, saving time on site.

# Sollysta Neutral Loop Terminal

For many years domestic lighting circuits have been connected using the three plate method where the loop terminal is at the ceiling rose.

Today, it is increasingly likely that there is a decorative light fitting or even downlighters fitted in place of a standard pendant. These fittings are rarely provided with a neutral loop terminal.

It has also become popular to make the loop connection at the switch. This has the advantage of the connections being accessible and at a more convenient working height.

However, this leaves the problem of terminating the neutral conductor.

One solution is to connect the neutral to a connector block inside the wall box, which takes up extra space.

Our solution is the Sollysta light switch which has a unique neutral loop terminal, built in.

## loop terminal

As can be seen from the diagram the neutrals are looped through the switches with a single line and neutral to each light fitting.

One of the fundamental requirements of the BS 7671 Wiring Regulations is to provide basic protection against electric shock.

Socket outlets have apertures for plug pins and therefore will have a shutter mechanism that prevents access to live parts unless the earth pin is also present and has been inserted first. This however can be either intentionally or inadvertently defeated by inserting something into the earth pin aperture.

Sollysta sockets have a unique patented shutter system that not only requires the earth pin to be inserted first, but the simultaneous insertion of the live and neutral pins as well, before the shutter mechanism is activated.

This enhances safety by making it difficult to defeat the mechanism and therefore reducing the risk of electric shock.

## Unique Safety Shutters

# Sollysta Wiring Accessories

In addition to the aesthetics for the home owner and specifier, Sollysta has been designed to make the installation easier for the installer. Terminals designed to face in the same direction with lead-ins for wiring, backed out screws held captive to prevent loss, wire end stops and clear identification all help make the wiring and cabling much easier, helping to save time on site.

## 01 Terminals

The terminals all face in the same direction, removing the need to rotate the product during installation.

## 02 Terminal Screws

Terminal screws are supplied in the backed out position to save installation time and are also held captive within the moulding so they won't be lost.

## 03 Lead-ins

Moulded lead-ins help to guide the driver blade to the screw head.

## 04 Wire End Stops

A positive wire end stop provides added security of connection.

## 05 Projection

The range has been designed to offer the shallowest projection possible in the back box, maximising space for cabling.

# Maintenance Free Junction Box

The Maintenance Free Junction Box provides a secure and maintenance free means of connecting fixed wiring in any indoor application, whether it be under floor applications, between ground and first floor in houses, or where the jointing of cables is used to aid rewiring.

BS 7671 (Wiring Regulations) recognises equipment complying with an appropriate British Standard without further qualification. Therefore, a junction box marked (MF) is identified as a maintenance free accessory, which does not require further inspection, testing or maintenance after installation in a circuit.

The terminals accept and secure solid, stranded or flexible conductors from 0.5mm<sup>2</sup> to 4mm<sup>2</sup>. Twin and CPC and flexible cords can all be mixed. You then secure the cage clamp terminal using a screwdriver or finger to push down on the push button.

The Maintenance Free junction box is ideal for use in residential and commercial buildings, refurbishments and re-wires, power and lighting circuits and circuits wired in sheathed cables.

The Maintenance Free junction box is unrivalled in today's market. No other junction box provides as many features that allow contractors to comply with the latest wiring regulations.

## Screwless Terminations

Tests on these terminals include long-term vibration, shock test, long term connection test, pull out, voltage drop, temperature rise and exposure to corrosive atmospheres

## Cable clamps

Cable clamps prevent strain on terminations and prevent exposed unsheathed conductors.

## Breakout

The simple breakouts on the base and lid allow you to select your cable entry points.

# Downlighter Junction Box

Recognising that junction boxes are used to supply the connection between fixed wiring and downlighters, we developed a junction box that will help contractors meet the needs of the regulations.

The J501 is torpedo shaped to fit through a 58mm diameter hole in the ceiling. All the cables are securely clamped and they exit from either end of the junction box. This is in contrast to other junction boxes where the cables are generally not clamped and often exit at different angles, making it hard to push or pull them through the hole without risking damage or loosening the connections.

A loose or disconnected cable is a hidden danger with junction boxes. With an increasing drive for safety, such products have come under close inspection.

Wiring is fast and simple. The J501 fits comfortably in the hand and the cables can be clamped for easier connection. Cabling space is maximised with all the terminals arranged on one side and the upper wall on the lid hinges open 360° for unrestricted access.

For wiring, the three plate terminal style in the box is logical and easy to use and separate terminals for flexible cords and twin and CPC cables help prevent damage to smaller flexible conductors.

During installation all the cables are securely clamped, so there is no strain placed on the terminal connections and no risk of exposed unsheathed conductors. The cable clamps can be reversed to allow either single or double cable entry, which allows up to four flat and one flexible cable to be terminated.

# Safety Pendants & Lampholders

- 01 Lampholder & Skirt**
- 02 Ceiling Rose Cover**
- 03 Terminal Safety Cover**
- 04 Terminal Plate**

Our philosophy is to provide all of our pendants and lampholders with a safety J-slot mechanism which automatically disconnects power at the contacts when the lamp is removed.

This prevents electric shock due to accidental touching of the contacts when changing or installing lamps.

This applies to	Page
Safety Bayonet Cap Cord Grip Lampholders	56
Safety Straight Batten Lampholders	56
Safety Access Batten Lampholders	56
Safety Pendant Sets with Access Ceiling Rose	56

Safety Terminal Cover clips onto Terminal Plate enclosing live parts.

Additional safety can be achieved with our terminal cover which provides protection against accidental contact with electrical connections.

Safety is ensured with the clipable cover which shrouds all electrical connections whilst allowing removal of the ceiling rose cover for decorating or maintenance.

### Wall Switches

#### Characteristics:

- Unique patented loop terminal allows neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to derate for fluorescent loads.
- Clear terminal markings: 1-way L1, 2-way L2
- Capacity of each terminal - 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 58.
- For multigang switches use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

### Intermediate Switches

#### Characteristics:

- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to derate for fluorescent loads.
- Clear terminal markings.
- Capacity of each terminal - 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 58.
- For multigang switches use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

Description	Cat ref.
Intermediate Switch	<b>WMPS16</b>

WMPS12W

### Push Switches

#### Characteristics:

- Unique patented loop terminal allows neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to derate for fluorescent loads.
- Clear terminal markings: 1-way L1, 2-way L2
- Capacity of each terminal - 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 58.
- For multigang switches use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

## Push Button Dimmer Switches

### Characteristics:

- Stylish flush button with quick press for on/off.
- Hold button down to dim or brighten light level.
- Leading edge.
- Soft start feature prolongs lamp life.
- Suitable for dimming mains and dimmable transformer extra low voltage lamps.
- Complies with BS EN 60669-2-1 (including BS EN 55015).
- Automatic switch off in event of transformer instability, protects the dimmer and the transformer.
- Supplied with M3.5 x 30mm long fixing screws.

## Rotary Push Button Dimmer Switches

### Characteristics:

- Quick press for on/off with rotary dimming control.
- 1 or 2 way switching.
- Supplied with M3.5 x 30mm long fixing screws.
- Suitable for mains halogen lamps without the need for derating.
- Not suitable for fluorescent, LED or inductive loads.
- Complies with BS EN 60669-2-1 (excluding clause 26 EMC requirements).

## Isolator Switches

### Characteristics:

- Complies with BS EN 60669-2-4
- Rated conditional short circuit current ( $I_{nc}$ ) 1500A tested with Hager **MTN110** 6kA B curve MCB.
- Capacity of each terminal 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 58.
- Supplied with M3.5 x 20mm long fixing screws.

WMSS82USB

## Switched & Unswitched Socket Outlets

### Characteristics:

- Unique patented three part safety shutter.
- Complies with BS 1363-2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminal screws grouped in-line and upward facing for ease of installation.
- Clear printed and engraved terminal markings.
- Capacity of each terminal: 3 x 4mm<sup>2</sup> conductors switched & unswitched (for other sized conductors see terminal capacities on page 59).
- **WMSS82USB(S) - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **WMSS82USB(S)** USB output: 5V d.c. 2.4A total max.
- For mounting boxes see selection chart on page 58.
- Supplied with M3.5 x 30mm long fixing screws.

WMCC50N

## Cooker Control Unit

### Characteristics:

- Complies with BS 4177.
- Switch and socket are double pole.
- Twin earth as standard.
- Main switch is suitable for isolation.
- All terminals are upward facing for ease of installation.
- Clearly printed terminal marking.
- Capacity of terminals: 2 x 6.0mm<sup>2</sup>, 1 x 16.0mm<sup>2</sup>.
- For mounting boxes see selection chart on page 58.
- Supplied with M3.5 x 30mm long fixing screws.

Description	Cat ref.
45A Cooker Control Unit	<b>WMCC50</b>
45A Cooker Control Unit with LED Indicator	<b>WMCC50N</b>

## Outlet Plates

### Characteristics:

- Complies with BS 5733
- Terminal capacity: 20A 2 x 6.0mm<sup>2</sup>, 45A 2 x 10.0mm<sup>2</sup> conductors
- 20A plate features 2 separate terminals for each of Line, Neutral and Earth so flexible and fixed wiring do not occupy the same terminal.
- Single screw fast fix cable clamp.
- Supplied with M3.5 x 30mm long fixing screws.
- 45A features large open brass terminals for ease of installation.
- Protective red washer must be used under cable clamp to prevent damage to cable.

## Switched & Unswitched Fused Connection Units (13A)

### Characteristics:

- Complies with BS 1363-4.
- Single screw fast fix cable clamp, accommodates up to 1.5mm<sup>2</sup> flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0mm<sup>2</sup> conductors.
- Supplied with M3.5 x 30mm long fixing screws.
- For mounting boxes see selection chart on page 58.
- We also offer a bespoke printing service for your individual requirements. Please contact our Estimation Team on 01952 675594 for further details.

### Shaver Socket

**Characteristics:**

- Complies with BS EN 61558-2-5.
- Capacity of each terminal 2 x 2.5mm<sup>2</sup> conductors.
- Designed for use in bathrooms and shower rooms and incorporates a double wound transformer for an earth free supply.
- Designed to supply electric shavers rated 50 VA or less.
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets. Rating 20VA on either voltage.
- Primary circuit protected by a self resetting thermal overload device.
- Insertion of shaver plug automatically switches on the transformer.
- Supplied with M3.5 x 30mm long fixing screws.

Description

Shaver Socket 115/230 Volt

## Part M Wiring Accessories

### Characteristics:

- Designed to satisfy Buildings Regulations Approved Document M (referred to as Part M)
- All products comply with their relevant British Standards
- Switches have wide rockers and dark face plates for clear visibility and ease of actuation
- Sockets have outboard rockers to ensure correct switching of appliances and dark face plates for ease of identification of switch position
- Grid modules can be found on page 5.12. Euro modules can be found on page 5.10.

## Wall Switches Raised Plate

### Characteristics:

- Unique patented LOOP terminal to allow neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to de-rate for fluorescent loads.
- Capacity of each terminal 2 x 4.0mm<sup>2</sup> conductors.
- For mounting boxes see selection chart on page 58.
- For multi-gang switches, use of a 25mm mounting box will provide increased wiring space.
- Supplied with M3.5 x 20mm long fixing screws.

## Dimmers Raised Plate

### Characteristics:

- Quick press for ON/OFF, hold button down to dim or brighten light level.
- Leading edge.
- Soft start feature prolongs lamp life.
- Suitable for dimming mains and dimmable transformer extra low voltage lamps.
- Automatic switch off in the case of transformer instability, protects the dimmer and the transformer.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

**Socket Outlets Raised Plates**

**Characteristics:**

- Unique patented three part safety shutter.
- Complies with BS 1363 Part 2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal: 3 x 4mm<sup>2</sup> conductors, switched & unswitched (for other sized conductors see terminal capacities on page 59).
- For mounting boxes see selection chart on page 58.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.
- **Sockets with USB connections - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **Sockets with USB connections:** USB output: 5V d.c. 2.4A total max.
- All decorative USB sockets come with spacer colour matched to insert and 30mm & 20mm screws.

## Shaver Socket Raised Plate

### Characteristics:

- Complies with BS EN 61558-2-5.
- Capacity of each terminal 2 x 2.5mm<sup>2</sup> conductors.
- Designed for use in bath/shower rooms & incorporates a double wound transformer for an earth free supply.
- Designed to supply electric shavers rated 50 VA or less.
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets.
- Rating 20VA on either voltage.
- Primary circuit protected by a self resetting thermal overload device.
- Insertion of shaver plug automatically switches on the transformer.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

### Telephone & Data Raised Plate

#### Characteristics:

- BT sockets comply with BS 6312-2.
- Supplied with fitted cable tie.
- Quick connection with insulation displacement terminals.
- Clearly printed terminal marking.
- WR references supplied with M3.5 x 30mm long fixing screws.
- WF references supplied with M3.5 x 20mm long fixing screws.

## Grid Switches - White Moulded Finish

### Characteristics:

- Complies with BS EN 606691-1 switches, BS 5733 fuse carrier.
- Shallowest switch modules which clip in from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip together to ease alignment for 6 gang and 8 gang applications.
- We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

## Metalclad Wall Switches (10A)

### Characteristics:

- Unique patented LOOP terminal to allow neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- 'X' rated - No need to de-rate for fluorescent loads.
- Capacity of each terminal 2 x 4.0mm<sup>2</sup> conductors.

## Metalclad Wall Switches (20A)

### Characteristics:

- Unique patented LOOP terminal to allow neutral looping at the switch.
- Complies with BS EN 60669-1, a.c only.
- Capacity of each terminal 2 x 6.0mm<sup>2</sup> conductors.

## Metalclad Socket Outlets

### Characteristics:

- Unique patented three part safety shutter.
- Complies with BS 1363-2, a.c only.
- Double pole switching mechanism on switched sockets.
- Twin socket comes with twin earth as standard.
- Terminal screws grouped in-line and upward facing for ease of installation with clear printed and engraved terminal markings.
- Capacity of each terminal: 5 x 2.5mm<sup>2</sup> conductors switched; 4 x 2.5mm<sup>2</sup> unswitched (for other sized conductors see terminal capacities on page 59).
- **Sockets with USB - Warning:** To avoid possible damage to the product or spurious insulation readings, please disconnect the product before carrying out insulation resistance testing.
- **Sockets with USB** - USB output: 5V d.c. 2.4A total max.

## Metalclad Fuse Connection Units

### Characteristics:

- Complies with BS 1363-4.
- Single screw fast fix cable clamp accommodates up to 1.5mm<sup>2</sup> flexible cord.
- All terminals are upward facing with clearly printed terminal markings for ease of installation.
- Capacity of each terminal 2 x 6.0 mm<sup>2</sup> conductors.

### Grid Switches - White Moulded Finish

#### Characteristics:

- Complies with BS EN 606691-1 switches, BS 5733 fuse carrier.
- Shallowest switch modules which clip in from the front for ease of installation and maintenance.
- Terminal screw can be accessed with modules clipped into frames.
- Frames locate to finished wall level.
- Frames clip together to ease alignment for 6 gang and 8 gang applications.
- We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

J804

### Maintenance Free Junction Box

**Characteristics:**

- Complies with BS EN 60670-22.
- Suitable for use in inaccessible areas.
- Spring fit terminals do not relax over time.
- Four separate cable terminations per connector.
- Comes complete with incoming and outgoing cable clamps.
- Junction box selection chart see page 61.

Description	Terminal capacity	Pack qty.	Cat ref.
Maintenance Free 32A - 3 Terminals	4 x 4mm <sup>2</sup> x (0.5 - 4.0)	10	<b>J803</b>

J501

### Downlighter Junction Box

**Characteristics:**

- Comes complete with incoming and outgoing cable clamps to prevent strain on terminations.
- Three plate terminals with separate terminals for flexible cords.
- Complies with BS EN 60670-22.
- Fits through a 58mm diameter hole.
- 3 plate terminal style with captive terminal screws.
- Separate terminals for flexible cords.
- Current rating: 16 Amp.
- Junction box selection chart see page 61.

SEL212

### Safety Lampholders

#### Characteristics:

- Complies with BS EN 7895.
- T2 heat resistance rating: 210°C.
- Automatically disconnect power at the contacts when the lamp is removed.
- 50.8mm fixing centres for non-access versions. Use with mounting blocks **MB326E/MT**.
- Body angle of angled battens set at 30°.
- Access lampholders have integral **RL624** ceiling rose base and heat resisting PVC tails.

### Safety Pendants Sets with Access Ceiling Rose

#### Characteristics:

- Pendant set complies with BS EN 60598-1.
- Capacity of each terminal: 3 x 1.00mm<sup>2</sup> conductor.
- Barriers between terminals.
- Flexible pendant cord restraining hooks.
- Fixing centres 50.8mm.
- Feet on base to aid mounting on uneven surfaces.
- Three separate knockouts accept 1, 2 or 3 x 1.5mm<sup>2</sup> conductors.
- Optional halo **RL602**.

**Printed Products**

Many of our Sollysta wiring accessories are available with printed options, such as Washing Machine, Dishwasher etc.

For a full list of products generally available from stock please go to [www.hager.co.uk/printedproducts](http://www.hager.co.uk/printedproducts)

We also offer a bespoke printing service for your individual requirements. Please contact our Sales Service Centre on 01952 675612 for further details.

**Unique Safety Shutter**

Socket outlets have apertures for plug pins and therefore will have a shutter mechanism that prevents access to live parts unless the earth pin is also present and has been inserted first. This however can be either intentionally or inadvertently defeated by inserting something into the earth pin aperture.

All Sollysta sockets have a unique patented three pin shutter system that not only requires the earth pin to be inserted first, but the simultaneous insertion of the live and neutral pins as well, before the shutter mechanism is activated. This enhances the safety by making it more difficult to defeat the mechanism and therefore reducing the risk of electric shock.

**Neutral Loop Terminal**

Today it is increasingly likely that there is a decorative light fitting or even downlighters fitted in place of a standard pendant. These fittings are rarely provided with a neutral loop terminal.

It has also become more popular to make the loop connection at the switch. This has the advantage of the connections being accessible and at a more convenient working height.

However, this leaves the problem of terminating the neutral conductor.

One solution is to connect the neutral to a connector block inside the wall box, which takes up extra space. Another is to use the Sollysta light switch which has a unique neutral loop terminal.

The IP rating for all low voltage enclosures up to 1000 V a.c. and 1500 V d.c. is defined in identical fashion by the standards EN 60529 - IEC 529. It comprises the letters IP followed by two character numerals and or additional/ supplementary letters.

The first character numeral indicates the degree of protection provided by the enclosure against access to hazardous parts by preventing or limiting the ingress of a part of the human body or an object held by a person and ingress of solid foreign objects.

The first character numeral:  
Protection against foreign objects

IP	Description	
0		Non-protected
1		Protected against solid objects $\geq$ than 50mm
2		Protected against solid objects $\geq$ than 12.5mm
3		Protected against solid objects $\geq$ than 2.5mm
4		Protected against solid objects $\geq$ than 1.0mm
5		Dust-protected
6		Dust-tight

**Additional letter (in option)**  
Protection of people against access to hazardous parts

	Description
A	Protected against access to hazardous parts with the back of the hand
B	Protected against access to hazardous parts with a finger
C	Protected against access to hazardous parts with a tool - $\varnothing$ 2.5mm
D	Protected against access to hazardous parts with a wire - $\varnothing$ 1mm

The second character numeral indicates the degree of protection provided by the enclosure with respect to harmful effects on the equipment due to the ingress of water. An X signifies that the tests are not applicable to the product.

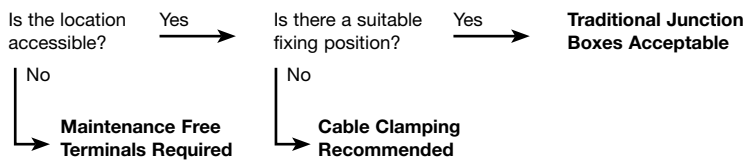

The second character numeral:  
Protection against ingress of water with harmful effects

IP	Description	
0		Non-protected
1		Protected against vertically falling water drops
2		Protected against vertically falling water drops when enclosure tilted up to 15°
3		Protected against spraying water
4		Protected against splashing water
5		Protected against water jets
6		Protected against powerful water jets
7		Protected against the effect of temporary immersion in water
8		Protected against continuous immersion in water

**Additional letter (in option)**  
Specific information on the product

	Description
H	High voltage apparatus
M	Motion during water test
S	Stationary during water test
W	Weather conditions

## Junction Box Selection Chart

Description	N° of Terminals	Terminal Rating	Reference	Benefits / Considerations
Downlighter Junction Box	3 x 3 x 1.5mm <sup>2</sup> 1 x 2 x 1.5mm <sup>2</sup>	16A	J501	Provided with cable clamps and separate terminals for flex
Maintenance Free Junction Box	3 x 4 x (0.5-4.0mm <sup>2</sup> )	32A	J803	Suitable for use in inaccessible locations
	4 x 4 x (0.5 - 4.0mm <sup>2</sup> )	20A	J804	
Traditional Junction Boxes	4	20A	J201	Acceptable for locations which are accessible
	4	20A	J301	
	3	30A	J401	
	6	20A	J601

# Hager Solutions

We feel the easiest and most flexible solution for installers is to utilise a consumer unit which is 100A rated ( $I_{nA}$ ), with 100A ( $I_{nc}$ ) RCCBs fitted as standard, as shown below.

This enables the installer / designer to be confident that the consumer unit allows conformity to the overload protection requirement of RCCBs and switches regardless of the size of the upstream cut-out fuse fitted or the configuration of the downstream MCBs.

Solutions are available in single and dual row construction for;

- **Split Load**
- **Configurable**
- **High Integrity**
- **Time Delayed Type S**
- **RCCB Incomer**

$I_{nA}$  = Rated current of assembly (not necessarily the amps shown on the incoming device)

$I_{nc}$  = Rated current of a section within an assembly (not necessarily the amps shown on the specific device)

536.4.3.2 / 536.4.202

# At a Glance

## Overload Protection of RCCBs & Switches

## :hager

# Overload Protection

## 536.4.3.2

"RCCBs & switches do not provide protection against overload, therefore they shall be protected by an overcurrent protective device."

## 536.4.202

"... overload protection shall not solely be based on the use of diversity factors of the downstream circuits. To achieve overload protection of RCCBs or switches, the rated current of the overcurrent protection device (OCPD) shall be selected according to the manufacturers instructions".

Devices such as switches, RCCBs etc. in distribution boards and consumer units may have historically had their rated current determined after having taken diversity into account but without having considered overload protection of the devices.

These devices do not provide protection against overload and the 18th Edition prescribes that overload protection of the switch or RCCB shall not solely be based on the use of diversity factors of the downstream circuits.

We state in our instructions that overload protection of switches and RCCBs can be achieved by:

### Method 1

Ensure the sum of the rated current of the downstream MCBs do not exceed the rated current of the switch or RCCB ( $I_{nc}$ ). This method would however need to consider the consequences of any spare ways and later additions.

### Method 2

Ensure that the rated current of a switch disconnector or RCCB ( $I_{nc}$ ), stated by the assembly manufacturer, is not less than the rating of the upstream OCPD. For a domestic installation this could be a 100A cut-out fuse.

### Method 3

Select a consumer unit or distribution assembly that only utilises RCBOs on outgoing circuits. Consideration will still need to be given as to the rated current of the main switch.

### Example 1

Maximum demand based upon diversity = 92 A  
(100% Largest load + 40% all other loads)  
Consumer Unit  $I_{nA}$  = 100A

**Method 1. Overload protection provided by:**  
**Rated current of downstream devices**

RCCB1  $\geq$  Sum of rated current of downstream MCBs: 84 A   
RCCB2  $\geq$  Sum of rated current of downstream MCBs: 86 A

**Method 2. Overload protection provided by:**  
**Cut-out fuse**

RCCBs  $\geq$  Rated current of upstream protection  
RCCBs (100 A) - Cut-out fuse 100 A   
Cut-out fuse 80 A   
Cut-out fuse 60 A

### Example 2

Maximum demand based upon diversity = 62.4 A  
(100% Largest load + 40% all other loads)  
Consumer Unit  $I_{nA}$  = 63A

**Method 1. Overload protection provided by:**  
**Rated current of downstream devices**

RCCB1  $\geq$  Sum of rated current of downstream MCBs: 70 A   
RCCB2  $\geq$  Sum of rated current of downstream MCBs: 38 A

**Method 2. Overload protection provided by:**  
**Cut-out fuse**

RCCBs  $\geq$  Rated current of upstream protection  
RCCBs (63 A) - Cut-out fuse 100 A   
Cut-out fuse 80 A   
Cut-out fuse 60 A

### Example 3

Maximum demand based upon diversity = 98.4 A  
(100% Largest load + 40% all other loads)  
Consumer Unit  $I_{nA}$  = 100A

**Method 3. Overload protection provided by:**  
**Each RCBO**

**Method 2. Overload protection provided by:**  
**Cut-out fuse**

Switch  $\geq$  Rated current of upstream protection  
RCCBs (100 A) - Cut-out fuse 100 A   
Cut-out fuse 80 A   
Cut-out fuse 60 A

**Note:** in all examples, potential future loads on spare ways should be considered.
